AGRICULTURE

FUTURE FOOD: BIG OR SMALL? (USA)

Directed by Alex Gabbay

What's the best method of growing food for a hungry population of 9.5 billion people: Big, or small?

In the USA alone there are approximately 5 million fewer farmers today than there were in the 1930s. Economies of scale suggests that bigger is better when it comes to feeding a hungry planet. But bigger often requires mechanization and compromise, such as new strains of E. coli bacteria and rising obesity. Often, big also requires growing the same crop varieties.

Many countries are realizing there is a price to "big" that's not factored in at the checkout counter and, as a consequence, a "small farmer" revolution is unfolding in many rich countries including the US. What's the best method of growing food for a hungry population of 9.5 billion people? Big, or small?

Review

- "Ideal for any class exploring sustainability or environmental policy." - Mary Christina Wood, Director, Environmental and Natural Resources Law Program, University of Oregon

Price : USD 195.00

FUTURE FOOD: FAT OR SKINNY? (INDIA)

Directed by Arjun Pandey

The people of India are faced with a choice: indulge in a Western-style fast food diet, or embrace healthy and indigenous alternatives.

Everyday, as India awakes, 1.2 billion people need to be fed. By 2050 it could be 1.7 billion. Half a billion small scale farmers supply most of India's food. Traditionally, Indians have eaten the healthy cuisine of India's 29 states, but as people move to the cities there's a growing demand for fast processed food, the so-called 'junk food' accused of causing obesity and chronic health problems.

Now India is a country on the edge of two possible futures: a future that's well fed and healthy; or a future with Western diets and Western obesity. With so many hungry people to feed, is it possible to eat in ways that are nutritionally and environmentally sustainable? What role do governments have to play in creating economic incentives for sustainable diets?

Review

- "Takes a complex global issue and presents it in an engaging and accessible way." - Dr. Jonathan Deutsch, Program Director, Culinary Arts and Food Science, Drexel University

Price : USD 195.00

FUTURE FOOD: FOOD OR FUEL? (KENYA)

Directed by Christine Kinyanjui

Kenyan farmer Moses Shaha journeys through the Tana Delta, where farmers are starting to grow jatropha, a biofuel crop.

While Africa is short of food, the world is running short of fuel. Until now the fuels that power prosperity have been mostly coal, oil and gas. But these fossil fuels can pollute, and are running short, whereas new technology means cars, even power grids, can run on fuels from crops like ethanol from corn or sugar cane. It's been estimated world demand for biofuels over 20 years will need an area one and a half times the size of Kenya.

Kenyan Farmer and campaigner Moses Shaha is cynical about biofuels. He journeys through the Tana Delta, where farmers are starting to grow jatropha, a biofuel crop, to understand if it is a threat to farming land and food security as he fears, or if biofuels can in fact inspire innovation and help the environment long-term.

Review

- "Gives a fresh perspective on a phenomenon that has an enormous impact at the global level. Interesting and effective." - Fabio Parasecoli, Coordinator, Food Studies, The New School

Price : USD 195.00

FUTURE FOOD: NEAR OR FAR? (NIGERIA)

Directed by Remi Vaughan Richards

The Nigerian Minister for Agriculture wants to ensure Nigerians eat food grown in Nigeria.

The proponents of globalization suggest we buy our food from the cheapest sources, no matter where in the world that

might be. Now that food prices are rising again, countries rich and poor have begun to reconsider the price of imported food and many governments, from Brazil to Micronesia, are setting quotas in support of local food production.

Nigeria, the world's seventh most populous country, is one of the world's largest food importers. The charismatic Akinwunmi Ayo Adesina, Nigerian Minister for Agriculture, believes it is his job to ensure Nigerians eat food grown in Nigeria. Experts say the Minister's plans could be a model for other African nations. But do people really want to eat only food grown at home? What impact do food policies have on the local economy and local diets? And in a globalized world, is self-sufficiency really the answer?

Review

- "Watch Near or Far? And see the model for accelerated African food production." - Per Pinstrup-Andersen, Professor Emeritus, Food, Nutrition and Public Policy, Cornell University,

Price : USD 195.00

FUTURE FOOD: OLD OR NEW? (PERU)

Directed by Ernesto Cabello

In Lima, Peru, a new generation of top chefs are cooking with traditional ingredients and supporting traditional livelihoods.

The very future of food -- and farming -- is being re-imagined in a city where nobody dined out 20 years ago, where there is no national tradition of gastronomy, and where there is considerable malnutrition. But in the capital of Peru, a city not so long ago wracked by Shining Path terrorist violence, the top chefs -- men and women like Gaston Acurio, Javier Wong and Pedro Miguel Schiaffino -- believe gastronomy can achieve social justice.

Can this model really meet the challenge of providing enough food for 9.5 billion people by 2050? Scientists at Lima's agricultural university say we just can't afford to ignore the new models of industrial agriculture in favor of traditional methods. Is there room in the mix for the old and the new?

Review

- "Highlights the crucial issue of the contrast between local, sustainable, community-based agriculture and high-yield industrialized techniques." - Fabio Parasecoli, Coordinator, Food Studies, The New School,

FUTURE FOOD: STAY OR GO? (CHINA)

Directed by Alex Gabbay

Who will grow China's food as young people leave the countryside for the cities?

In many remote areas of China young people have little choice but to stay on the land, and yet they may face a destitute future, with millions of farmworkers in China earning less than two dollars a day. Although there are some exceptions, farming is not generally seen as a "sexy" career choice.

The reality is that in China and around the world, young people are fleeing the countryside and moving to the big cities. Who will grow the food that feeds future generations? How can young people be convinced that farming is a good option? Californian-born Rand and his wife Sherry are the founders of Resonance China, a social media agency in Shanghai. They use the internet to create and identify trends and tricks that can create a buzz for global brands. FUTURE FOOD sets Resonance a task: can they make farming popular with young people?

Review

AMERICAN STUDIES

BLACK FATHERHOOD PROJECT, THE

By Jordan Thierry

In The Black Fatherhood Project, filmmaker Jordan Thierry leads viewers through an honest and essential exploration of fatherhood in Black America, providing historical context and conversation for an issue at the core of the Black experience today.

Nationwide, 67 percent of Black children

live in single-parent families, predominantly with their mother, a ratio that has tripled since the 1960's.

In the first half of the film, Thierry begins by telling his own family story, then with the help of historians and others, traces the roots of the fatherless Black home, revealing a history much more complex and profound than is commonly known. The film digs deep to explore how Black families functioned in Africa before slavery, and how slavery, racism, and other recent challenges such as mass incarceration affect Black fatherhood. It looks beyond major historical events and discusses their psychological impacts, and calls into question traditional family roles and cultural adaptation.

In the second half of the film, Thierry puts that history into contemporary perspective in a candid dialogue among a diverse group of Black fathers. These dads talk openly about their experiences and the value systems they employ to raise their own families. Their stories serve as positive role models for inspiring other dads to help break the cycle of fatherless families. Thierry closes the film by sharing insights and solutions to ensure the power of a father's love is not lost on America's Black children.

FEATURED IN THE FILM

- Dr. Wade Nobles, Professor Emeritus, Department of Africana Studies, San Francisco State University
- Dr. Charles Lewis, President of Congressional Research Institute, Social Work and Policy and Adjunct Professor, Howard University School of Social Work
- Dr. Donald Roe, Associate Professor of History, Howard University
- Dr. Ronald B. Mincy, Maurice V. Russell Professor of Social Policy and Social Work Practice, Columbia University School of Social Work

Reviews

- "The Black Fatherhood Project is an amazing film. I'm especially impressed by the way it conceptualizes history and offers personal narrative. The information is timely, relevant, and is critical for addressing fatherhood in the African-American community." - Prof. Akil Houston, PhD, Department of African American Studies, Ohio University
- "This film is an important contribution to the true image of Black fathers in America The film captures eloquently the challenges, struggles, triumphs, hopes and dreams of African American men." - Dr. Joseph White, Professor Emeritus of Psychology and Psychiatry, University of California, Irvine; pioneer of the field of Black Psychology
- "Exceptionally well done.... Addresses the impact of the history of Africa, slavery and institutional racism upon the African-American family today." - Kenneth Yarnell, Principal, Aloha High School, Oregon

MEN AT LUNCH

Director: Sean O Cualain

New York City, 1932. The country is in the throes of the Great Depression, the previous decade's boom of Italian, Irish, and Jewish immigrants has led to unprecedented urban expansion, and in the midst of an unseasonably warm autumn, steelworkers risk life and limb building skyscrapers high above the streets of Manhattan.

In Men at Lunch, director Sean O Cualain tells the story of "Lunch atop a Skyscraper", the iconic photograph taken during the construction of the GE Building that depicts eleven workmen taking their lunch break while casually perched along a steel girder - boots dangling 850 feet above the sidewalk of 41st Street. This documentary takes the audience into the archival halls of Rockefeller Center and the Corbis collection to reveal never-before-seen artifacts from the news outlets of the Great Depression.

Part homage, part historical investigation, Men at Lunch is the revealing tale of an American icon, an unprecedented race to the sky and the immigrant workers that built New York. For 80 years, the identity of the eleven men - and the photographer that immortalized them - remained a mystery: their stories, lost in time, subsumed by the fame of the image itself.

Reviews

- "'Men at Lunch' is infectiously and unabashedly uplifting as it celebrates the American immigrant experience... placing those laborers and the products of their labor in a vividly evoked historical context." - Variety
- "The documentary invites the viewer to meditate on that moment. 'Men at Lunch' solves some of the puzzle created during a New York autumn when Babe Ruth's Yankees were winning the World Series and Franklin Delano Roosevelt was winning the presidency." - The New York Times

SHADOWS OF LIBERTY

Directed by Jean-Philippe Tremblay

Uses shocking examples of cover-ups and censorship by the US media to show how a few mega corporations exercise control over the content of our news.

SHADOWS OF LIBERTY examines how the US media are controlled by a handful of corporations exercising extraordinary political, social, and economic power. Having always allowed broadcasting to be controlled by commercial interests, the loosening of media ownership regulations, that began under Reagan and continued under Clinton, has led to the current situation where five mega corporations control the vast majority of the media in the United States. These companies not only don't prioritize investigative journalism, but can and do clamp down on it when their interests are threatened.

The film begins with three journalists whose careers were destroyed because of the stories they broke: Roberta Baskin, whose scoop about Nike sweatshops didn't sit well with CBS when Nike became a co-sponsor of the Olympics; Kristina Borjesson, another CBS reporter, whose job lasted precisely one week after the network spiked her investigation into the TWA Flight 800 disaster in 1996; and Gary Webb, whose story linking US support for Nicaraguan Contras and the epidemic in crack cocaine was trashed by The New York Times and the Washington Post. (His story was true, but Webb lost his job and eventually killed himself.)

With the help of interviewees including Daniel Ellsberg, Dan Rather, Julian Assange, Chris Hedges, Dick Gregory, Robert McChesney, John Nichols and Amy Goodman, the film explores in depth the monopolies and vested interests that filter the dissemination of information thus damaging the democratic process. One notorious example, featured in the film, of the anti-democratic nexus between the military-industrial complex and the news media was the latter's unquestioning acceptance of the former's trumped up justification for the Iraq War.

With profits taking priority over the truth and the powerful being taken at their word rather than taken to task, the film asks whether the Internet can withstand corporate pressure and remain free, or will it too fall into the hands of monopolistic corporations.

Ultimately has our commercial world caused us to lose one of the most precious commodities of all—unbiased information?

Reviews

- "A brilliant, riveting and deeply disturbing insight into corporate control of American media and American public opinion." Geoffrey R. Stone, Professor of Law, University of Chicago
- "The timing couldn't be better for a theatrical documentary about a corporate media monopoly in American journalism." - Etan Vlessing, Hollywood Reporter
- "Deals with one of the most critical issues of today...A masterpiece of craftsmanship." - Jakub Patocka, Denik Referebbum

ANIMALS / ANIMAL BEHAVIOR / ANIMAL RIGHTS

BAT CITY, USA

By Laura Brooks

Bat City USA is a compelling documentary about how a city overcame its fear of one of the world's most misunderstood creatures and now heartily embraces them, largely thanks to the efforts of one man.

A giant colony of Mexican Free-tailed bats moved into an Austin, Texas bridge in the 1980's after a reconstruction project created an ideal roosting habitat. The "bat invasion" launched a media hoopla and alarm among residents worried about bat attacks and rabies. When the city threatened to exterminate the bats, a zealous conservationist named Merlin Tuttle stepped in and fought to save them. Tuttle, a bat researcher at a Milwaukee museum, moved to Austin, which he called the epicenter of "worldwide bad bat publicity", and founded Bat Conservation International to promote a positive image of bats.

To overcome local opposition, he worked tirelessly to change public perception of the bats—from scary disease carriers to desirable creatures who help keep moths and mosquitoes in check, among other environmental benefits. As a pioneering bat photographer whose images were published in National Geographic, Tuttle used his striking photos as one important weapon in his battle for the bats.

Thanks to Tuttle's efforts, Austin now loves its bats. Thousands of tourists annually are drawn to the downtown setting for a fascinating, close-up glimpse of the world's largest urban bat colony – nearly one million bats.

Reviews

- "Laura Brooks has created a compelling, richly informative film – every bit as rare and wondrous as the flying mammals that fill its frames." - Doug Kreutz, Environmental Reporter, Tucson, AZ
- "Bat City, USA is the story of a gifted and passionate scientist who overcame ridicule and rejection to single-handedly save a city's huge bat colony. In doing so, he transformed the city's perception of the bat from a menace to a beloved icon." - John Kerr, Writer, Austin, TX

Item no. : TW01920202
Format : DVD (Closed Captioned)
Duration : 37 minutes
Audience : Grades 7-Adult

Price : USD 149.00

ANTHROPOLOGY

HERE.US.NOW.

By Rudy Poe

Here.U.S.Now. chronicles one family's determined fight to transform the medical research system in order to speed drug discoveries for treating chronic and debilitating rare diseases, which are more commonplace than is widely known.

Directed by Emmy award-winning filmmaker Rudy Poe, the film follows the story of Hugh and Chris Hempel, whose twin eight-year old daughters are dying from a rare progressive neurological disease called Niemann Pick Type C, with no known cure. Despite their lack of medical background, the Hempels use their entrepreneurial skills to seek a breakthrough drug treatment. As the devastating effects of the disease begin to take hold, the Hempels enter a complex and challenging world of medical literature, clinical trials and regulatory mazes, where new drug discoveries and approval are slow and often ineffective.

The Hempel family's journey also reveals the grim truth that "rare diseases" are actually widespread – affecting 30 million Americans, nearly 1 in 10, and 350 million people worldwide. Yet, only 200 of the estimated 7,000 known rare diseases have FDA-approved drug treatments.

Here.U.S.Now. advocates for a new model that accelerates the search for medical breakthroughs. The film encourages creative entrepreneurs to connect with patients, parents, advocacy networks, reform-minded physicians, and scientists to develop a better approach.

Industry leaders featured in the film include: Chris Austin, MD, director of the National Center for Advancing Translational Sciences (NCATS) at the National Institutes of Health; Debi Brooks, co-founder, The Michael J. Fox Foundation; Susan Love, MD, president, Dr. Susan Love Research Foundation; and Scott Johnson, President, CEO and Founder, Myelin Repair Foundation.

Reviews

- "Beautiful, eloquent, and thoughtful... The current way we do research... is too slow and outdated. This film will hopefully inspire thoughtful discussion." - Rare Disease Report
- "With little drug development happening in the rare disease arena, it's going to take more entrepreneurial focused parents like the Hempels to step in and get directly involved in advancing drug treatments to save their loved ones." - Nicole Boice,

President, Global Genes, R.A.R.E

ARCHITECTURE

LOST RIVERS

By Caroline Bacle

Nearly every major city was built near the convergence of many rivers. As cities grew with the Industrial Revolution, these rivers became conduits for disease and pollution. The 19th-century solution was to bury them underground and merge them with the sewer systems. These rivers still run through today's metropolises, but they do so out of sight.

LOST RIVERS examines hidden waterways in cities around the world and introduces us to people dedicated to exploring and exposing them. In Montreal, urban explorer Danielle Plamondon and photographer Andrew Emond follow the stony underground tunnels that contain the Riviere Saint-Pierre. In Brescia, Italy, a group of urban explorers conduct popular, officially-sanctioned tours through the city's network of medieval rivers.

More and more municipal governments are recognizing the wisdom of these explorers and making their once-buried waterways more accessible. Drawing inspiration from Seoul, whose Cheonggyecheon River was opened to the public in the early 2000s after 40 years of being hidden beneath a highway, Yonkers, New York has committed itself to "daylighting" its Saw Mill River, which has been buried under the city's downtown for the past 90 years. In London and Toronto, planners are rethinking the way they manage their rivers for environmental reasons, responding to structural problems that have to increasingly frequent flooding and sewer overflows.

As climate changes forces us to reconsider the relationship between the built environment and our natural resources, LOST RIVERS brings to life an aspect of urban ecology that has long been kept secret.

Reviews

- "Important as well as inspiring" - Science Magazine
- "A fascinating look at the natural river systems that have long been buried and disrupted by urban development and what these waterways can do to make our cities more livable." - Jason Anderson, Toronto Star
- "Ultimately hopeful...LOST RIVERS reminds us of the value of the natural world, suggesting that that world is always just a few feet away, waiting to return." - NOW Toronto

ART

DESIGN IS ONE

Directos: Kathy Brew & Roberto Guerra

Italian-born Lella and Massimo Vignelli are among the world's most influential designers. Their contributions to the fields of industrial, graphic, and production design have resulted in iconic achievements in the development of corporate identity programs, home furnishing and interior design, architectural graphics, and publishing. Garnering international awards and recognition for over forty years, the Vignelli's have led the vanguard of innovative designers through their interdisciplinary mentorship. Throughout their career, their ambitious motto has been, "If you can't find it, design it."

