ART

DRIES

By Reiner Holzemer
Featuring an original score by
Radiohead's Colin Greenwood

For the first time, fashion designer Dries Van Noten allows a filmmaker to accompany him in his creative process and home life. For an entire year, Reiner Holzemer documented the precise steps that Dries takes to conceive of four collections—the rich fabrics, embroidery and prints exclusive to his designs, and the emblematic fashion shows that bring his collections to the world and have become cult "must sees" at Paris Fashion Week.

This film offers an insight into the life, mind and creative heart of a Master Fashion Designer who, for more than 25 years, has remained independent in a landscape of fashion consolidation and globalization.

JOURNAL DE FRANCE

By Raymond Depardon and Claudine Nougaret

Travelling alone, internationally acclaimed photographer and filmmaker Raymond Depardon spent six years capturing his home country with a large format camera. This long, solitary road trip provided fertile ground for the creation, with his long-time partner and collaborator Claudine Nougaret, of a remarkable travel journal.

The journey returned Depardon to important places from his past as a reporter—Chad, Venice, Cannes—and to a wealth of previously unseen footage from his archive: an interview with Jean-Bedel Bokassa, film of Jean-Luc Godard, extraordinary glimpses of private and public life.

Intimate, compelling, revelatory, JOURNAL DE FRANCE offers a unique portrait of a country and its landscapes, an overview of a truly illustrious career and a fascinating resume of the development of the photographic art over the past half-century.

PITCH, THE: PASSING THE HAT FOR A LIVING

By Jim Kuehnelt

What is a "Brusker"? According to Merriam-Webster, a brusker is a 'street performer'; a person who entertains in a public place for donations. Street performance or busking is the act of performing in public places for gratuities. In many instances the rewards are in the form of money but other gratuities such as food, drink or gifts may be given. Brusking is practiced all over the world and dates back to antiquity. It is also, in contemporary times, used by performers as a way to get discovered.

Performances can be virtually anything... anything that people find entertaining. Performers may do acrobatics, animal tricks, balloon twisting, caricatures, clowning, comedy, contortions, escapology, dance, singing, fire skills, flea circus, fortune-telling, juggling, magic, mime, living statue, musical performance, puppeteering, snake charming, storytelling or reciting poetry or prose, street art such as sketching and painting, street theatre, sword swallowing, and ventriloquism. Brusking is only limited by the imagination of the performer.

"The Pitch" takes a look at the world of international street performing bruskers to find out why these men and women have chosen to "pass the hat" to make a living, along with the challenges they face.

The fast-tracked project was filmed over the summers of 2015 and 2016 documenting brusker performances and interviews during the 25th and 26th edition of the Buskers on The Bay Festivals.

Buskers featured in the film hail from Australia, England, the US and Canada, providing a broad spectrum of performers. The film is produced by Jim Kuehnelt with Mark Berry and Duane Farley as Executive Producers.

Featured artists and interviews include Aerial Manx, Andrew Lopatin, Brad The Balloon Guy, Pogo Fred, Super Elvis, The Flying Tortillas, Madame Guillotine and many more.

Only available in United States.

BUSINESS

DOUBLE UP

Double your targets and double your results. In this DVD Richard explains how it is possible to double your results without working any harder.

"Double-Up" Is a programme that will show your sales team how they can produce twice the results without working twice as hard. By using simple techniques mastered by top sales people I will demonstrate what is possible and nobody will leave the session without believing they can do it.

Topics

"Double-Up" your prospects

Set personal and company targets that have "Pizzazz"

Use 21st Century tools to grow your business

Work your goals

Develop expert status.

Motivate the team to really believe

Item no. : LN33670044
Format : DVD
Price : USD 144.00

SELLING FOR THE SMALL BUSINESS

ENTREPRENEUR

In this 4 DVD set Richard will take you through the process of selling. Starting with identifying new prospects to the close and beyond Richard will help you to understand how sales operates and how to grow your business. There are 16 modules in this set and the total video time is 6 hours.

The challenge for entrepreneurs and small business owners is that they often have the essential skills to do the work, but fail in the very essential skills of selling their work.

This training just about selling.

1 - What is Selling?

At the beginning we discovered that selling is not about shifting product but about keeping customers coming back over and over again.

2 - Life Time Value

We have to treat our customers for their Life Time Value and then they become life time customers and encourage their friends to do the same.

3 - Cold Calling

Convert Cold Calling to Warm Calling by finding out as much information as you can in advance of the call.

4 - Referrals & Networking

Referrals are the best way to grow your business. Don't wait for referrals to come to you, ask for them.

5 - Social Media

Selling is all about forming relationships

and so is social media.

6 - Keeping Customers

Once you have a new customer you keep them by making close personal friends with them

7 - Creating the right impression

You have just 4 minutes at the beginning of a meeting to create the right impression. Make sure you make them count.

8 - Body Language 1

Your Body Language is talking for you all the time, make sure it is saying the right things.

9 - Body Language 2

Remember ESP!

E = Get Eye Contact. S = Smile. P = Show the palms of your hands.

10 - Features Needs & Benefits

In selling we never sell features, we only sell benefits. A benefit is a feature that the customer needs.

11 - The Sales Conversation

The point of the sales conversation is to uncover the customer's needs. To do that we use Open Questions. Once we have uncovered the need we will confirm the need using a closed question and then give the customer confidence that we can fix his problem with a support statement. Finally we will offer our benefit and get agreement that our solution has solved his problem.

12 - Buying Decisions

Buying decisions are always made emotionally

13 - Price

Price is never the first thing the customer thinks about. If the product or service does not work for the customer, it doesn't matter how cheap it is. The customer cares about value, not price.

14 - Quotations vs. Proposals

Focus on your customer's problem and your solution rather than simply selling what you have.

15 - Closing the Sale

Always ask for the business. If you don't close you are working for the opposition.

16 - Summary

EDUCATION

COACH JAKE

Director: Ian Phillips

Martin Jacobson ('Coach Jake') may be the winningest high school soccer coach in New York City public school history, but his greatest victories lie in helping others and attaining what he likes to call 'the beautiful game.' Coach Jake has won a record 17 City Championships since he began coaching soccer at Martin Luther King Jr. High School in Manhattan in 1994, gaining notoriety for flipping the school's bad reputation to a pillar of the athletic community, and improving lives as much as he has scoring averages.

The feature documentary Coach Jake delves into the life and work of high school soccer's most intriguing figure.

NURSERY / RECEPTION

MATHS -

CROSS-CURRICULUM:

JACK & THE BEANSTALK

This lesson is filmed in a unique early years unit comprising of 20 nursery children and 30 reception age children supported by two teachers and four classroom assistants.

The two teachers have agreed to use a shared theme of Jack and the Beanstalk for the sessions. Children in both reception and nursery groups work on a variety of numeracy focussed activities to consolidate and extend their learning. The timetable is organised so that most able nursery pupils can work with reception aged pupils. Some pupils have a free choice of activity, whilst others are given a selection chosen by the teacher or TA.

STILL WATERS

Directed by Peter Gordon

In his tiny, one-room, after hours, free school in Brooklyn, Stephen Haff teaches forty Hispanic kids reading, creative writing and Latin.

A remarkable one-room school in Brooklyn is facing a tough year. It's the run up to the US presidential election and anti-Latino rhetoric is ramped up--an extra source of tension for a hard-pressed Hispanic community already threatened by gentrification and eviction.

The school, Still Waters in a Storm, is the creation of Yale grad Stephen Haff. A passionate critic of mainstream education, he believes in the joy of learning without tests and the innate creativity of children and insists that the school is free. It survives precariously on the thinnest of shoestrings.

When regular school finishes, Still Waters starts working. Stephen and his group of children explore, with the help of illustrious guest writers like twice Booker Prizewinner Peter Carey, the power of storytelling, creativity and community. And along the way they discuss Donald Trump and gentrification with humor and passion.

Filmed over a year STILL WATERS follows this compelling man, his philosophy, the spirit of the children who attend, and the dreams and fears of their immigrant Hispanic community.

Item no. : LG02560958

YEAR 1 LITERACY - THE ENORMOUS TURNIP

This year 1 Literacy class are looking at the topic of growing things. They have learned the story 'The Enormous Turnip' and the associated actions.

This lesson sees the children moving on to the 'innovate' stage where they begin to think about changes to the story. The story is reviewed verbally in groups. Carousels of activities to do with adjectives and improving sentences take place. Finally, the children retell the story using puppets and sequencing.

Item no. : FR30690075
Format : DVD (With CD-ROM)
Price : GBP 89.00

YEAR 1 MATHS - 3D SHAPES

In the previous lesson the class looked at the properties and names of 2D shapes, which they are now fairly confident with. Today the class study a 3D shape, and play a game in which they have to use new vocabulary to describe a shape to their partner.