In 1965 Massimo brought the Helvetica typeface to the United States. Igniting an interest in the Vignelli's work, this design development led to a series of notable projects: New York's subway signage and maps; the interior of Saint Peter's Church at Citicorp Center; Venini lamps; Heller dinnerware; furniture for Poltrona Frau; and branding initiatives for Knoll International, Bloomingdale's, Saks Fifth Avenue, Ford, and American Airlines.

Their work has covered such broad spectrum of industries and produced so many recognizable images that one could say the Vignellis have a distinct global identity, even though many do not recognize their names. Experts from the world of design including architects Richard Meier and Peter Eisenman, as well as graphic designers Milton Glaser, Michael Bierut, and Jessica Helfand, offer their anecdotes and memories of the Vignellis' work in Design is One. The film captures the Vignelli's intelligence and creativity, offering the audience intimate access into their everyday life and continuing work and a glimpse of their humanity, warmth and humor.

Reviews

- "A love letter about modern design and the Vignelli couple's 50-year marriage." - The Atlantic
- "To leave an indelible impact on a whole nation of people is an accomplishment perhaps no other husband and wife team can claim... the film capture(s) the often humorous and always insightful wisdom of design's first couple." - Dwell

ART AND DESIGN

INNOVATION LAB - THE ART OF DESIGN

This episode delves into the discussion of what distinguishes art and design? Most good design is firmly rooted in the art world. Often, professional designers are inspired and informed by work that is created through artistic endeavors. Modern mass production has made it nearly impossible to pinpoint the origin or inspiration for design of everyday objects. It is certain, however, that artistic innovation and creativity are essential to the advancement of quality design that not only serves a function but also satisfies the user on a more abstract and artistic level. One company that has mastered walking the fine line between art and design is Ammunition. In this episode we talk to their creative leaders as well as the executive in charge of Design at the MOMA in New York City.

ASTRONOMY & SPACE

ASTRONOMY - PROBING THE FIRST STARS & GALAXIES

Visible light, which can be seen with our eyes, comprises a small sliver of the electromagnetic spectrum. The rest of the spectrum, from short wavelength gamma rays to long-wavelength radio waves, requires special instruments to detect. ALMA uses an array of radio telescopes to detect and study radio waves from space. Radio telescopes are typically large parabolic dish antennas used singly or in an array. Radio observatories are preferentially located far from major centers of population to avoid electromagnetic interference (EMI) from radio, TV, radar, and other EMI emitting devices. This is similar to the locating of optical telescopes to avoid light pollution, with the difference being that radio observatories are often placed in valleys to further shield them from EMI as opposed to clear air mountain tops for optical observatories. ALMA is an advanced tool for studying very old stars and galaxies. These objects now are seen at great cosmic distances, with most of their light stretched out to millimeter and sub-millimeter wavelengths by the expansion of the universe. ALMA provides the unprecedented ability to study the processes of star and planet formation. Unimpeded by the dust that obscures visible-light observations, ALMA will be able to reveal the details of young, still-forming stars, and is expected to show young planets still in the process of

developing. In addition, ALMA will allow scientists to learn in detail about the complex chemistry of the giant clouds of gas and dust that spawn stars and planetary systems.

RADIO ASTRONOMY - THE ALMA TELESCOPE

The Atacama large Millimeter/Sub-millimeter Array, or ALMA, is a vast array of radio telescopes and the most powerful observatory of its kind. ALMA is stationed in the Atacama Desert of Chile which is one of the worlds best sites for observational astronomy because of the high altitude, nearly non-existent cloud cover, dry air and lack of light pollution and radio interference due to the small populations. ALMA peers into previously hidden regions of space with unprecedented sharpness and sensitivity.

BIOGRAPHIES/PROFILES

IN SEARCH OF BLIND JOE DEATH: THE SAGA OF JOHN FAHEY

Director: James Cullingham

Known as the father of American Primitive Guitar, many consider John Fahey to be a foundational figure in American folk music. As both musician and musicologist, Fahey made a fundamental contribution to our understanding and appreciation of such music genres as Delta blues, Appalachian bluegrass and New Orleans jazz. In Search of Blind Joe Death combines interviews, performances and archival footage with animation in a kinetic, musically charged tribute to a tremendously influential composer, guitarist, author and provocateur. Interviewees include Pete Townshend, Joey Burns of Calexico, Chris Funk of The Decemberists and renowned radio personality Dr. Demento, aka Barry Hansen.

Review

- "In Search of Blind Joe Death is an excellent introduction to one of the key musicians of his time. Newcomers and fans alike will find a lot to treasure here." - Film Journal

BUSINESS

INNOVATION LAB - CONNECTING PEOPLE

Meet the founders of two startups created with the purpose of making life easier for business and people with the help of virtual technology innovation. Dan Greenberg is the founder of Sharethrough, a company that helps brands make their videos go viral on the web. Phil Libin has started Evernote, a mobile application that helps people remember and keep track of everything going on in their lives.

INNOVATION LAB - DESIGNED AND AUGMENTED REALITY

This episode of Innovation Lab focuses on learning more about the latest trends in artificial intelligence and augmented reality. We take a closer look at two of the top companies in this field: Dekko and Affectiva. Dekko is a company that is building a disruptive high-tech platform that intends to synthesize the online world and the real world. Affectiva is a startup that uses technology to transform products, processes and lives by providing automated emotion measurement.

INNOVATION LAB - EMOTIONS AND MEMORIES

Jamie Wong and Anthony Marinos: Meet two young professionals whose objective is to find the perfect match for people's needs when traveling and working. Through their innovative companies: Vayable and Loosecubes they have harnessed the power of community to provide unique travel experiences to consumers as well as to efficiently provide office space to smaller companies that need it but may not be able to afford it. We learn the importance of community building and how important the endorsement of a community user is to build good faith in these kinds of systems.

INNOVATION LAB - ENTREPRENEURS

Meet two of the most successful entrepreneurs in the food industry today. Gary Vaynerchuck and Tim McCollu stood out for having challenged the rules of how to produce, market and sell two historically traditional products: wine and chocolate. These two entrepreneurs saw a gap in an already consolidated market and took big chances to build their businesses. McCollu's Madecasse Chocolates are manufactured in Madagascar and feature a completely self-contained production chain that relies heavily on local farmers and workers. Vaynerchuck has grown his family's wine business through aggressive social media strategies.

INNOVATION LAB - HIGH TECH

A great deal of today's modern technology exists due to the extensive use of the abundant chemical element, Silicon. California's Silicon Valley is where we find several of the world's most innovative and successful technology companies that touch all areas of human needs. Two of these companies, SunTech and Complete Genomics, are on the forefront of the innovative use of computing technology. Through their groundbreaking methods and designs they have harnessed the computing power of the Silicon Valley and applied it to creating more efficient and effective solar power generators as well as cost effective and highly accurate human genome mapping techniques.

INNOVATION LAB - RECYCLING

HABITS/HEALTHY EATING

Recyclebank and Revolution Foods are two innovative companies that focus on rewarding people for taking ecological and healthy actions. These two companies are encouraging citizens to be actively engaged with good environmental and nutritional practices. The benefits created by these practices are considered

"win-win-win". This means that consumers and government save money, build community, and also earn long-term health benefits.

INNOVATION LAB - THE ART OF DESIGN

This episode delves into the discussion of what distinguishes art and design? Most good design is firmly rooted in the art world. Often, professional designers are inspired and informed by work that is created through artistic endeavors. Modern mass production has made it nearly impossible to pinpoint the origin or inspiration for design of everyday objects. It is certain, however, that artistic innovation and creativity are essential to the advancement of quality design that not only serves a function but also satisfies the user on a more abstract and artistic level. One company that has mastered walking the fine line between art and design is Ammunition. In this episode we talk to their creative leaders as well as the executive in charge of Design at the MOMA in New York City.

INNOVATION LAB - THE GOOGLERS

In this episode featuring Google, we get to know some of the secrets behind this innovation machine. We speak with several of the executives from Google that are based all around the world. Their thoughts, values and strategies behind the challenge of winning the technology battle are explored. We learn how though their creative risks in growing the company as well as the creative environment established by founders Larry Page and Sergey Brin, Google has become the top online search engine in the world.

INNOVATION LAB - THE SHARING ECONOMY

The Mesh, Collaborative Consumption, The Sharing Economy. These are important social trends that are at the forefront of many socially and ecologically

responsible companies today. The principles of sharing and redistribution are powerful trends that do not just include manufactured goods but also commodities like specialized skills and free time. Benefits of these innovative approaches to business include: lower costs, less waste and the creation of global communities with neighborly values. In this episode we meet the founders of two companies that have put these collaborative values into practice: Task Rabbit and Relay Rides.

CHEMISTRY

CHEMISTRY - PERIODIC TABLE OF ELEMENTS

Chemistry has an impact on every aspect of our daily lives. The most important chemistry reference is the Periodic Table of the Elements. By providing a logical, mathematical method of organization, the table has become a critical tool for students, teachers and scientists around the globe. This program explores the discoveries that led up to the organization of the periodic table and how it is presently organized. It introduces and explores several elements (Hydrogen and Titanium) and their effect on our daily lives and the environments in which they occur.

CHEMISTRY - PERIODIC TABLE OF ELEMENTS: POTASSIUM (K) AND MAGNESIUM (MG)

The Periodic Table is organized with elements specified in rows, or periods, according to increasing atomic number. Metals are on the left of the periodic table, while nonmetals are located on the right. Some in the middle are called metalloids because they have characteristics of both metals and nonmetals. The periodic table is purposely arranged into vertical classifications called groups. Columns of elements help define element groups. Some of the notable groups of elements include the noble gases (column 18), the halogens (column 17), the alkali metals (column 1) and the alkaline earth metals (column 2). The transition metals are located in the center of the periodic table. They include many of the common metals, such as copper, iron, silver and gold. The two rows below the main body of the table are called the lanthanide and actinide series. They include the very heavy metallic elements, such as uranium and plutonium. This program goes in depth regarding the elements potassium (K) and magnesium (Mg) and their roles in the health of the human body. Potassium helps to control the proper balance of fluids in cells, helps with the contraction of muscles, and is involved in the transmission of chemical messages between nerve cells. Potassium aids in digestion of food, and in the proper function of the eyes. Magnesium is needed for more than 300 biochemical reactions in the body. It helps maintain normal muscle and nerve function, keeps heart rhythm steady, supports a healthy immune system, and keeps bones strong.

CHILDREN & YOUTH

BLACK FATHERHOOD PROJECT, THE

By Jordan Thierry

In The Black Fatherhood Project, filmmaker Jordan Thierry leads viewers through an honest and essential exploration of fatherhood in Black America, providing historical context and conversation for an issue at the core of the Black experience today.

Nationwide, 67 percent of Black children live in single-parent families, predominantly with their mother, a ratio that has tripled since the 1960's.

In the first half of the film, Thierry begins by telling his own family story, then with the help of historians and others, traces the roots of the fatherless Black home,

revealing a history much more complex and profound than is commonly known. The film digs deep to explore how Black families functioned in Africa before slavery, and how slavery, racism, and other recent challenges such as mass incarceration affect Black fatherhood. It looks beyond major historical events and discusses their psychological impacts, and calls into question traditional family roles and cultural adaptation.

In the second half of the film, Thierry puts that history into contemporary perspective in a candid dialogue among a diverse group of Black fathers. These dads talk openly about their experiences and the value systems they employ to raise their own families. Their stories serve as positive role models for inspiring other dads to help break the cycle of fatherless families. Thierry closes the film by sharing insights and solutions to ensure the power of a father's love is not lost on America's Black children.

FEATURED IN THE FILM

- Dr. Wade Nobles, Professor Emeritus, Department of Africana Studies, San Francisco State University
- Dr. Charles Lewis, President of Congressional Research Institute, Social Work and Policy and Adjunct Professor, Howard University School of Social Work
- Dr. Donald Roe, Associate Professor of History, Howard University
- Dr. Ronald B. Mincy, Maurice V. Russell Professor of Social Policy and Social Work Practice, Columbia University School of Social Work

Reviews

- "The Black Fatherhood Project is an amazing film. I'm especially impressed by the way it conceptualizes history and offers personal narrative. The information is timely, relevant, and is critical for addressing fatherhood in the African-American community." - Prof. Akil Houston, PhD, Department of African American Studies, Ohio University
- "This film is an important contribution to the true image of Black fathers in America . . . The film captures eloquently the challenges, struggles, triumphs, hopes and dreams of African American men." - Dr. Joseph White, Professor Emeritus of Psychology and Psychiatry, University of California, Irvine; pioneer of the field of Black Psychology
- "Exceptionally well done.... Addresses the impact of the history of Africa, slavery and institutional racism upon the African-American family today." - Kenneth Yarnell, Principal, Aloha High School, Oregon

CLIMATE CHANGE

CARBON RUSH, THE

By Amy Miller

Narrated by Daryl Hannah

THE CARBON RUSH travels across four continents to investigate the true cost of carbon emissions trading. Are carbon offset projects significantly reducing CO2 emissions, or are they distracting from what is really required to tackle the climate crisis?

To date, there has been over \$300 billion of carbon transactions worldwide through over 5,000 registered projects. Instead of focusing resources to move away from a fossil fuel economy, massive international trading ventures were established as the solution to climate change, nicknamed "green gold" by its beneficiaries.

This ground-breaking documentary examines how carbon trading works as established through the United Nations' Clean Development Mechanism (CDM) as part of the Kyoto Protocol.

The film tours a variety of carbon offset projects around the world, visiting people on the front lines of carbon trading. Their stories and voices have been little-heard as part of the multi-billion dollar carbon trading industry. In Panama, indigenous rain forest dwellers are losing their way of life. In India, waste pickers at landfills can no longer support themselves. And in Honduras, dozens of Campesinos have been assassinated.

THE CARBON RUSH raises fundamental questions about what happens when we attempt to manipulate markets to solve the climate crisis, including who stands to gain and who stands to lose.

Reviews

- "The documentary is filled with shockingly corrupt examples ... and sheds light on the state of environmental concern on the corporate level, without being overly alarmist." - THE CONCORDIAN
- "This one will get you boiling. It shows again how we are shipping our climate change problems out of our sight. Big companies are buying carbon credits, which allow them to keep on emitting as much CO2 as always by supporting projects that reduce emissions in third world countries. Or so they say." - THE VANCOUVER OBSERVER
- "The Carbon Rush, exposes the offset projects that are impacting developing countries and their communities so that other nations can continue their industries relatively unchecked.." - THE SOURCE

IDLE THREAT

By George Pakenham

Idling engines consume more than 6 billion gallons of gasoline annually in the U.S., a significant but little-known contributor to local air pollution, respiratory disease and global climate change.

Idle Threat is a lively look at one man's spirited struggle to improve public health by raising awareness about idling's impact, starting in New York City. Against all odds, he succeeds, helping improve local air quality, and in the process gains world-wide recognition for the anti-idling cause, with articles featured in the Wall Street Journal, New Yorker magazine, and the Financial Times.

In white shirt and tie, Wall Street banker George Pakenham has walked the streets of New York for over five years, courteously confronting over 3,000 motorists to explain idling's impact and the law prohibiting running a parked vehicle for more than a short time. Responses vary from thanks to anger, but Pakenham never wavers. He's determined that the problems idling poses be recognized, and lobbies successfully for the city to enforce its idling laws.

Featuring Click and Clack from NPR's Car Talk, and Mayor Michael Bloomberg, Idle Threat profiles one man's challenging quest to make his city and the world a healthier place, and shows that sometimes one person – and a simple act like turning a key – can make a big difference.

Reviews

- "In an engaging and informative approach to a serious environmental issue, Idle Threat tells the story of effective citizen engagement and impact." - Holly Wise, Virginia Tech Center for Leadership in Global Sustainability
- "In the vein of Michael Moore's cinema verite, Pakenham becomes our man on the street accosting idlers who pollute the streets of NYC with their vehicles' exhaust. The film manages to make you realize the deadly dangers present at the same time it makes you laugh out loud." - Prof. Cathleen Miller, San Jose State University, author of Champion of Choice
- "An entertaining and informative ride that shows how citizens who care can make a difference." - Marc Norman, Director of UPSTATE, Syracuse University School of Architecture

CUSTOMER SERVICE

WHAT'S THE SECRET IN PROVIDING A WORLD-CLASS CUSTOMER EXPERIENCE

By John DiJulius

What's the Secret in Providing a World-Class Customer Experience discusses what health/fitness clubs can do to raise the bar and set a high standard in customer service—at a level that consistently exceeds customer expectations. Featuring one of the leading authorities in the world on customer service, the DVD reviews several systems for delivering unforgettable customer service. The DVD also details how to create a world-class customer service organization.

Among the topics covered:
Service aptitude
Making price irrelevant
Customer service vision
What are you really selling?
Customer's Bill of Rights
Emotional connection
Secret service systems
World-class leadership

DANCE

TUTU MUCH

Director: Elise Swerhone

Tutu MUCH follows nine young ballet dancers as they plie, pirouette and compete for highly-coveted spots in an intensive four-week professional ballet summer program at the Royal Winnipeg Ballet School. Leaving behind their families and friends, often for the first time, each girl confronts the painstaking and sometimes rewarding realities of pursuing her dream of becoming a professional ballet dancer.

The daily classes are grueling tests of their physical stamina and emotional grit. "You've even got to love the pain," says twelve-year-old Sidnie, one of the prospective ballerinas. As the girls learn during the course of the auditions, talent and passion alone do not guarantee success: the success of a dancer often comes down to the shape of a foot or the length of the neck. In the last few days of the program the girls find out which of them will take the next step toward the

dream of becoming a professional ballerina, and which ones won't.

Review

- "A real and often shocking look into the life of young dancers trying to make it into the professional world of classical dance. It's full of excitement and disappointment, tears and laughter and hard decisions regarding years of sacrifice and pain and the limitations of one's anatomy. And it's all from the mouths of children." - See Magazine

DESIGN

DESIGN IS ONE

Directos: Kathy Brew & Roberto Guerra

Italian-born Lella and Massimo Vignelli are among the world's most influential designers. Their contributions to the fields of industrial, graphic, and production design have resulted in iconic achievements in the development of corporate identity programs, home furnishing and interior design, architectural graphics, and publishing. Garnering international awards and recognition for over forty years, the Vignelli's have led the vanguard of innovative designers through their interdisciplinary mentorship. Throughout their career, their ambitious motto has been, "If you can't find it, design it."

In 1965 Massimo brought the Helvetica typeface to the United States. Igniting an interest in the Vignelli's work, this design development led to a series of notable projects: New York's subway signage and maps; the interior of Saint Peter's Church at Citicorp Center; Venini lamps; Heller dinnerware; furniture for Poltrona Frau; and branding initiatives for Knoll International, Bloomingdale's, Saks Fifth Avenue, Ford, and American Airlines.

Their work has covered such broad spectrum of industries and produced so many recognizable images that one could say the Vignellis have a distinct global identity, even though many do not recognize their names. Experts from the world of design including architects Richard Meier and Peter Eisenman, as well as graphic designers Milton Glaser, Michael Bierut, and Jessica Helfand, offer their anecdotes and memories of the Vignellis' work in Design is One. The film captures the Vignelli's intelligence and creativity, offering the audience intimate access into their everyday life and continuing work and a glimpse of their humanity, warmth and humor.

Reviews

- "A love letter about modern design and the Vignelli couple's 50-year marriage." - The Atlantic

- "To leave an indelible impact on a whole nation of people is an accomplishment perhaps no other husband and wife team can claim... the film capture(s) the often humorous and always insightful wisdom of design's first couple." - Dwell

DOCUMENTARY

ANONYMOUS PEOPLE, THE

Director: Greg Williams

THE ANONYMOUS PEOPLE is a feature documentary film about the 23.5 million Americans living in long-term recovery from alcohol and other drug addiction. Deeply entrenched social stigma and mass participation in widely successful anonymous 12-step groups have kept recovery voices silent and faces hidden for decades. The vacuum created by this silence has been filled by sensational mass media depictions of addiction that continue to perpetuate a lurid public fascination with the dysfunctional side of what is a preventable and treatable health condition. Just like women with breast cancer, or people with HIV/AIDS, courageous addiction recovery advocates are starting to come out of the shadows to tell their true stories. The moving story of The Anonymous People will be told through the faces and voices of the leaders, volunteers, corporate executives, and celebrities who are laying it all on the line to save the lives of others just like them. This passionate new public recovery movement is fueling a changing conversation that aims to transform public opinion, and finally shift problematic policy toward lasting recovery solutions.

IN SEARCH OF BLIND JOE DEATH: THE SAGA OF JOHN FAHEY

Director: James Cullingham

Known as the father of American Primitive Guitar, many consider John Fahey to be a foundational figure in American folk music. As both musician and musicologist, Fahey made a fundamental contribution to our understanding and appreciation of such music genres as Delta blues, Appalachian bluegrass and New Orleans jazz. In Search of Blind Joe Death combines interviews, performances and archival footage with animation in a kinetic, musically charged tribute to a tremendously influential composer, guitarist, author and provocateur. Interviewees include Pete Townshend, Joey Burns of Calexico, Chris Funk of The Decemberists and renowned radio personality Dr. Demento, aka Barry Hansen.

Review

- "In Search of Blind Joe Death is an excellent introduction to one of the

key musicians of his time. Newcomers and fans alike will find a lot to treasure here." - Film Journal

MEN AT LUNCH

Director: Sean O Cualain

New York City, 1932. The country is in the throes of the Great Depression, the previous decade's boom of Italian, Irish, and Jewish immigrants has led to unprecedented urban expansion, and in the midst of an unseasonably warm autumn, steelworkers risk life and limb building skyscrapers high above the streets of Manhattan.

In Men at Lunch, director Sean O Cualain tells the story of "Lunch atop a Skyscraper", the iconic photograph taken during the construction of the GE Building that depicts eleven workmen taking their lunch break while casually perched along a steel girder - boots dangling 850 feet above the sidewalk of 41st Street. This documentary takes the audience into the archival halls of Rockefeller Center and the Corbis collection to reveal never-before-seen artifacts from the news outlets of the Great Depression.

Part homage, part historical investigation, Men at Lunch is the revealing tale of an American icon, an unprecedented race to the sky and the immigrant workers that built New York. For 80 years, the identity of the eleven men - and the photographer that immortalized them - remained a mystery: their stories, lost in time, subsumed by the fame of the image itself.

Reviews

- "'Men at Lunch' is infectiously and unabashedly uplifting as it celebrates the American immigrant experience... placing those laborers and the products of their labor in a vividly evoked historical context." - Variety
- "The documentary invites the viewer to meditate on that moment. 'Men at Lunch' solves some of the puzzle created during a New York autumn when Babe Ruth's Yankees were winning the World Series and Franklin Delano Roosevelt was winning the presidency." - The New York Times

PANDORA'S PROMISE

The atomic bomb and meltdowns like Fukushima have made nuclear power synonymous with global disaster. But what if we've got nuclear power wrong? PANDORA'S PROMISE asks whether the one technology we fear most could save our planet from a climate catastrophe, while providing the energy needed to lift billions of people in the developing world out of poverty. In his controversial new film, Stone tells the intensely personal stories of environmentalists and energy experts who have undergone a radical conversion from being fiercely anti to strongly pro-nuclear energy, risking their careers and reputations in the process. Stone exposes this controversy within the environmental movement head-on with stories of defection by heavy weights including Stewart Brand, Richard Rhodes, Gwyneth Cravens, Mark Lynas and Michael Shellenberger. Undaunted and fearlessly independent, PANDORA'S PROMISE is a landmark work that is forever changing the conversation about the myths and science behind this deeply emotional and polarizing issue.

TRIALS OF MUHAMMAD ALI, THE

Director: Bill Siegel

No conventional sports documentary, THE TRIALS OF MUHAMMAD ALI investigates its extraordinary and often complex subject's life outside the boxing ring. From joining the controversial Nation of Islam and changing his name from Cassius Clay to Muhammad Ali, to his refusal to serve in the Vietnam War in the name of protesting racial inequality, to his global humanitarian work, Muhammad Ali remains an inspiring and controversial figure. Outspoken and passionate in his beliefs, Ali found himself in the center of America's controversies over race, religion, and war.

DYNAMIC ECOSYSTEMS

CYCLES, THE: WATER, CARBON, NITROGEN, PHOSPHORUS

Change is a constant of life. The natural cycles that balance and regulate our Earth and atmosphere provide the necessary conditions for sustaining a diverse range of life forms on the planet. But what actually occurs in these cycles? The Cycles Collection looks at the critical role the carbon, nitrogen, phosphorous and water cycles play in the life of plants, animals, bacteria and our planet. This motion-graphics driven program simply yet clearly explains the key stages and processes of each cycle and why the cycles are so important to all life on our planet. An ideal resource for viewers seeking a scientific understanding of these cycles.

ECOLOGY

LAST CALL

Last Call examines the predictions and impact of one of the most important and controversial environmental books of all time, The Limits to Growth, published four decades ago.

In 1972, the publication of the book shook the world, selling 30 million copies in 30 languages, and marked a turning point in thinking about the environment. Prepared for the Club of Rome, the book was based on the work of a team of young scientists from MIT who created the first computer model to analyze the interaction over time of exponential growth with finite natural resources.

Their primary message was that the human footprint, if unchecked, would grow beyond the carrying capacity of the planet on a sustainable basis. They concluded that humanity must adapt to the planet's limits or risk overshoot, which could result in the collapse of global support systems and human decline. Their conclusions stimulated broad interest and significant debate, but not much action on their scenario for avoiding overshoot.

Four decades later, the surviving authors of The Limits to Growth and the book's mentors gathered to assess their earlier predictions, update where we stand today, and present what we need to do now to avoid global ecological collapse in the next few decades.

Supported by archival footage and other materials, Last Call provides provocative insights into the fundamental reasons behind the ongoing global ecological and economic crises, and a vision of a more hopeful future, if we commit to appropriate measures before it's too late.

FEATURED IN THE FILM

NATURES CHEMICAL WONDER - ACID CAVES EXPLORED

Deep in Southern Mexico's jungle, the Villa Luz limestone caves support an ecosystem that thrives in a highly poisonous, acidic environment. This rare type of cave is found in few spots on Earth. The Villa Luz, is known for the bacteria in its thermal sulphur springs that produce hydrogen sulfide gas. When the gases form bonds with oxygen, the result is sulfuric acid. The acid eats away at the cave walls, constantly altering the patterns in the cretaceous limestone. All life forms, from microbial colonies to spiders, fish and bats, are interdependent upon the toxic soup of water, sulphur-oxide and hydrogen monoxide for survival. Surprisingly, the caves are home to spiders, bats, and a unique fish species referred to as the Cave Molly. The caves are also well known for their snottites, which are mucous-like formations that resemble stalactites. Descending into the caves is very dangerous as there are potentially lethal levels of hydrogen sulfide gas. Researchers carefully plan expeditions into the caves to better understand these rare ecosystems and must wear respirators and protective clothing as they enter the cave system in their attempt to document and understand the deadly ecosystem.

ENDANGERED SPECIES / SPECIES DECLINE

BAT CITY, USA

By Laura Brooks

Bat City USA is a compelling documentary about how a city overcame its fear of one of the world's most misunderstood creatures and now heartily embraces them, largely thanks to the efforts of one man.

A giant colony of Mexican Free-tailed bats moved into an Austin, Texas bridge in the 1980's after a reconstruction project created an ideal roosting habitat. The "bat invasion" launched a media hoopla and alarm among residents worried about bat attacks and rabies. When the city threatened to exterminate the bats, a zealous conservationist named Merlin Tuttle stepped in and fought to save them. Tuttle, a bat researcher at a Milwaukee museum, moved to Austin, which he called

the epicenter of "worldwide bad bat publicity", and founded Bat Conservation International to promote a positive image of bats.

To overcome local opposition, he worked tirelessly to change public perception of the bats—from scary disease carriers to desirable creatures who help keep moths and mosquitos in check, among other environmental benefits. As a pioneering bat photographer whose images were published in National Geographic, Tuttle used his striking photos as one important weapon in his battle for the bats.

Thanks to Tuttle's efforts, Austin now loves its bats. Thousands of tourists annually are drawn to the downtown setting for a fascinating, close-up glimpse of the world's largest urban bat colony – nearly one million bats.

Reviews

- "Laura Brooks has created a compelling, richly informative film – every bit as rare and wondrous as the flying mammals that fill its frames." - Doug Kreutz, Environmental Reporter, Tucson, AZ
- "Bat City, USA is the story of a gifted and passionate scientist who overcame ridicule and rejection to single-handedly save a city's huge bat colony. In doing so, he transformed the city's perception of the bat from a menace to a beloved icon." - John Kerr, Writer, Austin, TX

ENGINEERING

ELECTRONICS - ENVIRONMENTAL APPLICATIONS

This program examines how electronics systems monitor the environment to help scientists influence certain weather conditions and understand the impact on humans and animals in a variety of scenarios. One example is the unique electronic systems developed to regulate humidity and temperature in a biome designed to emulate the Amazon Rainforest. With advancements in science and engineering, not only can we predict and limit the impact of environmental disasters, but we can imitate nature itself. Flooding is a natural disaster that affects people all over the world. Electronic river management systems are being put in place so potential flooding can be identified and possibly controlled. This program shows how we are utilizing electronics to understand environmental conditions and help to avoid disaster. As more biomes across the planet experience extremes in weather and as more natural disasters such as hurricanes and tsunamis

affect densely populated areas, this technology will increase in importance.

ELECTRONICS - FIBER-OPTIC COMMUNICATIONS

Communications technology is everywhere. We send and receive information through televisions, internet, email, radio, text message and social media. This program goes into depth about how electronic communication has evolved over time. Whether using an old rotary phone or some new technology, there are basic principles behind each that many of us are unfamiliar with. Land line telephones send sound waves that are converted into electrical impulses that work with a series of switches and routing devices that open an electrical pathway to whomever you're calling. More commonly, cell phones operate by means of a modulated electromagnetic wave basically a radio. These signals connect to an electronic communications network. Metropolitan areas are divided into small networks where antennas send and receive signals depending on the user's location.

ENTOMOLOGY

AMAZING RED CRABS OF CHRISTMAS ISLAND, THE

Christmas Island, discovered December 25, 1643, is just a speck of land in the Indian Ocean. The annual red crab migration at the beginning of the rainy season, however, is so massive it can be seen from the air. It has been named a wonder of the natural world. This program follows this terrestrial arthropod from its rainforest burrow, across dangerous landscape to the ocean to mate. The park offers the perfect forest ecosystem for the Christmas Island Red Crab, which is endemic to the Cocos Islands and Christmas Island, both in the Indian Ocean. The Red Crabs rely on the rainy season that comes in November or December to initiate their migratory journey from the forests to the coasts. Their timing must be precise because the breeding sequence is also linked to the phases of the moon. Although the Red Crabs live inland, they require a certain level of moisture on their gills to survive. Their journey is filled with many obstacles. The risk of dehydration, predators, and automobile traffic cut the migration short for many crabs. However, locals on Christmas Island have built

fences and tunnels to corral the crabs and help funnel them safely under roads to their final breeding destinations on the coasts. After mating, the males will return to their original forest homes, while the females will remain for several weeks to spawn. A large percentage of their offspring will not survive. Sea conditions, ocean predators such as manta rays and huge whale sharks, and possible lack of rains will affect the chances that the larva will survive. However, it only takes two successful years out of every ten to keep their populations healthy.

ENVIRONMENT

LOST RIVERS

By Caroline Bacle

Nearly every major city was built near the convergence of many rivers. As cities grew with the Industrial Revolution, these rivers became conduits for disease and pollution. The 19th-century solution was to bury them underground and merge them with the sewer systems. These rivers still run through today's metropolises, but they do so out of sight.

LOST RIVERS examines hidden waterways in cities around the world and introduces us to people dedicated to exploring and exposing them. In Montreal, urban explorer Danielle Plamondon and photographer Andrew Emond follow the stony underground tunnels that contain the Riviere Saint-Pierre. In Brescia, Italy, a group of urban explorers conduct popular, officially-sanctioned tours through the city's network of medieval rivers.

More and more municipal governments are recognizing the wisdom of these explorers and making their once-buried waterways more accessible. Drawing inspiration from Seoul, whose Cheonggyecheon River was opened to the public in the early 2000s after 40 years of being hidden beneath a highway, Yonkers, New York has committed itself to "daylighting" its Saw Mill River, which has been buried under the city's downtown for the past 90 years. In London and Toronto, planners are rethinking the way they manage their rivers for environmental reasons, responding to structural problems that have to increasingly frequent flooding and sewer overflows.

As climate changes forces us to reconsider the relationship between the built environment and our natural resources, LOST RIVERS brings to life an aspect of urban ecology that has long been kept secret.

Reviews

- "Important as well as inspiring" - Science Magazine

- "A fascinating look at the natural river systems that have long been buried and disrupted by urban development and what these waterways can do to make our cities more livable." - Jason Anderson, Toronto Star
- "Ultimately hopeful...LOST RIVERS reminds us of the value of the natural world, suggesting that that world is always just a few feet away, waiting to return." - NOW Toronto

SAVING SUNSHINE: KEEPING THE LIGHTS ON WITH BATTERIES AND SOLAR POWER

By Winnie Hoskyns-Abrahall, Bill Hennessy

In plain language, master electrician and solar installer Bruce Hankins explains AC coupling, the combining of a grid-tied solar electric installation with an off-grid battery backup system.

As the world turns to sustainability, solar enriches our lives. SAVING SUNSHINE takes a look at today's developments in solar electricity and its increasing role as power provider.

Combining the best features of off-grid, stand-alone solar installations with grid-tied systems that provide distributed generation, photovoltaic systems have evolved into AC-coupled systems. They provide back-up, stand-alone electricity while also using renewable solar energy for our everyday electrical needs.

This combination of renewable energy and energy storage connects multiple inverters with maintenance-free batteries and opens the door to energy independence in a sustainable, low-carbon future.

Teachers, electricians, system installers, architects, owners of grid-tied systems and solar advocates will find the clear explanations in SAVING SUNSHINE helpful in learning the specifics of an AC-coupled system and how it forms a local distribution system to deliver electricity in a more reliable and environmentally friendly manner.

ENVIRONMENTAL ETHICS

SHARK LOVES THE AMAZON

By Mark London, Cidney Hue and Adrian Vasquez de Velasco

Shark Loves the Amazon offers a fresh perspective on what it will take to protect the Amazon rainforest and support the millions of people who now live there.

Many still think of the Amazon as a land populated primarily by indigenous people surrounded by exotic flora and fauna, all threatened by mining and farming. But that's no longer a fully accurate picture, since more than twenty million Brazilians migrated to the region over the last few decades and are themselves struggling to survive and prosper.

Author and attorney Mark London, offers an updated analysis and approach in this documentary, based on his book *The Last Forest: The Amazon in the Age of Globalization* (Random House), written with journalist Brian Kelly. London developed a lifelong passion for the Amazon during his first visit 30 years ago, and has traveled extensively in the region in recent years. The film depicts the hard, contemporary realities of a region seeking a sustainable model of development that can provide both for its millions of inhabitants and preserve the Earth's last great forest, with its unparalleled biodiversity and global importance.

As levels of deforestation rapidly approach the point of no return, London poses a provocative alternative to the simple mantra, "leave the forest untouched." One promising model the film profiles is the Juma Sustainable Development Reserve, which incentivizes people who live in the region to protect the forests.

Shark Loves the Amazon begins with substantial historical context, tracing in detail the forces that transformed the Amazon since the 1960's, when it was a largely unexplored and untouched region, unlike today.

TITLE NOTE: "Shark" refers to the fact Mark London is a lawyer.