The class is grouped into mixed ability pairs where they address misconceptions identified in the previous session. Less able groups are supported by a TA, revising 2D shapes and looking at 3D shapes.

Item no. : HW30690076
Format : DVD (With CD-ROM)
Price : GBP 89.00

YEAR 12 HISTORY (TRAINEE TEACHER) - 1951-1964: POSITION OF WOMAN AND ATTITUDE TO IMMIGRATION AND RACIAL VIOLENCE

Students look at social developments between 1951 and 1964, specifically the position of women and attitudes to immigration and racial violence. The teacher starts with a question and answer whiteboard exercise based on the homework set looking at the position of women. This is followed by independent research tasks and some rich discussion surrounding the issues raised.

Item no. : CN30690077
Format : DVD (With CD-ROM)
Price : GBP 89.00

YEAR 12 MATHS - CRITICAL PATH ANALYSIS

The topic for this year group is decision Mathematics. Previously they looked at setting up network diagrams based on critical paths, and this lesson focusses on putting the numbers in. They also revisit prior learning including Dykstra's algorithm and recapping methods from core Maths.

Item no. : CB30690078
Format : DVD (With CD-ROM)
Price : GBP 89.00

YEAR 12 PHYSICAL EDUCATION (TRAINEE TEACHER) - VIOLENCE IN SPORTS

The aim of this lesson is to understand the causes, implications and strategies to prevent violence in sport.

Students do various activities to see if they can identify what is an act of violence in

sport and its causes. They explain what the implications of violence are on the sport, society and players and discuss strategies to prevent them.

Item no. : DT30690079
Format : DVD (With CD-ROM)
Price : GBP 89.00

YEAR 12 RELIGIOUS STUDIES (TRAINEE TEACHER) - THE BIBLE AS A SOURCE OF WISDOM

Students look at the Bible to see whether it has authority and can provide good moral advice in our daily life. The class is then randomly separated into two groups with a for and against side, and students enter a debate to argue their case.

By challenging new ideas, this lesson will allow students, whether they believe the Bible is a good source of wisdom or not, to evaluate and decide their position on Christian beliefs and values.

Item no. : EV30690080
Format : DVD (With CD-ROM)
Price : GBP 89.00

YEAR 13 BIOLOGY - GENE PROBES AND GENETIC SCREENING

This year 13 Biology class have about 11 weeks till their exam and this is the final topic area for the specification (topic 8). It revolves around gene probes and genetic screening and they will look at gel electrophoresis to have a better understanding of this. After a number of whiteboard activities, the class look at some questions from the exam booklet.

Item no. : TT30690081
Format : DVD (With CD-ROM)
Price : GBP 89.00

YEAR 13 GEOLOGY (TRAINEE TEACHER) - GEOLOGICAL MAPS

This year 13 class looks at applied geology and the development of an airfield and a dam site, including the geological consequences of building these sites. The class is divided into two teams, where one looks at the airport site whilst the other looks at the dam. They have to consider geological reasons for developing the sites from a company perspective. The two groups then present to each other reasons for and against the developments. They then choose their map for the following lesson.

Item no. : VH30690082
Format : DVD (With CD-ROM)
Price : GBP 89.00

YEAR 13 PERFORMING ARTS - PRACTICAL PIECE USING MUSIC, DANCE AND DRAMA

In this lesson, students will be working on their practical exam paper (G404). They have already been given a stimulus and commission to devise a practical piece with the target audience in mind that must incorporate music, dance and drama. After a quick recap of prior learning, the groups warm up, rehearse, and refine their performances. Finally, they perform and evaluate each other's work.

Item no. : HN30690083
Format : DVD (With CD-ROM)
Price : GBP 89.00

YEAR 2 INDEPENDENT LEARNING - CASTLES

This is a year 2 independent learning lesson and the theme is castles. The session is called 'COOL Time' (Carry On Our Learning Time).

The teacher sets out a variety of engaging activities in different subjects such as Maths, English, Design, and History so children can practise and embed their learning. Half the class have set activities to follow, whilst the other have the freedom to choose their own. This works on a rotating basis, so all children have the opportunity to practise skills, and pursue areas of interest.

Item no. : AP30690084
Format : DVD (With CD-ROM)
Price : GBP 89.00

YEAR 2 MATHS - MULTIPLICATION

This mixed ability class looks at simple multiplication. In the previous session the pupils reviewed what they already knew. In this lesson any gaps in knowledge are reviewed and the teacher has narrowed down which methods children need to focus on. The class is divided into ability groups focusing on different skills, such as repeated addition, grouping, and consolidating all methods.

The aim is that by the end of the lesson children begin to recall facts by memory.

Item no. : PU30690085
Format : DVD (With CD-ROM)
Price : GBP 89.00

YEAR 3 SCIENCE - INVESTIGATING HEALTHY BODIES

This Science lesson takes a cross-curricular approach, pairing the creative curriculum theme of healthy bodies and ancient Egypt, with Maths skills of recording and reading information

from tables. After discussing what makes a fair test in the classroom, the children venture outside to conduct their own practical experiments using a carousel of activities.

Item no. : SZ30690086
Format : DVD (With CD-ROM)
Price : GBP 89.00

YEAR 4 MATHS - 6 TIMES TABLE

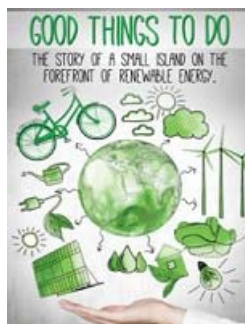

This lesson is one of a series, in which children prepare for a real charity fundraising sale.

The children use and review their times table knowledge in a money context, discussing what they will need to know in order to successfully run stalls. Children are encouraged to use efficient methods to solve number problems, apply the grid method, and use mathematical language.

Item no. : RW30690087
Format : DVD (With CD-ROM)
Price : GBP 89.00

ENVIRONMENT

GOOD THINGS TO DO

There is one island that is eco-sustainable now.

Can it teach its entire nation to be eco-sustainable by 2030?

Can that nation then teach the world?

GOOD THINGS TO DO is a film from the bright side of renewable energy. It is the work of Barbara Ferrari And Thomas Peres.

Our planet's quest for sustainability takes many forms, but one such effort has yielded results that could very well teach all of us methods of success.

The Danish island of Samso is an experimental site for renewable energy production: wind turbine farms; biomass power plants; and solar panels. All are used to generate electricity, heating and hot water for the island's population, farmers, and tourism operators who have invested in this green revolution and have set out to show the world that Denmark can change our relationship with energy

resources.

The mission is to make Denmark completely eco-sustainable by 2030.

PLANE TRUTHS

Directed by Melissa Young and Mark Dworkin

With the "Pivot to Asia" increased activity at the navy base on Whidbey Island, WA is making life unbearable for locals and wildlife - collateral damage in the ever increasing militarization of our society.

The recent expansion of Navy training activities in the Northwest has many local residents concerned. Will more of our communities become collateral damage?

Community members on Whidbey Island, the San Juans, and the Olympic Peninsula are disturbed by an increase in noise caused by new EA-18G "Growler" jets based at Naval Air Station Whidbey (NAS)--and a significant proposed expansion of daily Growler test flights. On Whidbey, communities have been additionally impacted by water system pollution caused by chemicals (PFOA & PFOS) used for firefighting on NAS landing strips.

PLANE TRUTHS explores a variety of perspectives on these issues from farmers, current and retired military personnel, environmentalists and other citizens of the affected areas. Viewers will learn how the noise of the Growler jets has affected daily life and business operations in many communities, about the regional environmental impacts of expanded Growler flights and newly approved Navy training in Olympic National Forest, the potential economic ramifications of increased Navy activity and associated population growth, and the status of--and Navy response to--water system pollution on Whidbey Island.

As the ideology of perpetual war becomes ever more embedded in our economy, communities near US bases here and around the world face similar problems.

GEOGRAPHY

CARBON AND WATER CYCLES IN THE TROPICAL RAINFOREST

Filmed in the Amazon and Borneo, this resource illustrates and explains the key environmental and land use changes occurring in tropical rainforests and explores the effect these changes are having on the carbon and water cycles. We accompany scientists up flux towers as they monitor CO2 emissions and find out why they're digging soil pits to examine decomposition rates. A fantastic case study to deepen students' understanding of carbon and water cycles

The programme includes 4 sections.

1. The Global Carbon Balance
2. Measuring Carbon
3. Deforestation and the Carbon Cycle
4. Deforestation and the Water Cycle

Item no. : CL21960083

CARBON AND WATER CYCLES IN THE TUNDRA

With stunning footage shot in the Canadian arctic, this DVD identifies and explores the physical and human factors, including climate change, that affect carbon and water cycles in the tundra. We see the research and monitoring techniques scientists are using to identify and record these changes and we

examine the reasons this data is gathered. The resource shows also show these same techniques can be used by students as part of their own fieldwork investigations.