FEATURED IN THE FILM

- Thomas Lovejoy, Biodiversity Chair, Heinz Center for Science, Economics and the Environment
- Dr. Philip Fearnside, National Institute for Research of the Amazon
- Charles Mann, Author, 1491 and 1493
- Eduardo Braga, Senator & Former Governor of the State of Amazonas, Brazil
- Virgilio Viana, CEO, Amazonas Sustainable Foundation (FAS)
- Raquel Lunas, Amazonas Sustainable Foundation (FAS)

Reviews

- "Focuses on the history of occupation of the Amazon when the country was under a military regime, and the

challenges and opportunities to build a sustainable model that preserves the world's last major rainforest and supports the livelihood of the inhabitants of the Brazilian Amazon. It offers a powerful example of the synergy between sustainability and conservation." - Brazil Institute, Woodrow Wilson International Center for Scholars

- "Sets out to put a 'human face' on the issue of deforestation, suggesting there is a deeper moral conundrum than just saving flora and fauna. Instead, the world should consider the well-being of the people living in the Amazon rainforest...." - Jessica Perry, Hola Cultura

TRoubLED WATERS: A MISSISSIPPI RIVER STORY

By Larkin McPhee and Barbara Coffin

The Emmy Award-winning Troubled Waters: A Mississippi River Story tells the story of the unintended yet severe consequences of farming along the Mississippi, and the efforts being taken to reverse this damage. America's heartland boasts some of the world's most productive farmland, but this bounty has come with a price. Excess crop fertilizers are contaminating the nation's rivers, lakes and aquifers, while at the same time precious soil is washing away.

The film traces the development of America's bountiful harvest and examines its effect on the legendary river, as well as the "dead zone" created in the Gulf of Mexico. Knitting together federal energy, farm and environmental policies, the film makes a compelling case for revamping US agricultural policy and practices. It also helps viewers to grasp a profound truth – that a single drop of water in the upper Midwest has an impact far downstream.

Through beautiful photography and narrative, Troubled Waters emphasizes solutions, providing a hopeful blueprint for progress and positive change. The film tells the stories of farmers, scientists and citizens who are pursuing more sustainable land-use practices that meet the goals of an ambitious, food-producing nation, while ensuring the long-term health of its most precious natural resources.

Reviews

- "...Troubled Waters puts a much-needed spotlight on Mississippi River pollution and the threat posed by high sediment levels ..." - Star & Tribune
- "Troubled Waters invites us to have an open, honest discussion about the challenges of cleaning up the

Mississippi River." - Whitney L. Clark
 Friends of the Mississippi River

ENVIRONMENTAL SCIENCE

ENVIRONMENT - WILDEBEEST MIGRATION PATTERNS

In East Africa, the Serengeti comes alive when wildebeests journey across treacherous terrain to find the best grazing locations. Every year, approximately 1.5 million wildebeests migrate over 1,800 miles or nearly 3,000 kilometers searching for rain ripened grass. Prior to their journey toward Kenya, they graze on the grasses of the Serengeti in Tanzania before the rainy season comes. As they search for food and water, they endure crocodile-filled river crossings and open range lion attacks in what is considered the largest wildlife migration on earth. In this program, students will learn about the lifecycle of this dynamic migratory mammal.

FOOD AND NUTRITION

FUTURE FOOD: BIG OR SMALL? (USA)

Directed by Alex Gabbay

What's the best method of growing food for a hungry population of 9.5 billion people: Big, or small?

In the USA alone there are approximately 5 million fewer farmers today than there were in the 1930s. Economies of scale suggests that bigger is better when it comes to feeding a hungry planet. But bigger often requires mechanization and compromise, such as new strains of E. coli bacteria and rising obesity. Often, big also requires growing the same crop varieties.

Many countries are realizing there is a price to "big" that's not factored in at the checkout counter and, as a consequence, a "small farmer" revolution is unfolding in many rich countries including the US. What's the best method of growing food for a hungry population of 9.5 billion people? Big, or small?

FUTURE FOOD: FAT OR SKINNY? (INDIA)

Directed by Arjun Pandey

The people of India are faced with a choice: indulge in a Western-style fast food diet, or embrace healthy and indigenous alternatives.

Everyday, as India awakes, 1.2 billion people need to be fed. By 2050 it could be 1.7 billion. Half a billion small scale farmers supply most of India's food. Traditionally, Indians have eaten the healthy cuisine of India's 29 states, but as people move to the cities there's a growing demand for fast processed food, the so-called 'junk food' accused of causing obesity and chronic health problems.

Now India is a country on the edge of two possible futures: a future that's well fed and healthy; or a future with Western diets and Western obesity. With so many hungry people to feed, is it possible to eat in ways that are nutritionally and environmentally sustainable? What role do governments have to play in creating

economic incentives for sustainable diets?

FUTURE FOOD: FOOD OR FUEL? (KENYA)

Directed by Christine Kinyanjui

Kenyan farmer Moses Shaha journeys through the Tana Delta, where farmers are starting to grow jatropha, a biofuel crop.

While Africa is short of food, the world is running short of fuel. Until now the fuels that power prosperity have been mostly coal, oil and gas. But these fossil fuels can pollute, and are running short, whereas new technology means cars, even power grids, can run on fuels from crops like ethanol from corn or sugar cane. It's been estimated world demand for biofuels over 20 years will need an area one and a half times the size of Kenya.

Kenyan Farmer and campaigner Moses Shaha is cynical about biofuels. He journeys through the Tana Delta, where farmers are starting to grow jatropha, a biofuel crop, to understand if it is a threat to farming land and food security as he fears, or if biofuels can in fact inspire innovation and help the environment long-term.

FUTURE FOOD: NEAR OR FAR? (NIGERIA)

Directed by Remi Vaughan Richards

The Nigerian Minister for Agriculture wants to ensure Nigerians eat food grown in Nigeria.

The proponents of globalization suggest

we buy our food from the cheapest sources, no matter where in the world that might be. Now that food prices are rising again, countries rich and poor have begun to reconsider the price of imported food and many governments, from Brazil to Micronesia, are setting quotas in support of local food production.

Nigeria, the world's seventh most populous country, is one of the world's largest food importers. The charismatic Akinwunmi Ayo Adesina, Nigerian Minister for Agriculture, believes it is his job to ensure Nigerians eat food grown in Nigeria. Experts say the Minister's plans could be a model for other African nations. But do people really want to eat only food grown at home? What impact do food policies have on the local economy and local diets? And in a globalized world, is self-sufficiency really the answer?

FUTURE FOOD: OLD OR NEW? (PERU)

Directed by Ernesto Cabello

In Lima, Peru, a new generation of top chefs are cooking with traditional ingredients and supporting traditional livelihoods.

The very future of food -- and farming -- is being re-imagined in a city where nobody dined out 20 years ago, where there is no national tradition of gastronomy, and where there is considerable malnutrition. But in the capital of Peru, a city not so long ago wracked by Shining Path terrorist violence, the top chefs -- men and women like Gaston Acurio, Javier Wong and Pedro Miguel Schiaffino -- believe gastronomy can achieve social justice.

Can this model really meet the challenge of providing enough food for 9.5 billion people by 2050? Scientists at Lima's agricultural university say we just can't afford to ignore the new models of industrial agriculture in favor of traditional methods. Is there room in the mix for the old and the new?

FUTURE FOOD: STAY OR GO? (CHINA)

Directed by Alex Gabbay

Who will grow China's food as young people leave the countryside for the cities?

In many remote areas of China young people have little choice but to stay on the land, and yet they may face a destitute future, with millions of farmworkers in China earning less than two dollars a day. Although there are some exceptions, farming is not generally seen as a "sexy" career choice.

The reality is that in China and around the world, young people are fleeing the countryside and moving to the big cities. Who will grow the food that feeds future generations? How can young people be convinced that farming is a good option? Californian-born Rand and his wife Sherry are the founders of Resonance China, a social media agency in Shanghai. They use the internet to create and identify trends and tricks that can create a buzz for global brands. FUTURE FOOD sets Resonance a task: can they make farming popular with young people?

GLOBAL ISSUES

CARBON RUSH, THE

By Amy Miller

Narrated by Daryl Hannah

THE CARBON RUSH travels across four continents to investigate the true cost of carbon emissions trading. Are carbon offset projects significantly reducing CO2 emissions, or are they distracting from what is really required to tackle the climate crisis?

To date, there has been over \$300 billion of carbon transactions worldwide through over 5,000 registered projects. Instead of focusing resources to move away from a fossil fuel economy, massive international trading ventures were established as the solution to climate change, nicknamed "green gold" by its beneficiaries.

This ground-breaking documentary examines how carbon trading works as established through the United Nations' Clean Development Mechanism (CDM) as part of the Kyoto Protocol.

The film tours a variety of carbon offset projects around the world, visiting people on the front lines of carbon trading. Their stories and voices have been little-heard as part of the multi-billion dollar carbon trading industry. In Panama, indigenous rain forest dwellers are losing their way of life. In India, waste pickers at landfills can no longer support themselves. And in Honduras, dozens of Campesinos have been assassinated.

THE CARBON RUSH raises fundamental questions about what happens when we attempt to manipulate markets to solve the climate crisis, including who stands to gain and who stands to lose.

Reviews

- "The documentary is filled with shockingly corrupt examples ... and sheds light on the state of environmental concern on the corporate level, without being overly alarmist." - THE CONCORDIAN
- "This one will get you boiling. It shows again how we are shipping our climate change problems out of our sight. Big companies are buying carbon credits, which allow them to keep on emitting as much CO2 as always by supporting projects that reduce emissions in third world countries. Or so they say." - THE VANCOUVER OBSERVER
- "The Carbon Rush, exposes the offset projects that are impacting developing countries and their communities so that other nations can continue their industries relatively unchecked.." - THE SOURCE

LAST CALL

Last Call examines the predictions and impact of one of the most important and controversial environmental books of all time, The Limits to Growth, published four decades ago.

In 1972, the publication of the book shook the world, selling 30 million copies in 30 languages, and marked a turning point in thinking about the environment. Prepared for the Club of Rome, the book was based on the work of a team of young scientists from MIT who created the first computer model to analyze the interaction over time of exponential growth with finite natural resources.

Their primary message was that the human footprint, if unchecked, would grow beyond the carrying capacity of the planet on a sustainable basis. They concluded that humanity must adapt to the planet's limits or risk overshoot, which could result in the collapse of global support systems and human decline. Their conclusions stimulated broad interest and significant debate, but not much action on their scenario for avoiding overshoot.

Four decades later, the surviving authors of The Limits to Growth and the book's mentors gathered to assess their earlier predictions, update where we stand today, and present what we need to do now to avoid global ecological collapse in the next few decades.

Supported by archival footage and other materials, Last Call provides provocative insights into the fundamental reasons behind the ongoing global ecological and economic crises, and a vision of a more hopeful future, if we commit to appropriate measures before it's too late.

HEALTH

HERE.US.NOW.

By Rudy Poe

Here.Us.Now. chronicles one family's determined fight to transform the medical research system in order to speed drug discoveries for treating chronic and debilitating rare diseases, which are more commonplace than is widely known.

Directed by Emmy award-winning filmmaker Rudy Poe, the film follows the story of Hugh and Chris Hempel, whose twin eight-year old daughters are dying from a rare progressive neurological disease called Niemann Pick Type C, with no known cure. Despite their lack of medical background, the Hempels use their entrepreneurial skills to seek a breakthrough drug treatment. As the devastating effects of the disease begin to take hold, the Hempels enter a complex and challenging world of medical literature, clinical trials and regulatory mazes, where new drug discoveries and approval are slow and often ineffective.

The Hempel family's journey also reveals the grim truth that "rare diseases" are actually widespread -- affecting 30 million Americans, nearly 1 in 10, and 350 million people worldwide. Yet, only 200 of the estimated 7,000 known rare diseases have FDA-approved drug treatments.

Here.Us.Now. advocates for a new model that accelerates the search for medical breakthroughs. The film encourages creative entrepreneurs to connect with patients, parents, advocacy networks, reform-minded physicians, and scientists to develop a better approach.

Industry leaders featured in the film include: Chris Austin, MD, director of the National Center for Advancing Translational Sciences (NCATS) at the National Institutes of Health; Debi Brooks, co-founder, The Michael J. Fox Foundation; Susan Love, MD, president, Dr. Susan Love Research Foundation; and Scott Johnson, President, CEO and Founder, Myelin Repair Foundation.

Reviews

- "Beautiful, eloquent, and thoughtful..."

The current way we do research... is too slow and outdated. This film will hopefully inspire thoughtful discussion." - Rare Disease Report

- "With little drug development happening in the rare disease arena, it's going to take more entrepreneurial focused parents like the Hempels to step in and get directly involved in advancing drug treatments to save their loved ones." - Nicole Boice, President, Global Genes, R.A.R.E

IDLE THREAT

By George Pakenham

Idling engines consume more than 6 billion gallons of gasoline annually in the U.S., a significant but little-known contributor to local air pollution, respiratory disease and global climate change.

Idle Threat is a lively look at one man's spirited struggle to improve public health by raising awareness about idling's impact, starting in New York City. Against all odds, he succeeds, helping improve local air quality, and in the process gains world-wide recognition for the anti-idling cause, with articles featured in the Wall Street Journal, New Yorker magazine, and the Financial Times.

In white shirt and tie, Wall Street banker George Pakenham has walked the streets of New York for over five years, courteously confronting over 3,000 motorists to explain idling's impact and the law prohibiting running a parked vehicle for more than a short time. Responses vary from thanks to anger, but Pakenham never wavers. He's determined that the problems idling poses be recognized, and lobbies successfully for the city to enforce its idling laws.

Featuring Click and Clack from NPR's Car Talk, and Mayor Michael Bloomberg, Idle Threat profiles one man's challenging quest to make his city and the world a healthier place, and shows that sometimes one person – and a simple act like turning a key – can make a big difference.

Reviews

- "In an engaging and informative approach to a serious environmental issue, Idle Threat tells the story of effective citizen engagement and impact." - Holly Wise, Virginia Tech Center for Leadership in Global Sustainability
- "In the vein of Michael Moore's cinema verite, Pakenham becomes our man on the street accosting idlers who pollute the streets of NYC with their vehicles' exhaust. The film manages to make you realize the deadly dangers present at the same

time it makes you laugh out loud." - Prof. Cathleen Miller, San Jose State University, author of Champion of Choice

- "An entertaining and informative ride that shows how citizens who care can make a difference." - Marc Norman, Director of UPSTATE, Syracuse University School of Architecture

HEALTH AND HEALING

ANONYMOUS PEOPLE, THE

Director: Greg Williams

THE ANONYMOUS PEOPLE is a feature documentary film about the 23.5 million Americans living in long-term recovery from alcohol and other drug addiction. Deeply entrenched social stigma and mass participation in widely successful anonymous 12-step groups have kept recovery voices silent and faces hidden for decades. The vacuum created by this silence has been filled by sensational mass media depictions of addiction that continue to perpetuate a lurid public fascination with the dysfunctional side of what is a preventable and treatable health condition. Just like women with breast cancer, or people with HIV/AIDS, courageous addiction recovery advocates are starting to come out of the shadows to tell their true stories. The moving story of The Anonymous People will be told through the faces and voices of the leaders, volunteers, corporate executives, and celebrities who are laying it all on the line to save the lives of others just like them. This passionate new public recovery movement is fueling a changing conversation that aims to transform public opinion, and finally shift problematic policy toward lasting recovery solutions.

INDIGENOUS STUDIES

SHARK LOVES THE AMAZON

By Mark London, Cidney Hue and Adrian Vasquez de Velasco

Shark Loves the Amazon offers a fresh perspective on what it will take to protect the Amazon rainforest and support the millions of people who now live there.

Many still think of the Amazon as a land populated primarily by indigenous people surrounded by exotic flora and fauna, all threatened by mining and farming. But that's no longer a fully accurate picture, since more than twenty million Brazilians migrated to the region over the last few decades and are themselves struggling to survive and prosper.

Author and attorney Mark London, offers an updated analysis and approach in this documentary, based on his book *The Last Forest: The Amazon in the Age of Globalization* (Random House), written with journalist Brian Kelly. London developed a lifelong passion for the Amazon during his first visit 30 years ago, and has traveled extensively in the region in recent years. The film depicts the hard, contemporary realities of a region seeking a sustainable model of development that can provide both for its millions of inhabitants and preserve the Earth's last great forest, with its unparalleled biodiversity and global importance.

As levels of deforestation rapidly approach the point of no return, London poses a provocative alternative to the simple mantra, "leave the forest untouched." One promising model the film profiles is the Juma Sustainable Development Reserve, which incentivizes people who live in the region to protect the forests.

Shark Loves the Amazon begins with substantial historical context, tracing in detail the forces that transformed the Amazon since the 1960's, when it was a largely unexplored and untouched region, unlike today.

TITLE NOTE: "Shark" refers to the fact Mark London is a lawyer.

FEATURED IN THE FILM

- Thomas Lovejoy, Biodiversity Chair, Heinz Center for Science, Economics and the Environment
- Dr. Philip Fearnside, National Institute

for Research of the Amazon

- Charles Mann, Author, 1491 and 1493
- Eduardo Braga, Senator & Former Governor of the State of Amazonas, Brazil
- Virgilio Viana, CEO, Amazonas Sustainable Foundation (FAS)
- Raquel Lunas, Amazonas Sustainable Foundation (FAS)

Reviews

- "Focuses on the history of occupation of the Amazon when the country was under a military regime, and the challenges and opportunities to build a sustainable model that preserves the world's last major rainforest and supports the livelihood of the inhabitants of the Brazilian Amazon. It offers a powerful example of the synergy between sustainability and conservation." - Brazil Institute, Woodrow Wilson International Center for Scholars
- "Sets out to put a 'human face' on the issue of deforestation, suggesting there is a deeper moral conundrum than just saving flora and fauna. Instead, the world should consider the well-being of the people living in the Amazon rainforest...." - Jessica Perry, Hola Cultura

JOURNALISM

SHADOWS OF LIBERTY

Directed by Jean-Philippe Tremblay

Uses shocking examples of cover-ups and censorship by the US media to show how a few mega corporations exercise control over the content of our news.

SHADOWS OF LIBERTY examines how the US media are controlled by a handful of corporations exercising extraordinary political, social, and economic power. Having always allowed broadcasting to be controlled by commercial interests, the loosening of media ownership regulations, that began under Reagan and continued under Clinton, has led to the current situation where five mega corporations control the vast majority of the media in the United States. These companies not only don't prioritize investigative journalism, but can and do clamp down on it when their interests are threatened.

The film begins with three journalists whose careers were destroyed because of the stories they broke: Roberta Baskin, whose scoop about Nike sweatshops didn't sit well with CBS when Nike became a co-sponsor of the Olympics; Kristina Borjesson, another CBS reporter, whose job lasted precisely one week after the network spiked her investigation into the TWA Flight 800 disaster in 1996; and Gary

Webb, whose story linking US support for Nicaraguan Contras and the epidemic in crack cocaine was trashed by The New York Times and the Washington Post. (His story was true, but Webb lost his job and eventually killed himself.)

With the help of interviewees including Daniel Ellsberg, Dan Rather, Julian Assange, Chris Hedges, Dick Gregory, Robert McChesney, John Nichols and Amy Goodman, the film explores in depth the monopolies and vested interests that filter the dissemination of information thus damaging the democratic process. One notorious example, featured in the film, of the anti-democratic nexus between the military-industrial complex and the news media was the latter's unquestioning acceptance of the former's trumped up justification for the Iraq War.

With profits taking priority over the truth and the powerful being taken at their word rather than taken to task, the film asks whether the Internet can withstand corporate pressure and remain free, or will it too fall into the hands of monopolistic corporations.

Ultimately has our commercial world caused us to lose one of the most precious commodities of all--unbiased information?

Reviews

- "A brilliant, riveting and deeply disturbing insight into corporate control of American media and American public opinion." Geoffrey R. Stone, Professor of Law, University of Chicago
- "The timing couldn't be better for a theatrical documentary about a corporate media monopoly in American journalism." - Etan Vlessing, Hollywood Reporter

LABOR STUDIES

HOUSEMAIDS

By Gabriel Mascaro

Housemaids are an integral part of the household in Brazil, and participate in the day-to-day life of the family. The employment of housemaids is almost obligatory among the middle and upper classes of the country. The vast majority of these housemaids are black women, who face high levels of inequality based on their gender, race and social class. Their role in the household raises important questions about public and private space, endurance and choice, and labor and family life.

For HOUSEMAIDS, director Gabriel Mascaro asked seven adolescents to film their family's housemaids for one week, and hand the footage over to him. Their images uncover the complex relationship that exists between housemaids and their employers, a relationship that confuses intimacy and power in the workplace and provides us with an insight into the echoes of a colonial past that linger in contemporary Brazil.

HOUSEMAIDS exposes and explores a hidden daily reality of Brazilian life.

Reviews

- "No other film has ever managed to portray as deeply what is ingrained in the Brazilian unconsciousness." - Luiz Carlos Merten, Estadão
- "HOUSEMAIDS is humorous and sensitive, whilst also managing to be a profound work of denunciation... This is a rare example of recent Brazilian cinema that is capable of unsettling the very core of anyone who sees it ... an historic documentary." - Pedro Butcher, Folha de Sao Paulo
- "Highlights the historical weight that underpins each casual gesture, each behavioral standard we so distractedly repeat as we go about our quotidian choreography." - Fabio Andrade, Cinetica Magazine

Awards

- Best Film, 2012 Panorama Internacional Coisa de Cinema
- Special Mention, 2012 Hollywood Brazilian Film Festival

MEN AT LUNCH

Directorr: Sean O Cualain

New York City, 1932. The country is in the throes of the Great Depression, the previous decade's boom of Italian, Irish, and Jewish immigrants has led to unprecedented urban expansion, and in the midst of an unseasonably warm autumn, steelworkers risk life and limb building skyscrapers high above the streets of Manhattan.

In Men at Lunch, director Sean O Cualain tells the story of "Lunch atop a Skyscraper", the iconic photograph taken during the construction of the GE Building that depicts eleven workmen taking their lunch break while casually perched along a steel girder - boots dangling 850 feet above the sidewalk of 41st Street. This documentary takes the audience into the archival halls of Rockefeller Center and the Corbis collection to reveal never-before-seen artifacts from the news outlets of the Great Depression.

Part homage, part historical investigation, Men at Lunch is the revealing tale of an American icon, an unprecedented race to the sky and the immigrant workers that built New York. For 80 years, the identity of the eleven men - and the photographer that immortalized them - remained a mystery: their stories, lost in time, subsumed by the fame of the image itself.

Reviews

- "'Men at Lunch' is infectiously and unabashedly uplifting as it celebrates the American immigrant experience... placing those laborers and the products of their labor in a vividly evoked historical context." - Variety
- "The documentary invites the viewer to meditate on that moment. 'Men at Lunch' solves some of the puzzle created during a New York autumn when Babe Ruth's Yankees were winning the World Series and Franklin Delano Roosevelt was winning the presidency." - The New York Times

LEADERSHIP

INNOVATORS, THE: INTEGRATING LITERACY INTO CURRICULUM

Learn how to increase student success by integrating literacy learning into all content areas.

The stakes are high in 21st century U.S. education. Literacy skills that were once expected from only the highest performing graduates are now the minimum requirement in the workplace. Complex thinking and communication skills are the standard for workers, as basic tasks have been taken over by computers and automation.

Common Core State Standards reinforce the new definition of literacy by raising the bar for student achievement. But how will

teachers help students reach that bar? In this video, we'll visit two examples of integrating literacy education that are working.

At the Chula Vista Elementary School District in Chula Vista, California, they make advancing literacy top priority with a systemic approach across the entire 44-school district. Superintendents, board members, principals and teachers are accountable, and their practice of shared leadership supports the school system's constant demand for improving literacy teaching. In a District with 35% English learner students and where 2/3 of its schools are Title 1, they are beating the odds and closing the achievement gap.

At Downers Grove South High School in Downers Grove, Illinois, English and Communications Department Chair, Janice Schwarze leads a grassroots movement with a literacy coaching program. Their team of literacy coaches and content area liaisons strive to include literacy learning in all classrooms, including unconventional classes like art and math. In five years, Downers Grove South High School has seen improved student performance and schools across the country are using their program as a model.

INNOVATORS, THE: STEM YOUR SCHOOL

Giving your students a well-rounded education that includes science, technology, engineering, and math (STEM) has the additional benefit of helping to prepare students for the jobs of the future. Learn how to STEM your school by seeing examples of special schools that focus on educating students of all ages in STEM. This DVD takes you and your colleagues to

- Boren Elementary School in Seattle, Washington, where students get an early foundation in STEM by learning basic engineering and science.
- Girl's Middle School in Palo Alto, California, that is leveling the playing field for 6th, 7th, and 8th grade girls by teaching programming, earth sciences, and advanced computer games.
- Thomas Jefferson High School for Science and Technology in Alexandria, Virginia, where students get a head start in advanced sciences and engineering with independent research projects in robotics, prototyping, and energy systems.

Seeing how STEM can be incorporated into instruction at all grade levels will spark discussion in your learning community and

spur innovative thinking about how to improve students' learning experiences and include 21st century learning skills.

LEADERSHIP/MANAGEMENT

GROW YOUR BUSINESS BY MANAGING YOUR STAFF EFFECTIVELY OR HOW TO BE THE SUGAR TO MAKE THE PIE SWEET

By Manny Escalante

A well-managed staff is essential to having a well-run, profitable business. As such, talent without cohesion or united vision is of no use to a business. In fact, untapped potential in staff will either cause those individual to leave the company or lessen their value to the organization. In turn, unwilling and unmotivated employees can be detrimental to a business. *Grow Your Business by Managing Your Staff Effectively Or How to Be the Sugar to Make the Pie Sweet* explains what individuals in positions of authority can do to make their companies more successful, including getting more out of their staff, and communicating more effectively with their employees.

Among the topics covered:
The right people
The right things
The right way
Compensation, reward, recognition
Player by player evaluation
Leading your leaders
Give direction vs. provide support
Getting in results

LIFE SCIENCE

BAT CITY, USA

By Laura Brooks

Bat City USA is a compelling documentary about how a city overcame its fear of one of the world's most misunderstood creatures and now heartily embraces them, largely thanks to the efforts of one man.

A giant colony of Mexican Free-tailed bats moved into an Austin, Texas bridge in the 1980's after a reconstruction project created an ideal roosting habitat. The "bat invasion" launched a media hoopla and

alarm among residents worried about bat attacks and rabies. When the city threatened to exterminate the bats, a zealous conservationist named Merlin Tuttle stepped in and fought to save them. Tuttle, a bat researcher at a Milwaukee museum, moved to Austin, which he called the epicenter of "worldwide bad bat publicity", and founded Bat Conservation International to promote a positive image of bats.

To overcome local opposition, he worked tirelessly to change public perception of the bats—from scary disease carriers to desirable creatures who help keep moths and mosquitos in check, among other environmental benefits. As a pioneering bat photographer whose images were published in *National Geographic*, Tuttle used his striking photos as one important weapon in his battle for the bats.

Thanks to Tuttle's efforts, Austin now loves its bats. Thousands of tourists annually are drawn to the downtown setting for a fascinating, close-up glimpse of the world's largest urban bat colony – nearly one million bats.

Reviews

- "Laura Brooks has created a compelling, richly informative film – every bit as rare and wondrous as the flying mammals that fill its frames." - Doug Kreutz, Environmental Reporter, Tucson, AZ
- "Bat City, USA is the story of a gifted and passionate scientist who overcame ridicule and rejection to single-handedly save a city's huge bat colony. In doing so, he transformed the city's perception of the bat from a menace to a beloved icon." - John Kerr, Writer, Austin, TX

MARKETING

MANAGING THE MODERN DAY MARKETING PLAN ON A BUDGET

By Clarisa Lindenmeyer

Managing the Modern Day Marketing Plan on a Budget discusses the importance of having a strategic marketing plan and looks at what other companies in the health/fitness club industry spend on average on marketing. The DVD emphasizes the fact that a strategic approach to marketing can be devised and implemented no matter how large or small a company is. The DVD also points out the fact that clubs must answer at least two questions in order to develop a viable marketing strategy—"who are we?" and "who is our customer?" In addition, the DVD details several examples of areas in

which clubs can enhance their marketing efforts, including community outreach, corporate marketing, PR and media buying, social media, and internal marketing.

Among the topics covered:

- Marketing strategies
- How do we reach the customer?
- Community outreach
- Corporate marketing
- PR & media buying
- Social media buying
- Social media
- Internal marketing

MATERIALS SCIENCE

RECYCLING TECHNOLOGY - WASTE NOT, WANT NOT

Modern waste-management systems are integrating a variety of recycling processes. Transforming waste into energy and waste into new products is at the forefront of new technologies. For example, light is used to separate glass from minerals, while magnets and whirlstreams separate metals from non-metals. Inside the eponymous rotting boxes, organic waste is recycled by organic materials eating micro-organisms into re-usable products. Understanding the environmental necessity of recycling and how it is changing the world in which we live, is at the core of this program. The average American produces almost 2 kilograms of garbage per day, or 13 kilograms per week and 726 kilograms per year. New technologies are finding ways to reduce these numbers and recycle many valuable raw materials that used to end up lost in everyday trash. This program demonstrates how scientists are utilizing microorganisms to minimize waste and new separation technologies to aid in recycling. Removal of specific valuable metals from appliances, computers and automobiles has become lucrative business. To help protect our environment, engineers are learning to focus on creating new products with recycling in mind at their inception.

MUSIC

IN SEARCH OF BLIND JOE DEATH: THE SAGA OF JOHN FAHEY

Director: James Cullingham

Known as the father of American Primitive Guitar, many consider John Fahey to be a foundational figure in American folk music. As both musician and musicologist, Fahey made a fundamental contribution to our understanding and appreciation of such music genres as Delta blues, Appalachian bluegrass and New Orleans jazz. In Search of Blind Joe Death combines interviews, performances and archival footage with animation in a kinetic, musically charged tribute to a tremendously influential composer, guitarist, author and provocateur. Interviewees include Pete Townshend, Joey Burns of Calexico, Chris Funk of The Decemberists and renowned radio personality Dr. Demento, aka Barry Hansen.

Review

- "In Search of Blind Joe Death is an excellent introduction to one of the key musicians of his time. Newcomers and fans alike will find a lot to treasure here." - Film Journal

NUTRITION

CHANGING FACE OF NUTRITION FOR HEALTH AND PERFORMANCE, THE: PAST, PRESENT, AND FUTURE

By Melinda M. Manore

The Changing Face of Nutrition for Health

and Performance: Past, Present, and Future presents a compelling historical overview of nutrition and exercise. Featuring a President's Lecture from the 2012 ACSM annual meeting, the DVD looks at where the science and the profession have been, what did they learn, and what are the future directions and challenges they face. The DVD discusses how the profession has changed since the 1980s and points out some of the individuals in ACSM who helped make the transition possible. The DVD also reviews some of the key factors involved in two nutrition-related issues—protein needs and the physically active female.

Among the topics covered:

- Looking back
- Nutrition and exercise: the science and the profession
- Where have we been?
- What have we learned?
- Factors that alter protein needs
- The active female
- The profession/industry: where have we been?
- What are the future directions and challenges we face?

FOOD REQUESTS AND ALLERGIES: A PANEL DISCUSSION

By Genie Gunn, Jeffrey Hinkle, Ann Peterka, Matt Brown, Jennifer Salkewicz

From requests for vegetarian and vegan menus to nut allergies and gluten-free products, life inside the kitchen at camp has changed dramatically over the last decade. As such, campers, staff, and volunteers are coming to camp with more and more requests (as well as expectations) of food service programs at camps. Food Requests and Allergies: A Panel Discussion features a panel of food service professionals who discuss these issues and share their experiences and approaches to addressing them.

Among the topics covered:

- Dealing with food requests from campers
- Dealing with food allergies
- Working with food distributors
- Healthy food ideas
- Current challenges

PERFORMANCE

TUTU MUCH

Director: Elise Swerhone

TuTu MUCH follows nine young ballet dancers as they plie, pirouette and compete for highly-coveted spots in an intensive four-week professional ballet summer program at the Royal Winnipeg Ballet School. Leaving behind their families and friends, often for the first time, each girl confronts the painstaking and sometimes rewarding realities of pursuing her dream of becoming a professional ballet dancer.

The daily classes are grueling tests of their physical stamina and emotional grit. "You've even got to love the pain," says twelve-year-old Sidnie, one of the prospective ballerinas. As the girls learn during the course of the auditions, talent and passion alone do not guarantee success: the success of a dancer often comes down to the shape of a foot or the length of the neck. In the last few days of the program the girls find out which of them will take the next step toward the dream of becoming a professional ballerina, and which ones won't.

Review

- "A real and often shocking look into the life of young dancers trying to make it into the professional world of classical dance. It's full of excitement and disappointment, tears and laughter and hard decisions regarding years of sacrifice and pain and the limitations of one's anatomy. And it's all from the mouths of children." - See Magazine

PHILOSOPHY & SCIENCE

ANONYMOUS PEOPLE, THE

Director: Greg Williams

THE ANONYMOUS PEOPLE is a feature documentary film about the 23.5 million Americans living in long-term recovery from alcohol and other drug addiction. Deeply entrenched social stigma and mass participation in widely successful anonymous 12-step groups have kept recovery voices silent and faces hidden for decades. The vacuum created by this silence has been filled by sensational mass media depictions of addiction that continue to perpetuate a lurid public fascination with the dysfunctional side of what is a preventable and treatable health condition. Just like women with breast cancer, or people with HIV/AIDS, courageous addiction recovery advocates are starting to come out of the shadows to tell their true stories. The moving story of

The Anonymous People will be told through the faces and voices of the leaders, volunteers, corporate executives, and celebrities who are laying it all on the line to save the lives of others just like them. This passionate new public recovery movement is fueling a changing conversation that aims to transform public opinion, and finally shift problematic policy toward lasting recovery solutions.

PANDORA'S PROMISE

The atomic bomb and meltdowns like Fukushima have made nuclear power synonymous with global disaster. But what if we've got nuclear power wrong? PANDORA'S PROMISE asks whether the one technology we fear most could save our planet from a climate catastrophe, while providing the energy needed to lift billions of people in the developing world out of poverty. In his controversial new film, Stone tells the intensely personal stories of environmentalists and energy experts who have undergone a radical conversion from being fiercely anti to strongly pro-nuclear energy, risking their careers and reputations in the process. Stone exposes this controversy within the environmental movement head-on with stories of defection by heavy weights including Stewart Brand, Richard Rhodes, Gwyneth Cravens, Mark Lynas and Michael Shellenberger. Undaunted and fearlessly independent, PANDORA'S PROMISE is a landmark work that is forever changing the conversation about the myths and science behind this deeply emotional and polarizing issue.

PHYSICS

PHYSICS - THE SCIENCE OF ATHLETICS

Kinesiology is the study and application of physics to body movement - energy, work, friction and inertia. This program explores the application of Newton's Three Laws of Motion in baseball regarding pitching and hitting. Kinesiologists at the American Sports Medicine Institute use video motion capture to study the biomechanics of a pitcher's delivery to optimize performance and help reduce injury.

POLLUTION

IDLE THREAT

By George Pakenham

Idling engines consume more than 6 billion gallons of gasoline annually in the U.S., a significant but little-known contributor to local air pollution, respiratory disease and global climate change.

Idle Threat is a lively look at one man's spirited struggle to improve public health by raising awareness about idling's impact, starting in New York City. Against all odds, he succeeds, helping improve local air quality, and in the process gains world-wide recognition for the anti-idling cause, with articles featured in the Wall Street Journal, New Yorker magazine, and the Financial Times.

In white shirt and tie, Wall Street banker George Pakenham has walked the streets of New York for over five years, courteously confronting over 3,000 motorists to explain idling's impact and the law prohibiting running a parked vehicle for more than a short time. Responses vary from thanks to anger, but Pakenham never wavers. He's determined that the problems idling poses be recognized, and lobbies successfully for the city to enforce its idling laws.