HISTORY

CARRY ME HOME

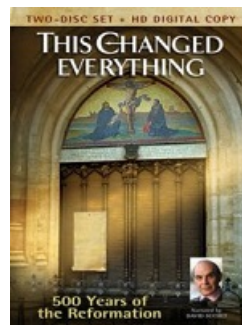

A powerful story of freedom that was fought for on the Underground Railroad through the unrelenting courage and determination of Harriet Tubman.

Joshua Henry's Carry Me Home is a beautifully produced 23-minute short film based on the true story of Maria Ennals (Lindsey Grimble) and her family in the Antebellum South during the cold winter of 1860, and inspired by the equally true story of Harriet Tubman's final journey south.

Maria is a young mother trapped in slavery who seizes the opportunity to escape with her family when she encounters HARRIET TUBMAN (Karen Abercrombie, War Room). Harriet leads the young family through a number of trials on the Underground Railroad, causing them all to question whether or not freedom is worth the price they must pay to obtain it.

TO AUSCHWITZ AND BACK: THE JOE ENGEL STORY

It tells a story of persecution and one man's inner-strength, fortitude and daring escape from internment in Nazi Germany. Joe Engel's determination to survive has resulted in him becoming a treasured citizen, community leader, teacher and philanthropist in America.

Born in Zakroczym, Poland in 1927, Joe Engel was taken by the Nazis at 14 and never saw his parents again. He is the embodiment of living history and spends his retirement years ensuring the Holocaust is never forgotten.

From the overwhelming despair of the Warsaw Ghetto, to the shroud of unceasing death and suffering that was Birkenau and Auschwitz, Joe then takes you through his escape from a Death Train at 17 and covert work as a freedom fighter until Liberation in 1945.

Joe's is a vivid journey to hell and back;

enriched by an incredible and personal approach to storytelling. His number tattoo may have faded over time, but his passion for life and his story continues today.

With the assistance of "The United States Holocaust Memorial Museum's film and photographic archives", filmmaker Ron Small (Circle Unbroken, Medals of World War II) has successfully weaved Joe Engel's incredible storytelling into a riveting visual presentation that is both historic and contemporary.

With an unwavering will to live, Joe Engel overcame unimaginable horrors, earned his freedom through a daring escape, and fought to free others. He currently resides in Charleston, S.C.

Many people can tell a story. Very few can compel you to listen. Joe Engel, at 90 years of age, knows how to tell his story. His life is a story of faith, renewal, inner-strength and redemption. He is a charming storyteller who hopes that people will listen and learn and most of all... "never forget".

MEDICINE AND HEALTH

12 DAYS

By Raymond Depardon

Every year in France, 92,000 people are placed under psychiatric care without their consent. 12 DAYS focuses on those who have been involuntarily remanded to a mental hospital, and more specifically documents the hearings that, according to a 2013 law, are required to take place 12 days after each patient has been committed.

At these hearings, the patients are given an opportunity to argue for their freedom before a judge who ultimately decides whether they will go free or return for further treatment. Granted access to these hearings for the first time, celebrated filmmaker and photographer, Raymond Depardon, captures these extraordinary encounters between justice and psychiatry, giving a voice to those who have previously been voiceless.

Encompassing questions of mental health, power, class, agency, and the dynamics of societal institutions, 12 DAYS is consummately controlled yet suffused with empathy and compassion.

BACKING OUT OF TIME

Over a three-year period, this intimate film balances the honest emotions and real concerns of five diverse families as they navigate a new and often sudden terrain — that of caregiving. From early uncertainties to the realities of daily care (emotional frustrations, financial obstacles, and lifestyle changes), the film captures these families in the throes of caregiving — laying bare both the rewards and the challenges. The film also shares insights from the persons living with dementia, as well as, the children and spouses who are impacted by changes to the family unit. Interspersed with information to better understand the symptoms and effects of Alzheimer's, and feedback from care professionals, this film is an upbeat look at the adjustments and compromises these families make as they learn how to care for their loved on with Alzheimer's.

A great film to share with professional caregivers, or anyone who is (or will be) caring for a loved one at home.

CHOLESTEROL, THE GREAT BLUFF

By Anne Georget

For more than six decades, doctors, nutritionists, and public health officials have been waging a war against high cholesterol in an effort to fight heart disease. It's a war that has seen the demonization of saturated fats, the rise and fall of hydrogenated oils, and the introduction of several generations of "miracle" drugs.

But what if the basic premise linking cholesterol and heart disease is wrong?

CHOLESTEROL, THE GREAT BLUFF convincingly argues that the link between cholesterol and heart disease is tenuous — and that its persistence results from a potent mix of bad science, entrenched interests, and pharmaceutical profits.

The problems date from the earliest days of the cholesterol hypothesis, first proposed by physiologist Ancel Keys, who proposed that a diet high in saturated fat leads to cardiovascular disease. Medical journalist Dr. Dominique Dupagne cites evidence that Keys cherry-picked his data. But it was too late. Americans were trying to understand what lay behind the soaring rate of heart attacks, and fat seemed like the perfect villain. Once saturated fats were to blame, heavily industrialized products such as "pure vegetable shortening"—the result of a process including emulsification, bleaching, and steam-cleaning—come to be seen as healthier foods.

As the film makes clear, researchers who made any serious attempt to study other hypotheses—that sugar led to vascular disease, for instance—found themselves threatened, their research funding cut and their careers derailed.

CHOLESTEROL, THE GREAT BLUFF deploys an array of authoritative and engaging experts to attack the foundations of the cholesterol hypothesis. Author and nutritionist Sylvain Duval uses markers and easy-to-understand analogies to explain the mechanisms of how cholesterol works and how the body uses different fats. Investigative journalist Nina Teicholz lays out how Keys came to demonize cholesterol, and details the intimidation faced by those who sought alternatives. Cardiologist and nutritionist Dr. Michel de Lorgeril, who did the first study on the benefits of the Mediterranean diet, is scathing in his views on the pharmaceutical industry's complicity in propagating faulty research, including the studies that led to the widespread adoption of statins. The film also hears from an array of other researchers, physicians, and writers who, among other things, question the notion of "good" and "bad" cholesterol.

Peppered throughout are vintage and recent clips from advertising (including Tom & Jerry pushing margarine), sponsored films, and newscasts blaring the latest cholesterol breakthroughs.

IS SUGAR THE NEW FAT?

Interviews with scientists and the food industry reveal the link between obesity and sugar.

Sugar! What's not to like? It's being touted as highly addictive and the biggest contributor to the current worldwide obesity epidemic. We used to think high in fat diet was to blame so who's the real bad guy? This series takes on world-leading scientists and the food industry in an attempt to understand the truth about sugar.

Hosted by noted psychologist and New Zealand TV presenter Nigel Latta, with commentary by USC professor of childhood endocrinology Robert Lustig, author of Fat Chance: Beating the Odds Against Sugar, Processed Food, Obesity, and Disease, the documentary presents a compelling argument that added sugars should be treated with the seriousness accorded to the negative dietary impact from fats.

The documentary features Latta as he sets out on a journey to peel back the sugar coating and see what truth lies beneath the global debate that is consuming nutrition experts.

MODELING PERSON-CENTERED CARE IN PRACTICE

Created for professional caregivers and family care partners, this DVD features people with dementia as they go about their days, and shows professional caregivers in action. Training your administration and staff in person-centered care is easier when they can see and hear the difference for themselves. Family members will appreciate seeing caring and creative ways for understanding and coping with the behaviors of their loved ones. This training tool demonstrates a variety of simple, commonsense techniques for building relationships, as well as imaginative and innovative approaches for preventing and defusing challenging behaviors through engagement.

ORGAN DONATION: IDENTIFICATION, REFERRAL & CONSENT PROCESS

Presentations:
 Identifying Organ Donation Potential
 Identification, Referral and Intervention
 Obtaining Consent: Issues and Considerations

The program features experts in the area of organ donation and is designed to educate nurses, nursing students, administrators and other health care professionals and students on how to identify and refer potential organ donors, as well as, the many factors which should be considered in the consent process.

After viewing the program, participants should be able to:

- (1) Describe how an organ procurement organization utilizes retrospective death records review to determine a hospital's organ donor potential,
- (2) Describe how brain death is determined and how to maintain a brain dead beating heart donor,
- (3) Describe how to identify a potential organ donor and when to refer the donor to an organ procurement organization,
- (4) Describe an informed consent, and
- (5) Cite three factors affecting the consent process.