Featuring Click and Clack from NPR's Car Talk, and Mayor Michael Bloomberg, Idle Threat profiles one man's challenging quest to make his city and the world a healthier place, and shows that sometimes one person – and a simple act like turning a key – can make a big difference.

Reviews

- "In an engaging and informative approach to a serious environmental issue, Idle Threat tells the story of effective citizen engagement and impact." - Holly Wise, Virginia Tech Center for Leadership in Global Sustainability
- "In the vein of Michael Moore's cinema verite, Pakenham becomes our man on the street accosting idlers who pollute the streets of NYC with their vehicles' exhaust. The film manages to make you realize the deadly dangers present at the same time it makes you laugh out loud." - Prof. Cathleen Miller, San Jose State University, author of Champion of Choice
- "An entertaining and informative ride that shows how citizens who care can make a difference." - Marc Norman, Director of UPSTATE, Syracuse University School of Architecture

TROUBLED WATERS: A MISSISSIPPI RIVER STORY

By Larkin McPhee and Barbara Coffin

The Emmy Award-winning Troubled Waters: A Mississippi River Story tells the story of the unintended yet severe consequences of farming along the Mississippi, and the efforts being taken to reverse this damage. America's heartland boasts some of the world's most productive farmland, but this bounty has come with a price. Excess crop fertilizers are contaminating the nation's rivers, lakes and aquifers, while at the same time precious soil is washing away.

The film traces the development of America's bountiful harvest and examines its effect on the legendary river, as well as the "dead zone" created in the Gulf of Mexico. Knitting together federal energy, farm and environmental policies, the film makes a compelling case for revamping US agricultural policy and practices. It also helps viewers to grasp a profound truth – that a single drop of water in the upper Midwest has an impact far downstream.

Through beautiful photography and narrative, Troubled Waters emphasizes solutions, providing a hopeful blueprint for progress and positive change. The film tells the stories of farmers, scientists and citizens who are pursuing more sustainable land-use practices that meet the goals of an ambitious, food-producing nation, while ensuring the long-term health of its most precious natural resources.

Reviews

- "...Troubled Waters puts a much-needed spotlight on Mississippi River pollution and the threat posed by high sediment levels ..." - Star & Tribune
- "Troubled Waters invites us to have an open, honest discussion about the challenges of cleaning up the Mississippi River." - Whitney L. Clark Friends of the Mississippi River

PSYCHIATRIC WELLNESS

UNDERSTANDING AND COMMUNICATING WITH A PERSON WHO HAS DELUSIONS

Developed by Mary D. Moller and Millene Freeman Murphy

Three to six million Americans who suffer from neurobiological disorders such as schizophrenia, major depression, and manic-depression must live with delusions, sometimes on a daily basis. With the help of this program, persons diagnosed with these disorders and their families, can learn to describe, name and manage delusions — it is possible to sort out reality from unreality. This program introduces a method of self-empowered symptom management co-developed by providers, consumers and families to facilitate improved daily lives for those living with delusions. You will learn a collaborative, non-blaming approach to the development of intervention strategies identified as useful in the ongoing management of delusions.

- What are delusions and what causes them?
- Types of delusions
- Stages and phases of delusional thoughts
- 12 steps for intervening
- Symptom management of delusions

UNDERSTANDING AND COMMUNICATING WITH A PERSON WHO IS EXPERIENCING MANIA

Developed by Mary D. Moller and Millene Freeman Murphy

Mania - characterized by racing thoughts, insomnia, inappropriate elation, grandiosity, pressured speech and inappropriate social behaviors - is one of the extreme mood swings of bipolar disorder, formerly known as manic-depressive illness. This program explains this complex illness, describes the stages of mania and suggests communication techniques to deal with the often devastating interpersonal dynamics that occur as a result of mania. Poignant testimony is incorporated throughout the program from two women living with the illness themselves and a man who has witnessed the pain of a friend diagnosed with bipolar disorder. They share their frustrations and concerns and offer valuable insight to family members and professionals.

- Signs and symptoms of mania
- DSM-III-R criteria for mania
- Theories of etiology
- Stages of mania
- Emotional and behavioral themes
- Medical management

UNDERSTANDING AND COMMUNICATING WITH A PERSON WHO IS HALLUCINATING

Developed by Mary D. Moller and Millene Freeman Murphy

This video explains how the brain functions, describes what happens during a hallucination and, most importantly, offers proven techniques for helping a person through this frightening experience. The program also shows actual PET, CET, and MRI brain scans depicting the differences in schizophrenia and includes a dramatic recording by Dory Previn describing the hallucinatory experience. This video also describes the Four Stages of Hallucinations: Comforting, Condemning, Controlling, and Conquering, instructs individuals in twelve techniques that have been proven to help individuals through this frightening experience, and assists in the management of future hallucinations.

- Basic brain anatomy and physiology
- Brain imaging techniques
- Four Stages of Hallucinations
- Music video of Mr. Whisper by Dory Previn
- 12 Steps for intervening to interrupt the hallucinatory process

UNDERSTANDING RELAPSE: MANAGING THE SYMPTOMS OF SCHIZOPHRENIA

Developed by Mary D. Moller and Millene Freeman Murphy

Each year at least 250,000 people with schizophrenia return to home or community-based care for the ongoing management of this severe mental illness. In this video Mary D. Moller, MSN, ARNP, CS, with the help of persons diagnosed with schizophrenia and their families, describes the complex world of living and coping with this disease and dealing with the stages of relapse, signs of impending relapse, and triggers of relapse. This program introduces the Symptom Management Assessment Tool, the first tool of its kind to be researched and developed for consumers and their families to communicate daily symptoms, those indicating relapse, problems with daily living, medication and common symptom management techniques.

- What is relapse?
- Who will experience it and what causes it?
- The early symptoms of relapse
- Stages of relapse
- Coping techniques for symptom management

PSYCHOLOGY

AUDIOLOGY & OTOLGY - COCHLEAR IMPLANTS

In the United States, 12,000 babies are born annually with hearing loss. Doctors at the University of Miami's Ear Institute help patients that are diagnosed and prepared for cochlear implant surgery. A cochlear implant is a small, complex electronic device that provides the sense of hearing to patients who are profoundly deaf or are severely hard of hearing. The implant helps patients hear when electrodes along the array stimulate the remaining auditory nerve fibers in the cochlea. The electrical sound information is sent through the auditory system to the brain for interpretation. In this issue, students will learn the benefits of cochlear implants, how the ear works, and the anatomy of the inner and outer ear.

MEDICINE - REVOLUTIONARY BRAIN SURGERY

Medical professionals all over the world are constantly looking for better ways to treat patients and diseases. In this program, doctors at the University of Miami Miller School of Medicine and the Sylvester Comprehensive Cancer Center treat a patient with a type of cancer that affects the area of the brain that controls function. Glioblastomas are aggressive and often fatal malignant brain tumors. To combat the disease, revolutionary medical treatments are beginning to save lives all over the world. Doctors found that when the procedure called an awake craniotomy was used, they are able to remove the tumor from the brain without damage to the language areas. During an awake craniotomy, surgeons can converse with the patient to hear if the language areas of the brain are being affected before removing the tumor, thus preserving very important parts of the brain as much as possible. In addition, the medical staff is able to create a vaccine from the extracted tumor. After the tumor is harvested during surgery, certain proteins from the cells are purified. These proteins are then concentrated and given back to the patient in simple injections. The purpose of this tumor vaccine is to spark the patient's immune systems to fight the tumor and attack it to keep it from coming back. This issue also goes in depth about how the human brain works, the different regions, and specifically the Wernicke's area, which is one of the two parts that is linked

to speech.

PUBLIC AND COMMUNITY NURSING

BEHAVIOURS OF CONCERN

Workers in community or health services will from time to time encounter people exhibiting behaviours of concern. This two-clip set outlines common examples of difficult and challenging behaviours as well as providing practical strategies for safe, effective responses. This includes using appropriate communication strategies, following established procedures, and knowing when and how to seek assistance or refer a client. With the aid of dramatised scenarios, experienced mental health professionals offer helpful information and demonstrate effective responses. This is a valuable resource for any student or worker in community and health services seeking to improve their understanding and management of concerning behaviours.

FIRST AID TECHNIQUES

Anywhere in the community or in the home, emergencies can occur, which require the administration of first aid. It saves lives and minimises the chances of worse outcomes to the health and wellbeing of casualties as a result of a sudden injury or illness. This collection of video resources provides an overview of the main areas of first aid training, including: what to do in an emergency; legal and moral aspects of first aid; medical conditions – heart attack, stroke, diabetic shock, epilepsy; CPR and hands-only CPR; fractures, dislocations, strains and sprains; neck, head and spinal injuries; burns, scalds, electrocution; cuts, lacerations, bleeding; asthma, allergies and anaphylaxis; poisoning and overdose; and hypothermia and hyperthermia.

SENSORY LOSS AND AGEING

The decline or total loss of any of the five senses has an enormous impact on an older person's independence and the quality of life they enjoy. One of the key responsibilities for carers in an aged care setting is to identify signs of sensory loss and develop a range of techniques to assist the client's day to day needs in areas including communication and personal safety. This interview led program outlines the difficulties and behaviours a carer may encounter as a result of a client's sensory impairment as well as providing practical strategies and management plans to assist carers in meeting the needs of clients with sensory impairment. This is an ideal resource for students and workers in aged care.

RENEWABLE ENERGY

SAVING SUNSHINE:

KEEPING THE LIGHTS ON WITH BATTERIES AND SOLAR POWER

By Winnie Hoskyns-Abraham, Bill Hennessy

In plain language, master electrician and solar installer Bruce Hankins explains AC coupling, the combining of a grid-tied solar electric installation with an off-grid battery backup system.

As the world turns to sustainability, solar enriches our lives. SAVING SUNSHINE

takes a look at today's developments in solar electricity and its increasing role as power provider.

Combining the best features of off-grid, stand-alone solar installations with grid-tied systems that provide distributed generation, photovoltaic systems have evolved into AC-coupled systems. They provide back-up, stand-alone electricity while also using renewable solar energy for our everyday electrical needs.

This combination of renewable energy and energy storage connects multiple inverters with maintenance-free batteries and opens the door to energy independence in a sustainable, low-carbon future.

Teachers, electricians, system installers, architects, owners of grid-tied systems and solar advocates will find the clear explanations in SAVING SUNSHINE helpful in learning the specifics of an AC-coupled system and how it forms a local distribution system to deliver electricity in a more reliable and environmentally friendly manner.

SCIENCE

ENERGY - BIOFUELS USE ON THE RISE

The energy demands and rising cost of oil have encouraged scientists and engineers to develop renewable energy alternatives. Biofuels are renewable energy sources from organic materials such as plants or animals that are directly converted into liquid fuels. The two most common biofuels in use today are ethanol and biodiesel. Engineered biofuels, such as ethanol and biodiesel that are made from starches, sugars and cellulose are already in use as blending agents and additives that greatly reduce vehicle emissions. Algae as a bio-fuel has become more common because it is easy to harvest and these single celled photosynthetic organisms are known for their rapid growth and high energy content.

SOCIAL SCIENCE / SOCIAL STUDIES

ARISE

By Lori Joyce and Candice Orlando

Narrated by Daryl Hannah

On every continent, women are taking the lead to protect and restore the natural environment, and are empowering others to respect the earth. Arise presents the stories of a diverse group of 13 women in five countries who have initiated solution-oriented environmental projects in their communities, towns and villages.

These women are engaged in a variety of innovative efforts profiled in the film: replanting trees in Kenya, conserving biodiversity in India, preserving sacred Native lands, protecting the rainforest in Ecuador, building more sustainable local communities, transforming food through urban agriculture, creating safe outdoor places to play, training women to build and install solar lights, and organizing to combat climate change, among others.

Arise gives voice to these powerful women, and weaves together their inspiring stories with stunning images, poetry and music by well-known writers and musicians, including Alice Walker and Michael Franti.

Through these hopeful examples and new models, the women in the film challenge our current way of thinking about the environment, and encourage a shift in values to find a different, healthier way to view our relationship to the earth.

AMONG THE WOMEN FEATURED

- Judy Nyguthi Kimamo, Green Belt Movement, Women for Change Initiative, Nyeri, Kenya
- Maggie Fox, President and CEO, Climate Protection Action Fund, Colorado
- Majora Carter, President, MCG Consulting, South Bronx, NY
- Monica Chuji, Amazonian Quechua Human Rights Activist, Ecuador
- Winona LaDuke, Executive Director, Honor the Earth and White Earth Land Recovery Project, White Earth Reservation, MN
- Theo Colborn, Founder and President, The Endocrine Disruption Exchange (TEDX), Colorado
- Dr. Bhatt, Co-Director, Navdanya, Dehradun, India
- Dana Miller, Founder, Grow Local Colorado, Denver, CO
- Vandana Shiva, Director, Navdanya and Author, Dehradun, India
- Jessica Posner, Co-founder and Chief Operating Officer, Shining Hope for Communities, Kenya
- Bata Bhurji, Administrator, Barefoot College, Rajasthan, India
- Aida Shibli, Palestinian Bedouin Peace Activist, Israel

BLACK FATHERHOOD PROJECT, THE

By Jordan Thierry

In The Black Fatherhood Project, filmmaker Jordan Thierry leads viewers through an honest and essential exploration of fatherhood in Black America, providing historical context and conversation for an issue at the core of the Black experience today.

Nationwide, 67 percent of Black children live in single-parent families, predominantly with their mother, a ratio that has tripled since the 1960's.

In the first half of the film, Thierry begins by telling his own family story, then with the help of historians and others, traces the roots of the fatherless Black home, revealing a history much more complex and profound than is commonly known. The film digs deep to explore how Black families functioned in Africa before slavery, and how slavery, racism, and other recent challenges such as mass incarceration affect Black fatherhood. It looks beyond major historical events and discusses their psychological impacts, and calls into question traditional family roles and cultural adaptation.

In the second half of the film, Thierry puts that history into contemporary perspective in a candid dialogue among a diverse group of Black fathers. These dads talk openly about their experiences and the value systems they employ to raise their own families. Their stories serve as positive role models for inspiring other dads to help break the cycle of fatherless families. Thierry closes the film by sharing insights and solutions to ensure the power of a father's love is not lost on America's Black children.

FEATURED IN THE FILM

- Dr. Wade Nobles, Professor Emeritus, Department of Africana Studies, San Francisco State University
- Dr. Charles Lewis, President of Congressional Research Institute, Social Work and Policy and Adjunct Professor, Howard University School of Social Work
- Dr. Donald Roe, Associate Professor of History, Howard University

- Dr. Ronald B. Mincy, Maurice V. Russell Professor of Social Policy and Social Work Practice, Columbia University School of Social Work

Reviews

- "The Black Fatherhood Project is an amazing film. I'm especially impressed by the way it conceptualizes history and offers personal narrative. The information is timely, relevant, and is critical for addressing fatherhood in the African-American community." - Prof. Akil Houston, PhD, Department of African American Studies, Ohio University
- "This film is an important contribution to the true image of Black fathers in America . . . The film captures eloquently the challenges, struggles, triumphs, hopes and dreams of African American men." - Dr. Joseph White, Professor Emeritus of Psychology and Psychiatry, University of California, Irvine; pioneer of the field of Black Psychology
- "Exceptionally well done.... Addresses the impact of the history of Africa, slavery and institutional racism upon the African-American family today." - Kenneth Yarnell, Principal, Aloha High School, Oregon

STAFF TRAINING/HIRING

GROW YOUR BUSINESS BY MANAGING YOUR STAFF EFFECTIVELY OR HOW TO BE THE SUGAR TO MAKE THE PIE SWEET

By Manny Escalante

A well-managed staff is essential to having a well-run, profitable business. As such, talent without cohesion or united vision is of no use to a business. In fact, untapped potential in staff will either cause those individual to leave the company or lessen their value to the organization. In turn, unwilling and unmotivated employees can be detrimental to a business. Grow Your Business by Managing Your Staff Effectively Or How to Be the Sugar to Make the Pie Sweet explains what individuals in positions of authority can do to make their companies more successful, including getting more out of their staff, and communicating more effectively with their employees.

Among the topics covered:

The right people
The right things
The right way
Compensation, reward, recognition
Player by player evaluation
Leading your leaders
Give direction vs. provide support
Getting in results

SUSTAINABILITY

FUTURE FOOD: BIG OR SMALL? (USA)

Directed by Alex Gabbay

What's the best method of growing food for a hungry population of 9.5 billion people: Big, or small?

In the USA alone there are approximately 5 million fewer farmers today than there were in the 1930s. Economies of scale suggests that bigger is better when it comes to feeding a hungry planet. But bigger often requires mechanization and compromise, such as new strains of E. coli bacteria and rising obesity. Often, big also requires growing the same crop varieties.

Many countries are realizing there is a price to "big" that's not factored in at the checkout counter and, as a consequence, a "small farmer" revolution is unfolding in many rich countries including the US. What's the best method of growing food for a hungry population of 9.5 billion people? Big, or small?

Review

FUTURE FOOD: FAT OR SKINNY? (INDIA)

Directed by Arjun Pandey

The people of India are faced with a choice: indulge in a Western-style fast food diet, or embrace healthy and indigenous alternatives.

Everyday, as India awakes, 1.2 billion people need to be fed. By 2050 it could be 1.7 billion. Half a billion small scale

farmers supply most of India's food. Traditionally, Indians have eaten the healthy cuisine of India's 29 states, but as people move to the cities there's a growing demand for fast processed food, the so-called 'junk food' accused of causing obesity and chronic health problems.

Now India is a country on the edge of two possible futures: a future that's well fed and healthy; or a future with Western diets and Western obesity. With so many hungry people to feed, is it possible to eat in ways that are nutritionally and environmentally sustainable? What role do governments have to play in creating economic incentives for sustainable diets?

FUTURE FOOD: FOOD OR FUEL? (KENYA)

Directed by Christine Kinyanjui

Kenyan farmer Moses Shaha journeys through the Tana Delta, where farmers are starting to grow jatropha, a biofuel crop.

While Africa is short of food, the world is running short of fuel. Until now the fuels that power prosperity have been mostly coal, oil and gas. But these fossil fuels can pollute, and are running short, whereas new technology means cars, even power grids, can run on fuels from crops like ethanol from corn or sugar cane. It's been estimated world demand for biofuels over 20 years will need an area one and a half times the size of Kenya.

Kenyan Farmer and campaigner Moses Shaha is cynical about biofuels. He journeys through the Tana Delta, where farmers are starting to grow jatropha, a biofuel crop, to understand if it is a threat to farming land and food security as he fears, or if biofuels can in fact inspire innovation and help the environment long-term.

FUTURE FOOD: NEAR OR FAR? (NIGERIA)

Directed by Remi Vaughan Richards

The Nigerian Minister for Agriculture wants to ensure Nigerians eat food grown in Nigeria.

The proponents of globalization suggest we buy our food from the cheapest sources, no matter where in the world that might be. Now that food prices are rising again, countries rich and poor have begun to reconsider the price of imported food and many governments, from Brazil to Micronesia, are setting quotas in support of local food production.

Nigeria, the world's seventh most populous country, is one of the world's largest food importers. The charismatic Akinwunmi Ayo Adesina, Nigerian Minister for Agriculture, believes it is his job to ensure Nigerians eat food grown in Nigeria. Experts say the Minister's plans could be a model for other African nations. But do people really want to eat only food grown at home? What impact do food policies have on the local economy and local diets? And in a globalized world, is self-sufficiency really the answer?

FUTURE FOOD: OLD OR NEW? (PERU)

Directed by Ernesto Cabello

In Lima, Peru, a new generation of top chefs are cooking with traditional ingredients and supporting traditional livelihoods.

The very future of food -- and farming -- is being re-imagined in a city where nobody dined out 20 years ago, where there is no national tradition of gastronomy, and where there is considerable malnutrition. But in the capital of Peru, a city not so long ago wracked by Shining Path terrorist violence, the top chefs -- men and women like Gaston Acurio, Javier Wong and Pedro Miguel Schiaffino -- believe gastronomy can achieve social justice.

Can this model really meet the challenge

of providing enough food for 9.5 billion people by 2050? Scientists at Lima's agricultural university say we just can't afford to ignore the new models of industrial agriculture in favor of traditional methods. Is there room in the mix for the old and the new?

FUTURE FOOD: STAY OR GO? (CHINA)

Directed by Alex Gabbay

Who will grow China's food as young people leave the countryside for the cities?

In many remote areas of China young people have little choice but to stay on the land, and yet they may face a destitute future, with millions of farmworkers in China earning less than two dollars a day. Although there are some exceptions, farming is not generally seen as a "sexy" career choice.

The reality is that in China and around the world, young people are fleeing the countryside and moving to the big cities. Who will grow the food that feeds future generations? How can young people be convinced that farming is a good option? Californian-born Rand and his wife Sherry are the founders of Resonance China, a social media agency in Shanghai. They use the internet to create and identify trends and tricks that can create a buzz for global brands. FUTURE FOOD sets Resonance a task: can they make farming popular with young people?

SUSTAINABILITY / SUSTAINABLE DEVELOPMENT

ARISE

By Lori Joyce and Candice Orlando

Narrated by Daryl Hannah

On every continent, women are taking the lead to protect and restore the natural environment, and are empowering others to respect the earth. Arise presents the stories of a diverse group of 13 women in five countries who have initiated solution-oriented environmental projects in their communities, towns and villages.

These women are engaged in a variety of innovative efforts profiled in the film:

replanting trees in Kenya, conserving biodiversity in India, preserving sacred Native lands, protecting the rainforest in Ecuador, building more sustainable local communities, transforming food through urban agriculture, creating safe outdoor places to play, training women to build and install solar lights, and organizing to combat climate change, among others.

Arise gives voice to these powerful women, and weaves together their inspiring stories with stunning images, poetry and music by well-known writers and musicians, including Alice Walker and Michael Franti.

Through these hopeful examples and new models, the women in the film challenge our current way of thinking about the environment, and encourage a shift in values to find a different, healthier way to view our relationship to the earth.

AMONG THE WOMEN FEATURED

- Judy Nyguthi Kimamo, Green Belt Movement, Women for Change Initiative, Nyeri, Kenya
- Maggie Fox, President and CEO, Climate Protection Action Fund, Colorado
- Majora Carter, President, MCG Consulting, South Bronx, NY
- Monica Chuji, Amazonian Quechua Human Rights Activist, Ecuador
- Winona LaDuke, Executive Director, Honor the Earth and White Earth Land Recovery Project, White Earth Reservation, MN
- Theo Colborn, Founder and President, The Endocrine Disruption Exchange (TEDX), Colorado
- Dr. Bhatt, Co-Director, Navdanya, Dehradun, India
- Dana Miller, Founder, Grow Local Colorado, Denver, CO
- Vandana Shiva, Director, Navdanya and Author, Dehradun, India
- Jessica Posner, Co-founder and Chief Operating Officer, Shining Hope for Communities, Kenya
- Bata Bhurji, Administrator, Barefoot College, Rajasthan, India
- Aida Shibli, Palestinian Bedouin Peace Activist, Israel

Reviews

- "Thoughtful, beautiful ARISE inspired me to consider how I might contribute to the Earth's health." - Josephine Jones, Colorado Humanities
- "Exquisite cinematography and music are enhanced by Daryl Hannah's evocative narration." - Martine Joseph, MovieSpirit

Awards

- Winner, Spirit of Activism Award, Colorado Environmental Film Festival
- Winner, Shift Award, FilmShift Festival

TECHNOLOGY

ENGINEERING - SOLVING PROBLEMS THROUGH SCIENCE

According to ABET, or the Accreditation Board for Engineering and Technology: "Engineering is the profession in which a knowledge of the mathematical and natural sciences, gained by study, experience, and practice, is applied with judgment to develop ways to utilize, economically, the materials and forces of nature for the benefit of humankind." There is considerable overlap between science and engineering. Research teams often consist of one or more engineers who work closely with scientists to design and build some of the tools required for lab experiments or to test theories in practice. Engineers are motivated to improve our quality of life; here are some examples: making renewable energy economical, improving health informatics, making better medicines, improving automobile safety, and improving urban infrastructure. Engineers typically develop new products using several steps - Design phase, testing, production and maintenance. During the design phase, engineers specify the functional requirements; design and test the components; produce a prototype; and evaluate the overall effectiveness, cost, reliability, and safety. This process is common in the development of many different products such as chemicals, computers, energy sources, and transportation. During testing, production and maintenance, engineers determine if any failures of the components are likely and where they occur. This is where they estimate the time and cost required to produce a product. In these processes, engineers use computers to create designs, analyze functionality, and simulate how a machine, structure, or system operates.

INNOVATION LAB - CONNECTING PEOPLE

Meet the founders of two startups created with the purpose of making life easier for business and people with the help of virtual technology innovation. Dan Greenberg is the founder of Sharethrough, a company that helps brands make their videos go viral on the web. Phil Libin has started Evernote, a mobile application that helps people remember and keep track of everything going on in their lives.

INNOVATION LAB - DESIGNED AND AUGMENTED REALITY

This episode of Innovation Lab focuses on learning more about the latest trends in artificial intelligence and augmented reality. We take a closer look at two of the top companies in this field: Dekko and Affectiva. Dekko is a company that is building a disruptive high-tech platform that intends to synthesize the online world and the real world. Affectiva is a startup that uses technology to transform products, processes and lives by providing automated emotion measurement.

INNOVATION LAB - EMOTIONS AND MEMORIES

Jamie Wong and Anthony Marinos: Meet two young professionals whose objective is to find the perfect match for people's needs when traveling and working. Through their innovative companies: Vayable and Loosucubes they have harnessed the power of community to provide unique travel experiences to consumers as well as to efficiently provide office space to smaller companies that need it but may not be able to afford it. We learn the importance of community building and how important the endorsement of a community user is to build good faith in these kinds of systems.

INNOVATION LAB - ENTREPRENEURS

Meet two of the most successful entrepreneurs in the food industry today. Gary Vaynerchuck and Tim McCollu stood out for having challenged the rules of how to produce, market and sell two historically traditional products: wine and chocolate. These two entrepreneurs saw a gap in an already consolidated market and took big chances to build their businesses. McCollu's Madecasse Chocolates are manufactured in Madagascar and feature a completely self-contained production chain that relies heavily on local farmers and workers. Vaynerchuck has grown his family's wine business through aggressive social media strategies.

INNOVATION LAB - HIGH TECH

A great deal of today's modern technology exists due to the extensive use of the abundant chemical element, Silicon. California's Silicon Valley is where we find several of the world's most innovative and successful technology companies that touch all areas of human needs. Two of these companies, SunTech and Complete Genomics, are on the forefront of the innovative use of computing technology. Through their groundbreaking methods and designs they have harnessed the computing power of the Silicon Valley and applied it to creating more efficient and effective solar power generators as well as cost effective and highly accurate human genome mapping techniques.

INNOVATION LAB - RECYCLING

HABITS/HEALTHY EATING

Recyclebank and Revolution Foods are two innovative companies that focus on rewarding people for taking ecological and healthy actions. These two companies are encouraging citizens to be actively engaged with good environmental and nutritional practices. The benefits created by these practices are considered "win-win-win". This means that consumers and government save money, build community, and also earn long-term health benefits.

INNOVATION LAB - THE ART OF DESIGN

This episode delves into the discussion of what distinguishes art and design? Most good design is firmly rooted in the art world. Often, professional designers are inspired and informed by work that is created through artistic endeavors. Modern mass production has made it nearly impossible to pinpoint the origin or inspiration for design of everyday objects. It is certain, however, that artistic innovation and creativity are essential to the advancement of quality design that not only serves a function but also satisfies the user on a more abstract and artistic level. One company that has mastered walking the fine line between art and design is Ammunition. In this episode we talk to their creative leaders as well as the executive in charge of Design at the MOMA in New York City.

INNOVATION LAB - THE GOOGLERS

In this episode featuring Google, we get to know some of the secrets behind this innovation machine. We speak with several of the executives from Google that are based all around the world. Their thoughts, values and strategies behind the challenge of winning the technology battle are explored. We learn how though their creative risks in growing the company as well as the creative environment established by founders Larry Page and Sergey Brin, Google has become the top online search engine in the world.

INNOVATION LAB - THE SHARING ECONOMY

The Mesh, Collaborative Consumption, The Sharing Economy. These are important social trends that are at the forefront of many socially and ecologically responsible companies today. The principles of sharing and redistribution are powerful trends that do not just include manufactured goods but also commodities like specialized skills and free time. Benefits of these innovative approaches to business include: lower costs, less waste and the creation of global communities with neighborly values. In this episode we meet the founders of two companies that have put these collaborative values into practice: Task Rabbit and Relay Rides.

INNOVATION LAB - THE SILICON VALLEY

This episode focuses on the rich innovative history of the Silicon Valley. From its beginnings in the 1970's as a small industrial area that began manufacturing microchips to its place today as the heart of innovation and technology. We will hear from historians from Stanford University on the development of the area as well as leaders from several of the most important companies that are located there today. We learn how community, interdependence and open exchange of

ideas is what has made Silicon Valley the success it is today.

TEXTILES - CARBON FIBERS, FLEXIBLE & TOUGH

Engineers are constantly developing new lightweight, durable textiles to be used in many facets of our daily lives. Manufacturers of airplanes and automobiles are increasingly turning to textiles, such as carbon fibers, to produce their new models. They rely on carbon fibers due to light weight and durable properties. For instance, the wing of an airplane might be metal, but many of the interior parts are made of carbon fiber. Aircraft engineers combine carbon fiber with other lightweight materials to create composites which are usually 20 to 30% lighter than metal alloys. Carbon fiber threads are made up of between 1,000 and 48,000 tiny filaments. The filaments are created by oxidizing, or burning a synthetic polymer in a 2000 degree furnace, turning it into almost pure carbon.

Engineers are finding uses for new high tech materials, such as QTC - a polymer embedded with millions of tiny pointed metal particles. QTC acts like a resistor, but the metal particles are so close together, that if something in the environment changes, the charge between particles increases and electrons can jump from one to another in a process called quantum tunneling. QTC is so sensitive that its resistance will alter if there are changes in sound, smell, temperature, or pressure. In future space missions, QTC might assist astronauts with fans, lights and other devices inside of their spacesuits - controlled by so called soft switches - devices that make use of the fact that QTC becomes more conductive when pressure is applied.

TRANSPORTATION - AUTOMOTIVE SAFETY INNOVATIONS

Automobiles have evolved in many ways over the years, with increasing fuel economy, reliability, handling, and comfort. However, automobile manufacturing is in a new era, focusing on safety while incorporating impressive new technologies into our transportation needs. With a growing population, there are subsequently more people driving and more automobiles on the road. With more

congestion and traffic, the likelihood of accidents seems imminent. Automobile engineers are reacting by making our transportation options safer with extensive crash tests, monitoring cameras and accident avoidance systems.

URBAN AND REGIONAL PLANNING

SHARK LOVES THE AMAZON

By Mark London, Cidney Hue and Adrian Vasquez de Velasco

Shark Loves the Amazon offers a fresh perspective on what it will take to protect the Amazon rainforest and support the millions of people who now live there.

Many still think of the Amazon as a land populated primarily by indigenous people surrounded by exotic flora and fauna, all threatened by mining and farming. But that's no longer a fully accurate picture, since more than twenty million Brazilians migrated to the region over the last few decades and are themselves struggling to survive and prosper.

Author and attorney Mark London, offers an updated analysis and approach in this documentary, based on his book *The Last Forest: The Amazon in the Age of Globalization* (Random House), written with journalist Brian Kelly. London developed a lifelong passion for the Amazon during his first visit 30 years ago, and has traveled extensively in the region in recent years. The film depicts the hard, contemporary realities of a region seeking a sustainable model of development that can provide both for its millions of inhabitants and preserve the Earth's last great forest, with its unparalleled biodiversity and global importance.

As levels of deforestation rapidly approach the point of no return, London poses a provocative alternative to the simple mantra, "leave the forest untouched." One promising model the film profiles is the Juma Sustainable Development Reserve, which incentivizes people who live in the region to protect the forests.

Shark Loves the Amazon begins with substantial historical context, tracing in detail the forces that transformed the Amazon since the 1960's, when it was a largely unexplored and untouched region, unlike today.

TITLE NOTE: "Shark" refers to the fact Mark London is a lawyer.

FEATURED IN THE FILM

- Thomas Lovejoy, Biodiversity Chair,

Heinz Center for Science, Economics and the Environment

- Dr. Philip Fearnside, National Institute for Research of the Amazon
- Charles Mann, Author, 1491 and 1493
- Eduardo Braga, Senator & Former Governor of the State of Amazonas, Brazil
- Virgilio Viana, CEO, Amazonas Sustainable Foundation (FAS)
- Raquel Lunas, Amazonas Sustainable Foundation (FAS)

Reviews

- "Focuses on the history of occupation of the Amazon when the country was under a military regime, and the challenges and opportunities to build a sustainable model that preserves the world's last major rainforest and supports the livelihood of the inhabitants of the Brazilian Amazon. It offers a powerful example of the synergy between sustainability and conservation." - Brazil Institute, Woodrow Wilson International Center for Scholars
- "Sets out to put a 'human face' on the issue of deforestation, suggesting there is a deeper moral conundrum than just saving flora and fauna. Instead, the world should consider the well-being of the people living in the Amazon rainforest...." - Jessica Perry, Hola Cultura

URBAN PLANNING & DESIGN

LOST RIVERS

By Caroline Bacle

Nearly every major city was built near the convergence of many rivers. As cities grew with the Industrial Revolution, these rivers became conduits for disease and pollution. The 19th-century solution was to bury them underground and merge them with the sewer systems. These rivers still run through today's metropolises, but they do so out of sight.

LOST RIVERS examines hidden waterways in cities around the world and introduces us to people dedicated to exploring and exposing them. In Montreal, urban explorer Danielle Plamondon and photographer Andrew Emond follow the stony underground tunnels that contain the Riviere Saint-Pierre. In Brescia, Italy, a group of urban explorers conduct popular, officially-sanctioned tours through the city's network of medieval rivers.

More and more municipal governments are recognizing the wisdom of these explorers and making their once-buried waterways more accessible. Drawing

inspiration from Seoul, whose Cheonggyecheon River was opened to the public in the early 2000s after 40 years of being hidden beneath a highway, Yonkers, New York has committed itself to "daylighting" its Saw Mill River, which has been buried under the city's downtown for the past 90 years. In London and Toronto, planners are rethinking the way they manage their rivers for environmental reasons, responding to structural problems that have to increasingly frequent flooding and sewer overflows.

As climate changes forces us to reconsider the relationship between the built environment and our natural resources, LOST RIVERS brings to life an aspect of urban ecology that has long been kept secret.

Reviews

- "Important as well as inspiring" - Science Magazine
- "A fascinating look at the natural river systems that have long been buried and disrupted by urban development and what these waterways can do to make our cities more livable." - Jason Anderson, Toronto Star
- "Ultimately hopeful...LOST RIVERS reminds us of the value of the natural world, suggesting that that world is always just a few feet away, waiting to return." - NOW Toronto

WATER

TROUBLED WATERS: A MISSISSIPPI RIVER STORY

By Larkin McPhee and Barbara Coffin

The Emmy Award-winning Troubled Waters: A Mississippi River Story tells the story of the unintended yet severe consequences of farming along the Mississippi, and the efforts being taken to reverse this damage. America's heartland boasts some of the world's most productive farmland, but this bounty has come with a price. Excess crop fertilizers are contaminating the nation's rivers, lakes and aquifers, while at the same time precious soil is washing away.

The film traces the development of America's bountiful harvest and examines its effect on the legendary river, as well as the "dead zone" created in the Gulf of Mexico. Knitting together federal energy, farm and environmental policies, the film makes a compelling case for revamping US agricultural policy and practices. It also helps viewers to grasp a profound truth – that a single drop of water in the upper Midwest has an impact far downstream.