RADIOLOGY OVERVIEWS; TECHNICAL ASPECTS, OPERATIONS AND INTERPRETATION

In this series of 30 minute educational programs, explores various imaging techniques and delivers in depth explanations of the technical process, equipment operations and general image interpretation as applied to each scanning technology.

Designed to provide a comprehensive overview of individual medical imaging modalities, these programs are directed towards both students and general practice healthcare providers.

Magnetic Resonance Imaging

The first released title in our series, this program includes a brief history of the development of nuclear magnetic resonance and a Technical Aspects segment with an explanation of the interaction between magnetic fields and radiofrequency waves which produce MR images.

The Operations segment looks at pre-MRI procedure screening and a current overview of protocol considerations as well as the positioning of various RF coils.

Finally, in the Interpretation segment of the program we discuss the actual imaging sequences and provide general explanations of intensity for each sequence.

Additional programs in this series are anticipated to cover the following topics:

Radiology Part 1: Projectional Radiography
 Radiology Part 2: Fluoroscopy
 Computed tomography
 Ultrasound
 Nuclear Medicine Part 1: Positron Emission Tomography
 Nuclear Medicine Part 2: Single-photon Emission Computed Tomography

THERE IS A PLACE

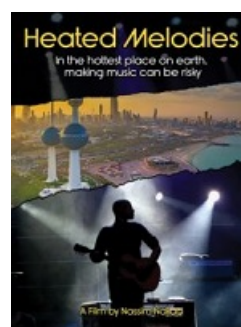

This inspiring new film takes us to a place...a place where the healing power of music transcends Alzheimer's, loneliness, and confusion to usher in a sense of happiness and belonging. The film follows singer-songwriter Lior Tsarfaty as he visits Alzheimer's care communities and engages the residents in music, song, and dance. "Your heart is a reminder that you are not alone," he tells one group, "You are connected to other hearts, and other hearts, and other hearts, and other hearts. And we are all beating together, just like a

big, big drum." And the residents smile, and sing, and play instruments, and dance—and belong to that particular moment. Caregivers will be encouraged to boost the overall quality of life for persons living with Alzheimer's through the inclusive and engaging power of music and movement.

MUSIC

HEATED MELODIES

Directed by Nassim Nakad

In the hottest place on earth, making music, even playing the blues, is a political and religious challenge!

Nassim Nakad's "Heated Melodies" poses the question of "What happens to an artistic community when a country's legal system is comprised of British Common Law, French and Egyptian Civil Law and Islamic Law?"

Music is a universal language. Composing it, producing it and performing it is a challenge that requires a lot of diligence. That is the art of the musician.

In some countries the difficulties are exacerbated by political and religious acceptance-rules & laws-which impact the ability of the musician to be an artist at all. Kuwait is one of the countries!

The music community in Kuwait is growing, but it remains mostly underground as it fights the cultural and government restrictions placed upon it. Not all music is welcomed in Kuwait.

While classical music is mostly accepted, the underground scene is packed with musicians and bands playing contemporary genres including Rock, Metal, Blues and more, and are comprised of members who have helped to highlight the issue by participating in this production.

As Wikipedia and Wikiislam explain, Kuwait law and the Sharia law struggle with an artistic society that is westernizing.

Heated Melodies highlights the challenges

of such a society and the stereotyping of musicians and musical genres. The film additionally explores the difference between the acceptance of males vs. females within the context of religious beliefs and musical performance.

Directors: Sean Blacknell, Wayne Walsh

In this provocative documentary, worldwide experts in the fields of futurology, anthropology, neuroscience and philosophy consider the impact of technological advances on the two certainties of human life: work and death.

Charting human developments from early man, past the Industrial Revolution, to the digital age and beyond, The Future of Work and Death looks at the astonishing exponential rate at which mankind creates technologies to ease the process of living. As we embark on the next phase of our 'advancement,' with automation and artificial intelligence driving the transformation from man to machine, the film gives a shockingly realistic look into the future of human life.

Featuring a host of knowledgeable but endearingly eccentric experts including author Will Self, futurist Gray Scott, transhumanist Zoltan Istvan, and neuroscientist Rudolph Tanzi, The Future of Work and Death is profoundly insightful, often surprising, and always engaging.

RELATIONSHIPS: ADOPTION-SPECIFIC THERAPY IN PRACTICE

With Jill Waterman, PhD

The process for adopting children, especially older children, can often bring a mix of feelings for both parents and child: happiness, anxiety, confusion, sadness and loss, and children may experience significant behavioral and emotional distress. Adoptive families can be helped by adoption-specific therapy that takes into account the child's past trauma and placement history, recognizing that current behavioral issues may have been adaptive in a previous traumatic, chaotic, or neglectful context.

In this program, Dr. Jill Waterman demonstrates the initial parent session of ADAPT, a manualized therapeutic approach that combines evidence-based treatments for children and families with best practices from the attachment and adoption literature. In ADAPT, both parents and children are seen for

treatment individually and jointly.

In this video, Dr. Waterman demonstrates this approach with a young mother who has a 5-year-old adopted son.

RELATIONSHIPS: COUPLES EXPERIENCING COMMITMENT UNCERTAINTY

It is not uncommon for couples to quarrel over issues such as chores or finances. However, such conflicts tend to have underlying, unresolved issues that can easily be mistaken for something else. Therefore, it is essential that therapists have a keen awareness of underlying issues that aren't always expressed out rightly.

In Couples Experiencing Commitment Uncertainty, clinical interventions are led by establishing a secure attachment between partners, and helping couples identify their emotional needs, often hidden amongst conflict.

In this video program, Drs. Johanna Strokoff and Jesse Owen both direct the co-therapy demonstration session by helping a couple express their most authentic and vulnerable desires for comfort, acceptance, and love while also communicating concerns about judgment or abandonment.

RELATIONSHIPS: EMOTION-FOCUSED COUPLE THERAPY

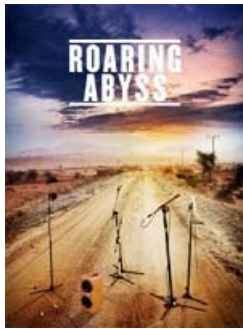

With Rhonda N. Goldman, PhD

For couples undergoing marital distress, common interactional cycles between partners, such as criticizing and withdrawing, can obstruct the emotional engagement needed for secure bonding and partner validation.

An important key in couple therapy is recognizing these patterns as they are occurring and from within a highly validating therapeutic relationship, exploring the underlying, negative emotional and interactional states, and then transforming them into more adaptive cycles that support healthier mutual understanding and bonding.

In this video program, Dr. Rhonda N.

ROARING ABYSS

By Quino Pinero

Ethiopia has over eighty different cultures. With live recordings of music, this film is a voyage of discovery across mountains, deserts and forests to find the last interpreters of traditional Ethiopian music. It is a search for authenticity which is increasingly being pushed aside by electronics and mainstream culture...

A sound journey across the mountains, deserts and forests of Ethiopia and its cultural universe. Roaring Abyss will take you through an extensive and previously unpublished collection of music recordings of invaluable importance for the transmission and preservation of the African heritage.

Ethiopia's music scene is known for its distinctive genre of Ethio-Jazz, a blend of western musical sounds, Armenian introduced brass instruments, and Ethiopia's traditional folk and religious music. Most focus on Ethiopian music highlights the country's modern musical output, music that utilizes keyboards, synthesizers, and drum machines.

SCIENCE AND TECHNOLOGY

CERN

By Nikolaus Geyrhalter

Multi-award winning director Nikolaus Geyrhalter (HOMO SAPIENS, OUR DAILY BREAD, ELSEWHERE) delivers stunning imagery and fascinating insight into the largest particle physics laboratory in the world. Inside the immense Large Hadron Collider, operated by world-renowned research organization CERN (European Organization for Nuclear Research), the big bang scenario is recreated in search for the smallest particle.

Including interviews with the leading experts who operate and maintain this gigantic Big Bang machine, the film provides fascinating insights into this complex experimental research institution and the quirky geniuses behind the scenes.

For those who do not know a proton from a neutron, CERN provides a chance to learn more about physics from the best and brightest in the field.

Featuring some of the world's leading physicists, including: Beniamino Di Girolamo, Tatuso Kawamoto, Yves Schutz, Pauline Gagnon, and Christophe Grojean.

SHOW ME SCIENCE ADVANCED - TECHNOLOGY: COMPUTER SCIENCE - THE

IMPACT OF COMPUTERS

Perhaps no invention has impacted our everyday lives more than the computer. Computers have transformed the fields of science, medicine, education, entertainment and research, to name a few. In fact, it's hard to think of any area of our everyday lives that has not been affected by computer technology. Computers have become an indispensable part of our lives. A computer is made up of Hardware, the machine, the hard drive, the boards and chips, which take instructions from Software - or applications. The result is a completed task, or epic graphics in a game or pin-point accuracy in a robot assisted medical procedure. From a steam-driven prototype developed in the early 1800s, to the first computer built in 1941, which could process 29 equations simultaneously, to the microprocessor developed by Intel - the evolution of the computer is amazing. The first computers, developed in the mid 1940s took up an entire room. Today the microprocessor, smaller than a fingernail, delivers immense computing capabilities to run today's applications.

SOCIAL SCIENCES

ACORN AND THE FIRESTORM

Director: Reuben Atlas, Sam Pollard

If you were impoverished and politically voiceless, ACORN hoped to change your mind. For 40 years, the community-organizing group sought to empower marginalized communities. Its critics, though, believed ACORN exemplified everything wrong with liberal ideals.

Fueled by a YouTube video made by two young conservatives who posed as pimp and prostitute in a sting, ACORN's very existence would be challenged. ACORN and the Firestorm goes beyond the 24-hour news cycle and cuts to the heart of the great political divide.

AMISH AND THE REFORMATION, THE

Discover the roots of the Amish people...

The Amish and the Reformation traces the origins of the Old Order Amish of America and gives a uniquely personal view of Amish beliefs by former members of the

group.

Beginning with Luther's 95 theses, the program describes the advent of the Reformation, the establishment of a reformed state sponsored church in Switzerland and the formation of the breakaway Anabaptist Movement.

From its Anabaptist origins the Amish developed as a unique sub-group under the leadership of Jakob Ammann. Host, Joseph Graber, a former member of the Amish Church traces his family origins back to the Reformation era and gives unique insights into how Amish beliefs have changed over the centuries.

ASHTON HARRISON: ROAD TO 24

By Ron Small

How can a pink roll cage change the course of destiny for one young woman?

The Road to 24 is an inspirational story of how one young lady has succeeded against the odds and broken through the proverbial "glass ceiling".

Ashton Harrison is a Georgia girl. She loves her family, has a soft spot for rescue dogs and oh, yes...she's also a professional race car driver routinely hitting wicked speeds.

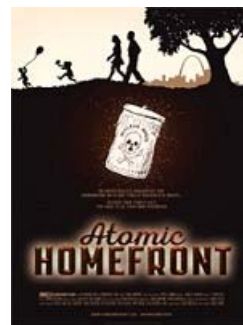

Join Ashton as she negotiates the male-dominated world of professional auto racing with her signature pink roll cage.

In a fusion of Mazda racing history and the persistence of one driver, The Road to 24 takes you from Ashton's first taste at Bondurant Racing School to her time trials at Barber Motorsports Park, to racing at Sebring, Road Atlanta, Road America, Mazda Raceway Laguna Seca and Atlanta Motorsports Park. Ashton is on a mission to become one of the top drivers in what she hopes to be the Mazda Prototype, one of professional racing's most coveted positions. This is her inspirational story.

ATOMIC HOMEFRONT

By Rebecca Cammisa

ATOMIC HOMEFRONT shines an urgent and devastating light on the lasting toxic effects that nuclear waste can have on communities. Focusing on a group of moms-turned-advocates in St Louis, Missouri, the film follows the women as they confront the EPA, government agencies that are slow to provide aid, and the corporations behind the illegal dumping of dangerous radioactive waste in their backyards.

Both a harrowing indictment of institutional misconduct and a tribute to the heroism of mothers fighting to protect their families, ATOMIC HOMEFRONT is essential viewing for anyone interested in environmental grassroots activism, government and corporate responsibility, and the effects of nuclear waste on human health.

BLACK HALT

By Jadadeesh Sa

BLACK HALT is a fusion of fuel source history and economic influence coupled with new science and spiritual approaches to powering our planet.

Starting with a survey and explanation of our planet's oil supply, BLACK HALT presents a global economy in turbulence rooted partially in the historic influence of OPEC.

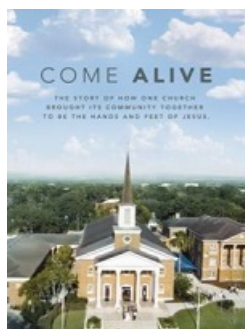

The film poses the question:

"Can a community of students, scientists, economists, spiritual leaders and the overall human consciousness take control the planet?"

Through the use of superb animation, live action and an extremely clever narrative between two women, **BLACK HALT** provides an intellectual guide for both current and future generations to follow.

COME ALIVE

By Dave Peters

Love started it... and succeeded!

What would our world look like if more churches followed the example Jesus gave us to serve the poor and needy?

First Baptist Church in Leesburg, Florida, sought to answer that question over 30 years ago and laid the foundation for what is now the Christian Care Center.

The decision was really the answer to a simpler, more contemporary and pragmatic question that the expanding congregation asked of itself and its members:

Build a larger auditorium or invest in the community?

Come Alive is the story of their answer.

Because of the church's deep commitment to "ministry evangelism," the Christian Care Center has touched lives, restored families, and seen thousands of broken, hurting people come to know the love of Jesus.

The heartwarming story of the Christian Care Center will challenge pastors, church planters, and church members alike to follow Jesus as agents of change in the world by mobilizing their communities to serve "the least of these."

DONNA HARAWAY: STORY TELLING FOR EARTHLY SURVIVAL

By Fabrizio Terranova

Feminist thinker and historian of science Donna Haraway is perhaps best known as the author of two revolutionary works: the essay "A Cyborg Manifesto" and the book *Primate Visions*. Both set out to upend well-established "common sense" categories: breaking down the boundaries among humans, animals, and machines while challenging gender essentialism and questioning the underlying assumptions of humanity's fascination with primates through a post-colonial lens.

DONNA HARAWAY: STORY TELLING FOR EARTHLY SURVIVAL features Haraway in a playful and engaging exploration of her life, influences, and ideas. Haraway is a passionate and discursive storyteller, and the film is structured around a series of discussions held in the California home she helped build by hand, on subjects including the capitalism and the anthropocene (a term she "uses but finds troubling"), science fiction writing as philosophical text, unconventional marital and sexual partnerships, the role of Catholicism in her upbringing, humans and dogs, the suppression of women's writing, the surprisingly fascinating history of orthodontic aesthetics, and the need for new post-colonial and post-patriarchal narratives. It is a remarkably impressive range, from a thinker with a nimble and curious mind.

Haraway and filmmaker Fabrizio Terranova (who we hear but don't see) are clearly at ease with each other, giving the conversations—which are punctuated by images of artwork and quirky animation—a casual, intimate feel. Terranova makes playful use of green screens to illustrate Haraway's words, or to comment on them. As Haraway discusses storytelling, we see an image of her in the background, writing. When the conversation turns to her own unorthodox personal relationships and the oppressive power of heteronormativity, the redwoods out her window are replaced by a crisp suburban street. Underwater invertebrates, one of Haraway's fascinations, float by in the background of a room.

DONNA HARAWAY: STORY TELLING FOR EARTHLY SURVIVAL is a clever and insightful glimpse into the thought of a major contemporary figure.

DOUBLE LIFE, A SHORT HISTORY OF SEX IN THE USSR

By Inara Kolmane

The October Revolution that ushered in the creation of the Soviet Union wasn't just about politics—it was also about sex.

DOUBLE LIFE tells the story sex in the USSR, from the libertine 1920s, through Stalin's Soviet-style puritanism, all the way to the sexual revolution of the late 1980s under Gorbachev. Writer-director Inara Kolmane is our guide to the weird and often troubling world of Soviet sexual mores. A world where young women were taught nothing about sex but learned how to strip down a Kalashnikov, and where nearly every copy of a tame sex manual for young married couples wound up being fed into a giant furnace. Kolmane travels across the former USSR—from Riga to Siberia and from St. Petersburg to Kiev—meeting sexologists, historians, doctors, artists and ordinary citizens. They share intimate personal stories and shed light on the way attitudes towards sex shaped everything from birth control policy to fashion to employment prospects.

The early years of the Revolution saw the overthrow of bourgeois morality: workers in the new communal homes shared everything (from sexual partners to underwear). The "glass of water" theory held that satisfying sexual desires should be as easy as having a drink of water to quench your thirst. Poet Vladimir Mayakovsky made appearances with naked women draped only in sashes reading "Down with shame!" But it didn't take long for this libertinism to lead to the policing of women's sexuality. The new Soviet Man had the right to fulfill his sexual desires – and any proletarian woman who refused him risked being branded a member of the petty bourgeoisie.

It all ended under Stalin. Homosexuality, adultery, abortion, masturbation, and pre-marital sex all became illegal. When Khrushchev denounced the Stalinist cult of personality he also began a thaw in sexual policies; adultery might cost you your job, but it would no longer get you sent to a work camp in Siberia. (Highly placed party members, of course, could pretty much do what they wanted.)

In the post-Brezhnev era, legal constraints on sexual activity might still be on the books, but young people were doing it at beaches, on stairwells, in the bathrooms of communal houses, and elsewhere. By the late 1980s, a Russian model would be on the cover of *Playboy*.

What makes **DOUBLE LIFE** stand out is the conjunction of historical overview and personal stories. A judge who presided over the trials of gay men reveals his own homosexuality in his journals. A journalist pores over the minutes of party members' meetings about his father's affair with the woman who would become his mother.

The film uses beautiful stop-motion animation to illustrate key moments in the story, along with remarkable and candid photos by Siberian photographer Nikolai Bakharev, the rarely seen pornographic drawings of legendary director Sergei Eisenstein, and archival footage from seven decades of sexual life in the USSR.

FRANCE (LES HABITANTS)

By Raymond Depardon

The vintage camping trailer making its way along France's secondary highways looks utterly unremarkable. But once Raymond Depardon parks it—in front of stores, businesses, and town squares across the country—it becomes the location for dozens of remarkable conversations.

Through his documentary films and photography, Depardon is known as one of the great chroniclers of contemporary France. In *FRANCE*, he takes a new approach: he mics his trailer, installs cameras pointed at a small table by the window, then invites strangers to come in and have a conversation with each other. (Depardon himself is never on-camera.) The participants range in age from their teens to their 80s: couples, friends, parents, children.

Despite, or perhaps because of, the unusual setting, many of the conversations are strikingly intimate. A young man talks to his girlfriend about how he struggles with her jealousy. A single mother working as a stripper vents all her frustrations to a near-silent friend. Two high school seniors reminisce about their school days in a scene straight out of a coming-of-age film. A mother tries to make her son understand how his destructive behaviour affects the whole family and causes endless worry.

Some of the conversations feel like near-perfect one-act plays, like the one with a middle-aged couple (he's a fortune-teller, she's a self-described rationalist) who start off talking about holiday plans and end up wondering why they are together.

FRANCE does not set out to offer a definitive overview of French life. But certain themes do emerge, including women who find themselves in difficult relationships or chasing after exes for child support; parents worrying about their adult children and feeling left out of their lives; young men with appallingly retrograde attitudes towards women; and young couples who face challenges with trepidation but also who clearly delight in each other's company.

FRANCE is an immensely compelling documentary, plunging us unfiltered into the lives of a wide range of people we

would not otherwise encounter.

FROM BUSINESS TO BEING

By Hanna Henigin and Julian Wildgruber

How do we want to live and work?

FROM BUSINESS TO BEING tells the story of three executives—a former investment banker at Lehman Brothers, a project manager in the automotive industry and a regional manager at the pharmacy chain "dm"—who embark on a quest to find ways out of the "rat race." Their motivation: the desire for more enthusiasm, meaning and authenticity in their work.

Through their sensitive and yet forthright approach, Hanna Henigin and Julian Wildgruber provide deep insight into the emotional sphere of the otherwise closed world of business leaders and explore the question: to what extent are the crises of today's workplaces crises of consciousness? Can meditation and awareness training help to free people from stress provoking patterns of thinking and behaving, and get back to themselves? What skills will be required from business leaders in the future and how do organisations in a globalised world have to be rethought and restructured towards more collaboration?

In their search for answers, the filmmakers meet experts from economics, science and meditation who build bridges between "business" and "being" and give new impetus for a cultural change in the business world, focussing on the well-being of all stakeholders. Distinguished international experts interviewed include:

Dr. C. Otto Scharmer, action researcher at Massachusetts Institute of Technology (MIT) in Cambridge and author of the books "Theorie U" and "Leading from the Emerging Future"

Prof. Dr. Jon Kabat-Zinn, molecular biologist, meditation trainer, researcher and founder of the world famous "Mindfulness-Based Stress Reduction (MBSR)", which is an outpatient therapy for stress reduction in the form of an eight-week course.

Prof. Dr. Arthur Zajonc, Emeritus quantum physicist and meditation practitioner for over 40 years. As President of the "Mind and Life Institute" he campaigns for a combination of modern sciences and spirituality in cooperation with the Dalai Lama.

Prof. Dr. Tania Singer, neuroscientist, psychologist, and head of the department for social neurosciences at the Max-Planck-Institute for Human Cognitive and Brain Sciences.

Based on the conviction that changes towards a better working environment and society are rooted in a growing awareness of the individual, *FROM BUSINESS TO BEING* is a film that touches people, inspires discussion and above all encourages an honest reflection to the age-old question: who am I? What inspires me? And how do I live and act accordingly?

HERETIC, THE

Directed by Andrew Morgan

Follows Rob Bell, founder of a megachurch in Michigan, and now an influential writer and speaker, as he spreads a message of love and inclusion and searches for what it means to be human.

There is perhaps no figure in American Christianity as polarizing as Rob Bell. Once a pastor of the fastest growing church in America and heralded as the next Billy Graham, that all changed when he began challenging the traditional understanding of hell and suggesting that heaven might be open to all.

The film follows Rob with unprecedented access over several years as he challenges deeply held conservative ideals while grappling with some of the most important questions of our time: Can faith and science coexist, or do belief and progress stand in opposition? Is religion insufficient for explaining the complexity of our modern world, or does it give language to something even greater? And do spiritual traditions simply serve to further divide our world, or can they offer real help and hope for a better tomorrow?

Surprising, inviting and disarmingly beautiful, *The HERETIC* is a story about the eternal and the here and now. A poetically unorthodox portrait that offers new language for a bigger, more expansive conversation about faith.

IN THE SHADOW OF THE REVOLUTION

Directed by Clifton Ross and J. Arturo Albarrain

In the Shadow of the Revolution gives voice to critical perspectives on Venezuela's Bolivarian Revolution. The film provides alternative perspectives on Venezuela's Bolivarian Revolution by former Chavez supporters.

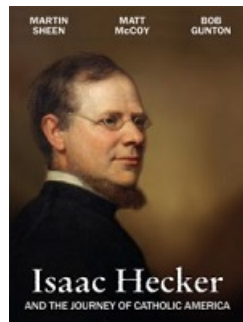

In the Shadow of the Revolution, an independent U.S.-Venezuelan collaboration by writer-directors J. Arturo Albarrain and Clifton Ross, gives voice to much-needed alternative perspectives on the country's Bolivarian Revolution. Heavily disseminated Bolivarian propaganda presents a narrative of a popular, left-wing government that has brought great benefits to the population in the face of attacks from a right-wing, "fascist" opposition. Through interviews with social movement activists, journalists, and academics, the film provides a counternarrative that helps explain the current rebellion against a corrupt, inefficient authoritarian government that has created a catastrophe in Venezuela that has brought it to the brink of civil war.

The central protagonist is Rodzaida Marcus Vera, a mother, musician, agroecologist, and indigenous-rights activist whose life, questions, and concerns unfold as she comes to personify the current struggle for democracy in Venezuela today. She grew up in El Valle de Caracas, where her mother was killed by sharpshooters during the 1989 uprising known as the Caracazo. After that life-changing event, Rodzaida studied sociology at the Central University of Venezuela and became involved in the campesino/agroecology movement. As she describes it, she "fell in love with the Process" in its beginnings under Hugo Chavez but became concerned after his turn toward socialism in 2007.

Rodzaida's reflections through the course of the film are complemented and amplified by interviews with, among others, historian/sociologist Margarita Lopez Maya; labor journalist Damian Prat; National Assembly MP, lawyer, and transgender activist Tamara Adrian; workers of the basic industries of Guayana, including former political prisoner and union leader Ruben Gonzalez; and members of left parties and organizations such as Marea Socialista and Bandera Roja.

ISAAC HECKER AND THE JOURNEY OF CATHOLIC AMERICA

The United States was founded on the ideals of religious liberty and individualism, concepts that to many seemed diametrically opposed to Roman Catholicism. But one man sought to show that Catholicism and Americanism are not incompatible.

Using popular communication methods of his day, Isaac Hecker became a courageous voice for Catholicism in nineteenth-century America. Given the hostility between the Old World and the New, Hecker's ministry earned the derision of both his fellow Americans as well as many in the Catholic hierarchy in Rome.

"Isaac Hecker and the Journey of Catholic America" features the voices of Martin Sheen (The West Wing), Matt McCoy (The Hand that Rocks the Cradle), Bob Gunton (The Shawshank Redemption), Jay O. Sanders (JFK, The Day After Tomorrow), and David Ushery (WNBC, News 4 New York) as well as interviews from some of the leading historians and clergy in North America.

JEAN ZIEGLER, THE OPTIMISM OF WILLPOWER

By Nicolas Wadimoff

Professor of sociology at the Sorbonne, Paris, collaborator with Nobel Peace Prize recipient Kofi Annan, best-selling author and current Vice-President of the Advisory Committee to the UN Human Rights Council are only a few of Jean Ziegler's many roles.

With intimate access, we learn about

Ziegler's early activist career which developed into his worldwide battle against poverty and for economical independence of developing countries. In particular, the film focuses on Ziegler's relationship with Cuba and Che Guevara, who back in 1964 encouraged a then 30-year-old Ziegler to fight within the "brain of the capitalist Monster" (Geneva and its banking center).

Charismatic and controversial, Ziegler and his endless belief in socialism is the focus of this in-depth documentary, following him from his home in Geneva to a G-7 Summit in Munich to a trip to Cuba.

JOURNEY INTERRUPTED

In Journey Interrupted, five individuals share their personal stories of struggle with sexual identity in relation to how The Bible interprets their challenges. It is a comparative between gender identity and faith.

This 2017 documentary addresses two key questions:

What does the Bible say about gender identity and homosexuality;

How should Christians respond to these divisive issues?

These questions are explored with candor and sensitivity through the lens of personal testimony. This important film is refreshingly transparent, deeply honest as it offers hope for healing and wholeness through Jesus Christ.

MAN'S PLACE, A

By Coline Grando

"I've always liked to be in charge.

Suddenly, I wasn't in charge at all."

The film starts with an empty chair and a simple, monochromatic background. Over the next hour, five men ranging in age from their twenties to fifties sit in the chair and look into the camera—or deliberately away from it. They talk about unexpected pregnancies: how they reacted on learning a partner was pregnant, the complex feelings that arose, and the lasting effects on themselves, their partners, and their relationships.

One man is shocked to learn his girlfriend wants to keep the child, and she is equally shocked to realize he expects her to have an abortion. After a midlife crisis, a man feels conflicted when he learns his girlfriend is pregnant, just as the two are about to break up. And a young man who pressures his girlfriend to have an abortion—he thinks she's trying to stick him with raising someone else's baby—now feels guilty because he realizes how much she wanted the child. The film shifts among stories, never losing the thread of each as the men remember a pivotal period in their lives.

With *A MAN'S PLACE* filmmaker Coline Grando has deftly made an absorbing, intimate documentary on a politically polarizing subject. This is not a film about men's rights, nor does it in any way argue men should have a veto on what their partners decide. Instead, it interrogates the experiences of men, including their sometimes reprehensible actions towards their girlfriends. Grando is never on screen, but she is a presence in the film. We hear her asking probing questions, pushing her subjects to go deeper in their reflections. In one case, she questions a man's dismay that staff at a family planning clinic represented a "stereotypical feminism," in another she pointedly asks about the man's role in using contraception.

A MAN'S PLACE is a valuable film about abortion that manages to avoid the tired arguments of the abortion debate, while giving men an opportunity to talk about a subject many have never been able to discuss.

PISTOL 1: PRACTICAL FIREARMS & SHOOTING FUNDAMENTALS

Directed by Jorge Serra

In an era when the carrying and use of firearms is constantly being debated nationwide, safety training becomes of the utmost importance.

According to the Crime Prevention Research Center's 2016 report, there were over 14.5 million concealed handgun permits issued last year... the largest increase ever in the number of permits approved.

Colleges across the nation are offering Firearms Safety and Training courses, most notably in the states that have now authorized the carrying of concealed weapons on campuses. Westmoreland County Community College (PA), Glendale Community College (AZ), Yavapai College (AZ), Alvin Community College (TX), Northeast Wisconsin Technical College (WI), Gulf Coast State College (FL), Kilgore College (TX) are just a few that have coursework available as

part of their curriculum. But most colleges and universities don't offer such classes despite the rise in the number of concealed weapons permitted either on or around campuses.

Practical Firearms & Shooting Fundamentals is not another typical training video; it's an instructional training film that embeds you along with four students while they learn about firearms safety and how to improve their pistol shooting skills.

The film features a team of Law Enforcement, Firearms, and Security Professionals with over 50 years of experience who together share their vast knowledge. Included are former Navy SEAL JD Williamson, Julio Serra, Terry Bryson, Migda Casas, Jessica Linares, Danica Williamson, Bruce Jacobs, and Chris Velez.

RED SOUL, THE

By Jessica Gorter

Why do so many Russians still defend Joseph Stalin as a great leader and a hero? Is Stalin a hero who led the Soviet Union to victory, or should he be held responsible for the millions of victims who died during his reign?

The *Red Soul* lays bare the Russian psyche of today and shows a world full of contradictions. In a country where hardly any family escaped the hunger, fear and violence resulting from Stalin's reign of terror, no one has ever been convicted for the crimes committed under his regime. Even now, more than 50 years after Stalin's death, Russians remain deeply divided over how to deal with the memories of this painful past.

In a mosaic of intimate portraits, ordinary Russians—both young and old—speak openly about their traumas, rooted in a violent history. Tales of pain alternate with tales of pride. Nostalgic stories of a state flourishing under the Communist ideal contrast with painful memories of hunger, violence and betrayal. Not infrequently, these conflicting views can be found in one and the same person. Gradually, this intriguing film exposes how the Soviet past lives on in current generations, and thus makes its mark on the future.

SACRED WATER

By Olivier Jourdain

"If a lot of water flows, the town will be flooded. The water company can close down. We have all the water we need."
-Fanny, guest on Flash-FM in Rwanda

Vestine Dusabe is a radio host and sex educator with a mission: promoting sexual pleasure and preserving Rwanda's culture of female ejaculation.

SACRED WATER follows Dusabe as she takes calls on her late-night radio show (including one in which a woman has a very vocal orgasm), speaks to school-girls about ejaculation and female pleasure as central to Rwandan culture, and addresses a crowd on International Women's Day to discuss orgasms.

Rwandan legend has it that female ejaculation originates with an ancient queen who experienced earth-shaking orgasm while her husband was away at war, producing enough water to fill enormous Lake Kivu.

In SACRED WATER individual men and women, teenage girls, and couples discuss women's orgasms frankly, often with a strong dose of humour – a guest on Dusabe's radio show refers to the clitoris as "the Eiffel Tower." Women say men enjoy and expect them to ejaculate, and that "finding the water" guards against infidelity. Men see women's ejaculation as a sign of their prowess, and a way to make sure they are pleasuring their partners. A male doctor who has just met with a patient complaining that her water has dried up, compares good sexual skills to playing guitar, and the process of love-making to a soccer match: "You need fair play so both sides can score." Meanwhile, girls learn about the practice of *gukuna*—stretching the inner labia—and some wonder if it is a sin. (Not surprisingly, Dusabe has strong opinions on the subject.)

In interviews on the street, in couples' homes, and—perhaps most memorably—in a swimming hole, men and women share their thoughts and experiences with *kunyaza*. The filmmakers cleverly intersperse shots that are evocative but not explicit throughout the film: men straining as they row across a lake, water rushing over rocks, people jumping into a pool and engulfed in splashes, young men and women sweating as they work out in a gym.

SACRED WATER is a refreshing, fun, and honest documentary about sex, relationships, and the particularities of Rwandan sexual culture.

SILENTIUM: FROM LIFE IN THE CONVENT

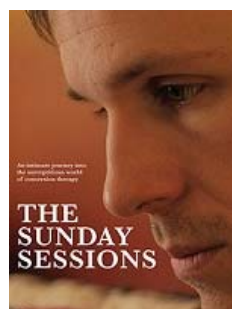

By Sobo Swobodnik

Four nuns, a formation director, twenty-six sheep and a convent. Seemingly far away from civilization at the edge of the Swabian Alps, the rules of St. Benedict are strictly observed here by the "Benedictine nuns of Our Dear Lady" as they have been for centuries. *Ora et labora* is the central guiding maxim, together with the ensuing question: How can God-fearing faith and open-minded convent life engage in symbiosis?

The film shows the ambivalence between the spirituality of the convent's tranquility on one hand and the secularity of modern convent life on the other.

SUNDAY SESSIONS, THE

Director: Richard Yeagley

The Sunday Sessions is an intimate portrait of one man's struggle to reconcile his religious conviction and sexual identity. The feature length documentary follows Nathan Gniewek, a gay man in his late twenties, as he seeks counseling from conversion therapist Christopher Doyle.

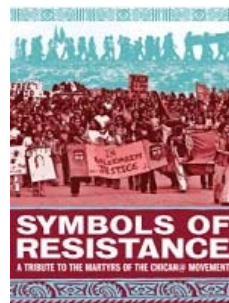

Conversion therapy is the controversial, non-scientifically based process which aims to convert an individual's sexual orientation from homosexual to heterosexual. Although it has been discredited by all major American medical, psychiatric, psychological and professional counseling organizations, some therapists still offer the service for reasons almost exclusively rooted in a conservative religious belief system.

The filmmakers had unfettered access to individual therapy sessions, family sessions, and a collection of weekend camps, and have crafted an emotional and psychological thriller which chronicles two years of Nathan's journey from acceptance to skepticism, all leading to a profound epiphany.

SYMBOLS OF RESISTANCE: A TRIBUTE TO THE MARTYRS OF THE CHICAN@ MOVEMENT

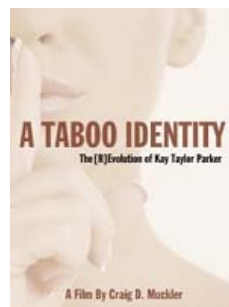

Symbols of Resistance illuminates the untold stories of the Chican@ Movement with a focus on events in Colorado and New Mexico. The film engages student activists, the effect of police repression, and how issues of identity, land, and community still resonate in the Chican@ struggles of today.

Through interviews with those who shaped the movement and rare historical footage, Symbols of Resistances offers a window into a dynamic moment in history and movement building.

Interviews include prominent Chicana leader Priscilla Falcon, activist lawyer Francisco "Kiko" Martinez, Mexican Liberation organizer Ricardo Romero, former director of El Pueblo History Museum Deborah Espinosa, and veteran reporter, photographer, and newspaper editor Juan Espinosa.

TABOO IDENTITY, A

By Craig Muckler

What happens if your past overshadows your present?

A Taboo Identity is a visual study in

personal branding and identity transformation in the modern era.

The film explores Kay Taylor Parker's journey from being a legend in the adult film industry to her current work as a metaphysical counselor. It addresses today's challenge of identity and the now common issue of past vs. present; a struggle faced many in our changing times. Along the way, Kay has had to come to terms with the conflict between her "porn star" identity and her identity as a spiritual teacher, healer, and guide. It is a journey in which Kay has discovered and rediscovered herself.

TOKYO IDOLS

By Kyoko Miyake

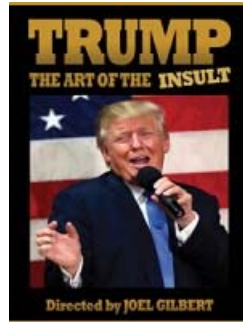

"IDOLS" has fast become a phenomenon in Japan as girl bands and pop music permeate Japanese life. TOKYO IDOLS—an eye-opening film gets at the heart of a cultural phenomenon driven by an obsession with young female sexuality and internet popularity.

This ever growing phenom is told through Rio, a bona fide "Tokyo Idol" who takes us on her journey toward fame. Now meet her "brothers": a group of adult middle aged male super fans (ages 35–50) who devote their lives to following her-in the virtual world and in real life. Once considered to be on the fringes of society, the "brothers" who gave up salaried jobs to pursue an interest in female idol culture have since blown up and have now become mainstream via the internet, illuminating the growing disconnect between men and women in hypermodern societies.

With her provocative look into the Japanese pop music industry and its focus on traditional beauty ideals, filmmaker Kyoko Miyake confronts the nature of gender power dynamics at work. As the female idols become younger and younger, Miyake offers a critique on the veil of internet fame and the new terms of engagement that are now playing out IRL around the globe.

TRUMP: THE ART OF THE INSULT

By Joel Gilbert

Donald Trump used his special brand of the Art of the Insult to attack opponents and bash the media all the way to the White House in 2016. He continues to master the art with ongoing fine-tuning from the podium, his office and of course on Twitter.

While critics insisted "The Donald" was merely a chaotic sideshow, Trump continues to dominate the 24-hour news cycle with a master plan of political incorrectness. Hurling insults like Low-Energy Jeb, Lyin' Ted, Crooked Hillary, Little Marco, Pocahontas, and Fake News, Trump has emerged as an unstoppable political phenomenon who has transformed the Presidential voice into the greatest show on earth.

Trump: The Art of the Insult tells the story of Donald Trump's improbable journey from Trump Tower to rallies across America to the debate stage, where he reveled in mocking and taunting rivals with targeted insults and nicknames, leaving them gasping for air. As President of the US, he continues the trend.

In Trump: The Art of the Insult, the President is often sophomoric and sometimes brutal, yet America seems to always find him entertaining. Love or hate Donald Trump, you'll find yourself laughing along with the leader of the free world, and marveling at Trump.

Is "the Real Donald Trump" a marketing genius and accomplished performance artist or....?

WHEN BANANA RULED

By Mathilde Damoiseil

Bananas are everywhere: Americans eat nearly 10 billion of them per year, consuming more pounds of bananas than apples and oranges combined.

WHEN BANANA RULED tells the story of the men who made bananas the most ubiquitous fruit in the world, through a multinational empire that dominated production and sales, overthrew governments, and created a business model still largely used by today's tech

giants.

The story of bananas as commodities begins with a failed railway project started in Costa Rica in 1871, led by American Minor Cooper Keith. When the Costa Rican government defaulted on its payments to Keith for its construction, the businessman faced ruin. His salvation? Bananas. Keith would go on to co-found the United Fruit Company and within decades—after a concerted campaign led by the father of public relations, Edward Bernays—bananas became a staple of the North American diet. Animated mascot Miss Chiquita Banana was a pop culture icon, doctors recommended bananas as an ideal food for children, and bananas popped up in movies and Broadway musicals.

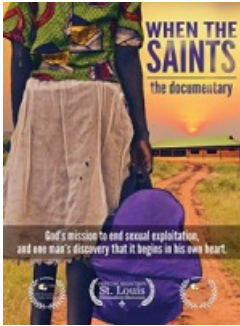

But, as WHEN BANANA RULED documents, the entire enterprise was built on a rapacious, imperialist business model that required the domination of countries including Guatemala, Honduras, and Colombia. United Fruit took over critical national infrastructure like railways and ports, rapidly expanded plantations by displacing small (often Indigenous) farmers, bought itself favorable legislation, and, like today's largest companies, sheltered profits offshore to avoid taxes.

Life on the plantations was a world within a world: A strict hierarchy with white managers from the best business schools, foremen from the US South (recruited for their knowledge of slavery), and black laborers paid largely in company food coupons and strictly forbidden to unionize. When a new, revolutionary government was formed in Guatemala, United Fruit's plantations were nationalized. What happened next came straight from the playbook that would dominate US foreign policy in the region: claim a Communist threat, persuade legislators back home of its dangers, bomb the country, and install a new, pro-American and pro-business regime.

Using a rich trove of archival footage and documents, including letters to and from lobbyists, telegrams, vintage ads and movie clips, and gorgeous, hand-tinted stills, WHEN BANANA RULED is a story of intrigue that touches on economics, international politics, the history of multinational business and reveals how an array of forces conquered the world through a simple fruit.

WHEN THE SAINTS

By Dan Parris

When the Saints documents one young man's mission to end sexual exploitation in the African nation of Malawi (the small nation tucked between Zambia and Mozambique). It is a journey of discovery that begins in his own heart.

The film calls upon all of us to care about justice for girls trafficked in rural Africa, and additionally examines the ways that lust, personal impurity, pornography, and distorted views about romantic relationships serve to feed the problem. At the same time it asks us to personally examine the ways we either dignify or exploit our brothers and sisters.

When the Saints is a thought-provoking and powerful tool to rally our awareness of this truly world-wide issue. Beautiful, honest, vulnerable, and wildly compelling, this story challenges us all to explore the unplumbed depths of our hearts

WHITE RIGHT: MEETING THE ENEMY

By Deeyah Khan

In this BAFTA-nominated documentary, Emmy and Peabody Award-winning Muslim filmmaker Deeyah Khan meets U.S. neo-Nazis and white nationalists face to face and attends America's far right rally in Charlottesville. Khan, who has received death threats in the past after advocating for diversity and multiculturalism in an interview on the BBC, seeks to understand the personal and political reasons behind the violent ideology and apparent resurgence of far right extremism in the

U.S.

Speaking with fascists, racists and proponents of alt-right ideologies Deeyah attempts to discover new possibilities for connection and solutions. As she tries to see beyond the headlines to the human beings, her own prejudices are challenged and her tolerance is tested. When she finds herself in the middle of a race riot at the now-infamous Unite the Right march, Deeyah's safety is jeopardized. Can she find it within herself to try and befriend the fascists she meets?

With a U.S. president propagating anti-Muslim propaganda, the far-right gaining ground in German elections, hate crime rising in the UK, and divisive populist rhetoric infecting political and public discourse across western democracies, Deeyah Khan's WHITE RIGHT: MEETING THE ENEMY asks why.