Through beautiful photography and

narrative, Troubled Waters emphasizes solutions, providing a hopeful blueprint for progress and positive change. The film tells the stories of farmers, scientists and citizens who are pursuing more sustainable land-use practices that meet the goals of an ambitious, food-producing nation, while ensuring the long-term health of its most precious natural resources.

Reviews

- "...Troubled Waters puts a much-needed spotlight on Mississippi River pollution and the threat posed by high sediment levels ..." - Star & Tribune
- "Troubled Waters invites us to have an open, honest discussion about the challenges of cleaning up the Mississippi River." - Whitney L. Clark Friends of the Mississippi River

Award

- Winner of Three Emmys, Including Best Topical Documentary

WOMEN'S STUDIES

ARISE

By Lori Joyce and Candice Orlando

Narrated by Daryl Hannah

On every continent, women are taking the lead to protect and restore the natural environment, and are empowering others to respect the earth. Arise presents the stories of a diverse group of 13 women in five countries who have initiated solution-oriented environmental projects in their communities, towns and villages.

These women are engaged in a variety of innovative efforts profiled in the film: replanting trees in Kenya, conserving biodiversity in India, preserving sacred Native lands, protecting the rainforest in Ecuador, building more sustainable local communities, transforming food through urban agriculture, creating safe outdoor places to play, training women to build and install solar lights, and organizing to combat climate change, among others.

Arise gives voice to these powerful women, and weaves together their inspiring stories with stunning images, poetry and music by well-known writers and musicians, including Alice Walker and Michael Franti.

Through these hopeful examples and new models, the women in the film challenge our current way of thinking about the environment, and encourage a shift in values to find a different, healthier way to view our relationship to the earth.

HOUSEMAIDS

By Gabriel Mascaro

Housemaids are an integral part of the household in Brazil, and participate in the day-to-day life of the family. The employment of housemaids is almost obligatory among the middle and upper classes of the country. The vast majority of these housemaids are black women, who face high levels of inequality based on their gender, race and social class. Their role in the household raises important questions about public and private space, endurance and choice, and labor and family life.

For HOUSEMAIDS, director Gabriel Mascaro asked seven adolescents to film their family's housemaids for one week, and hand the footage over to him. Their images uncover the complex relationship that exists between housemaids and their employers, a relationship that confuses intimacy and power in the workplace and

provides us with an insight into the echoes of a colonial past that linger in contemporary Brazil.

HOUSEMAIDS exposes and explores a hidden daily reality of Brazilian life.

Reviews

- "No other film has ever managed to portray as deeply what is ingrained in the Brazilian unconsciousness." - Luiz Carlos Merten, Estadao
- "HOUSEMAIDS is humorous and sensitive, whilst also managing to be a profound work of denunciation... This is a rare example of recent Brazilian cinema that is capable of unsettling the very core of anyone who sees it ... an historic documentary." - Pedro Butcher, Folha de Sao Paulo
- "Highlights the historical weight that underpins each casual gesture, each behavioral standard we so distractedly repeat as we go about our quotidian choreography." - Fabio Andrade, Cinetica Magazine

Awards

- Best Film, 2012 Panorama Internacional Coisa de Cinema
- Special Mention, 2012 Hollywood Brazilian Film Festival

標準

國家標準全文數據庫 (1950-2013)

《國家標準全文數據庫》收錄了由中國標準出版社出版的，國家標準化管理委員會發佈的所有國家標準，占國家標準總量的 90% 以上。標準的內容來源於中國標準出版社，相關的文獻、專利、成果等資訊來源於 CNKI 各大資料庫。可以通過標準號、中文標準名稱、起草單位、起草人、採用標準號、發佈日期、中國標準分類號、國際標準分類號等檢索項進行檢索。

收錄年限：1950 年至今

Chinese Standard Full-text Database (SCSF) collects all the state standards published by Standards Press of China and Standardization Administration of China, which occupy more than 90% of total state standards. The content of standard is originated from Standards Press of China, and information of relevant literature, patent and achievement comes from each database of CNKI. Search can be carried out through some terms such as standard number, Chinese standard name, drafting unit, drafter, adopted standard number, publication date, Chinese standard classification number and international standard classification number.

Year Limit: Chinese Standard from 1950 till now.

Vehicle

Item no. : PM32160002
Format : Online Database (Annual Subscription)
Price : USD 2860.00

國家標準全文數據庫: 船舶 (1950-2013)

Shipping

Item no. : NC32160003
Format : Online Database (Annual Subscription)
Price : USD 2800.00

國家標準全文數據庫: 電工

(1950-2013)

Electrician

Item no. : WB32160004
Format : Online Database (Annual Subscription)
Price : USD 11170.00

國家標準全文數據庫: 電子元器件與信息技術 (1950-2013)

Electronic components and IT

Item no. : NN32160005
Format : Online Database (Annual Subscription)
Price : USD 9070.00

國家標準全文數據庫: 紡織

(1950-2013)

Textile

Item no. : ZB32160006
Format : Online Database (Annual Subscription)
Price : USD 3860.00

國家標準全文數據庫: 公路、水路運輸 (1950-2013)

Highway and waterway transportation

Item no. : BH32160007
Format : Online Database (Annual Subscription)
Price : USD 1310.00

國家標準全文數據庫: 航空、航天 (1950-2013)

Aviation, aerospace

Item no. : NJ32160008
Format : Online Database (Annual Subscription)
Price : USD 280.00

國家標準全文數據庫: 化工

(1950-2013)

Chemical industry

Item no. : KC32160009
Format : Online Database (Annual Subscription)
Price : USD 15750.00

國家標準全文數據庫: 環境保護 (1950-2013)

Environmental Protection

Item no. : VK32160010
Format : Online Database (Annual Subscription)

Price : USD 1870.00

國家標準全文數據庫: 機械

(1950-2013)

Mechanical

Item no. : ME32160011
Format : Online Database (Annual Subscription)
Price : USD 17460.00

國家標準全文數據庫: 建材

(1950-2013)

Building materials

Item no. : DP32160012
Format : Online Database (Annual Subscription)
Price : USD 4800.00

國家標準全文數據庫: 礦業

(1950-2013)

Mining

Item no. : LR32160013
Format : Online Database (Annual Subscription)
Price : USD 3880.00

國家標準全文數據庫: 能源、核技術 (1950-2013)

Energy, nuclear technology

Item no. : SH32160014
Format : Online Database (Annual Subscription)
Price : USD 3140.00

國家標準全文數據庫: 農業、林業

(1950-2013)

Agriculture, forestry

Item no. : HN32160015
Format : Online Database (Annual Subscription)
Price : USD 10680.00

國家標準全文數據庫: 輕工、文化與生活用品 (1950-2013)

Light industry, culture and daily necessities

Item no. : NP32160016
Format : Online Database (Annual Subscription)
Price : USD 6280.00

國家標準全文數據庫: 石油

(1950-2013)

Oil

Item no. : RZ32160017
Format : Online Database (Annual Subscription)
Price : USD 2170.00

國家標準全文數據庫: 食品

(1950-2013)

Food

Item no. : ZK32160018
Format : Online Database (Annual Subscription)
Price : USD 6340.00

國家標準全文數據庫: 鐵路

(1950-2013)

Railway

Item no. : TN32160019
Format : Online Database (Annual Subscription)
Price : USD 690.00

國家標準全文數據庫: 通信、廣播

(1950-2013)

Telecommunications, broadcasting

Item no. : GW32160020
Format : Online Database (Annual Subscription)
Price : USD 3340.00

國家標準全文數據庫: 土木、建築

(1950-2013)

Civil engineering, construction

Item no. : LY32160021
Format : Online Database (Annual Subscription)
Price : USD 1750.00

國家標準全文數據庫: 冶金

(1950-2013)

Metallurgy

Format : Online Database (Annual Subscription)
Price : USD 12640.00

國家標準全文數據庫: 醫藥、衛生、勞動保護 (1950-2013)

Medicine, health, labor protection

Item no. : LE32160023
Format : Online Database (Annual Subscription)

Price : USD 10610.00

國家標準全文數據庫: 儀器、儀表 (1950-2013)

Instruments, meters

Item no. : CH32160024
Format : Online Database (Annual Subscription)
Price : USD 3690.00

國家標準全文數據庫: 綜合 (1950-2013)

Comprehensive

Item no. : VA32160025
Format : Online Database (Annual Subscription)
Price : USD 10570.00

產業

中國第三產業數據庫 (CHINA TERTIARY INDUSTRY DATABASE)

中國第三產業數據庫, 資料來源於國家統計局。收錄了全國、31 個省、自治區、直轄市及港澳臺第三產業的統計資料和第三產業的普查資料。全方位、多維度的反映了我國第三產業發展歷史、現狀、結構及其發展趨勢。主要指標涵蓋: 第三產業的單位數和人員數、第三產業增加值、第三產業固定資產投資、第三產業細分行業財務資料、第三產業細分行業業務資料、分行業、分地區企業單位以及個體經濟的財務收支、實物資產和增加值等。便於各級領導和社會各界瞭解我國第三產業綜合發展情況, 同時為相關研究人員進行我國現代化進程和社會就業等課題研究提供資料支援。資料起始於 1949 年, 年度更新。

Item no. : HF11320020
Format : Online Database (1 Year)
Price : USD 4500.00

中國房地產數據庫 (CHINA REAL ESTATE STATISTICS DATABASE)

中國房地產統計數據庫, 資料來源於國家統計局資產投資統計司和中國指數研究院, 是用於研究我國房地產行業發展情況和房地產市場運營情況的專題數據庫。此數據庫不僅可以為高校地產行業研究方向的學生、科研人員以及房地產行業從業人員的研究工作提供資料支援, 還可以對企業單位和相關政府管理部門的戰略決策起到輔助支持作用。此數據庫收集了全國 31 個省市自治區和 35 個大中城市的年度房地產統計資料, 主要包括: 房地產綜合、投資、開竣工面積、市場、土地購置開發、經營狀況 6 個方面的指標; 並統計了全國 31 個省市自治區的季度及月度房地產市場資料和 70 個

大中城市的季度及月度房屋銷售價格指數。年度資料起始於 1997 年, 月度起始於 2001 年 2 月, 季度資料起始於 2001 年第一季度, 年(季、月)度更新。

法律

中國法律知識總庫 (1949-2013)

中國法律知識資源總庫含法律法規、案例、法律論作文獻共計 260 萬多篇, 進行了三者的深入整合, 能進行一站式查詢和對照應用, 是目前中國信息量最全、技術最先進的法律知識服務平臺。

資源全面: 類型全面, 完整收錄法律法規、案例、法律論文等全類型法律資源; 內容涵蓋立法、執法、司法、普法、教學、科研、法律服務等不同領域

甄選嚴格: 堅持精品戰略, 從用戶使用角度出發, 注重資源實用價值, 優選有實際參考價值的法律文獻

來源權威: 資源均來自國家正規出版單位和官方發布機構, 部分期刊、博碩士學位論文、合作案例屬於獨家授權

編輯規範: 建立編委會指導、監督產品編輯, 分類體系完整, 覆蓋 400 多個學科專題, 1000 多個案由

關聯強大: 首次打破單庫出版的模式, 實現理論與實際的印證和關聯

更新及時: 及時收錄最新資源, 實現資源日更新

Chinese Legal Knowledge Integrated Database (CLKD) is a portal for legal researchers to find most current and accurate resources on China law. With 7/24 access and excellent customer service, CLKD is a powerful research tool to gather, locate and analyze various types of China legal information. Based on CNKI's sophisticated technology and fully integrated content, CLKD is recognized as the leading Chinese legal research platform worldwide.

工具書

中國工具書網絡出版總庫

《中國工具書網絡出版總庫》是精準、權威、可信且持續更新的百科知識庫，簡稱《知網工具書庫》，或者《CNKI 工具書庫》。

專輯專題：《知網工具書庫》是傳統工具書的數字化集成整合，按學科分 10 大專輯 168 個專題，不但保留了紙本工具書的科學性、權威性和內容特色；而且配置了強大的全文檢索系統，大大突破了傳統工具書在檢索方面的局限性；同時通過超文本技術建立了知識之間的鏈接和相關條目之間的跳轉閱讀，使讀者在一個平臺上能夠非常方便的獲取分散在不同工具書裏的、具有相關性的知識信息。

《知網工具書庫》除了實現了庫內知識條目之間的關聯外，每一個條目後面還鏈接了相關的學術期刊文獻、博士碩士學位論文、會議論文、報紙、年鑒、專利、知識元等，幫

助人們了解最新進展，發現新知，開闊視野。

文獻來源：《知網工具書庫》集成了近 200 家知名出版社的 4000 余部工具書，類型包括語文詞典、雙語詞典、專科辭典、百科全書、圖錄、表譜、傳記、語錄、手冊等，約 1500 萬個條目，70 萬張圖片，所有條目均由專業人士撰寫，內容涵蓋哲學、文學藝術、社會科學、文化教育、自然科學、工程技術、醫學等各個領域。

China Reference Works Online (CRWO) is an authoritative, comprehensive and continuously updated encyclopedia database. It collects over 4000 volumes of reference works from over 200 leading publishers in China, and contains over 15 million entries and 700 thousand images, which are all written by experts. The book type includes Chinese dictionary, bilingual dictionary, specialized dictionary, encyclopedia, illustrated book, atlas, biography, ana & dictum, handbook, and so on.

會議論文集

明史研究

《明史研究》完整收錄 1991 年以來連續出版的 10 部文集,彙集了明史研究主要專家和重要研究項目的成果。系統詳實還原了明代社會各領域的歷史風貌。是明史研究和史料集成的首選出版物。收錄了由中國明史學會主辦的明史研究會議會議論文共計 308 篇。主要從中國明朝歷史的政治、經濟、文化、外交、軍事、方志學、文物考古學、家族譜牒學、語言學、民間文學等多學科的角度展開多方面的研究,是國內外明朝歷史研究者進行學術研究的重要參考文獻。

Item no. : TH32160272
Format : E-Book

明史研究論叢

《明史研究論叢》收錄了由中國社會科學院歷史研究所明史研究室主辦,研究明代時期的政治制度、稅收、詔令、外交活動等研究方向文獻 218 篇,分為 10 個專輯。具體內容包括了元末明初的學風、明代荒政中的報災與賑災、明代衛所月糧制度、明代人口統計與黃冊制度,明代國家權利與地方社會等,對研究明史的學者,具有參考價值。

Item no. : HP32160273
Format : E-Book

唐史論叢

《唐史論叢》完整收錄 1987 年以來連續出版的 11 部文集,由中國唐史學會主辦的唐史研究會議所發表的文章共計 203 篇。內容主要以研究性論文為主,在創刊後,眾多隋唐史研究名家在此撰稿發文,學術水準很高,在海內外唐史學界享有很高的聲譽。《唐史論叢》主要研究了中國唐代的政治、軍事、經濟、文獻、藝術等方面,揭示了唐史研究的走向和最新的研究歷史方向,對中國唐代歷史研究具有很高參考價值。

Item no. : BS32160279
Format : E-Book

西藏研究

“西藏研究”收錄了由四川大學藏學研究所主辦的 4 屆藏學研究會議所收集的研究性論文共計 131 篇。4 屆學術會議分別是:西藏及其他藏區經濟發展與社會變遷學術會議、“西藏和其他藏區現代化道路選擇”學術研討會、任乃強與康藏研究學術研討會、“藏彝走廊歷史文化”學術討論會會議、西藏考古與藝術國際學術討論會會議論文主題覆蓋了西藏及藏區的經濟、社會變遷、現代化、民國康藏研究、藏彝民族歷史文化等方面。

Item no. : GB32160283
Format : E-Book

西夏學會議論文集

《西夏學會議論文集》完整收錄了在由寧夏大學西夏學研究院主辦的各屆西夏學研究會議上所發表的文章 335 篇,分為 8 個專輯。專輯中,不僅包含了對黑水城西夏文文獻的研究,還囊括了對黨項民族及西夏王朝的政治、軍事、地理、宗教、文獻、考古、文物、語言文字、文化藝術、社會風俗等方面的深入研究。文章有:“西夏遺文錄”,“中國藏西夏文獻碑刻題記卷綜述”,“俄藏黑水城文獻《劉知遠諸宮詞》俗字整理研究”等,其具有豐富的研究參考價值。

年鑒

中國年鑒全文數據庫 (1912-2012)

中國年鑒網絡出版總庫是目前國內最大的連續更新的動態年鑒資源全文數據庫。內容覆蓋基本國情、地理歷史、政治軍事外交、法律、經濟、科學技術、教育、文化體育事業、醫療衛生、社會生活、人物、統計資料、文件標準與法律法規等各個領域。

文獻來源：中國國內的中央、地方、行業和企業等各類年鑒的全文文獻。

專輯專題：

1.年鑒內容按行業分類可分為地理歷史、政治軍事外交、法律、經濟總類、財政金融、城鄉建設與國土資源、農業、工業、交通郵政信息產業、國內貿易與國際貿易、科技工作與成果、社會科學工作與成果、教育、文化體育事業、醫藥衛生、人物等十六大行業。

2. 地方年鑒按照行政區劃分類可分為北京市、天津市、河北省、山西省、內蒙古自治區、遼寧省、吉林省、黑龍江省、上海市、江蘇省、浙江省、安徽省、福建省、江西省、山東省、河南省、湖北省、湖南省、廣東省、廣西壯族自治區、海南省、重慶市、四川省、貴州省、雲南省、西藏自治區、陝西省、甘肅省、青海省、寧夏回族自治區、新疆維吾爾自治區、香港特別行政區、澳門特別行政區、臺灣省共 34 個省級行政區域。

收錄年限：1912 年至今。

Chinese Standard Full-text Database (CYFD) collects all the state standards published by Standards Press of China and Standardization Administration of China, which occupy more than 90% of total state standards. The content of standard is originated from Standards Press of China, and information of relevant literature, patent and achievement comes from each database of CNKI. Search can be carried out through some terms such as standard number, Chinese standard name, drafting unit, drafter, adopted standard number, publication date, Chinese standard classification number and international standard classification number.

Year Limit: Chinese Standard from 1950 till now.

清史系列

清史編年

《清史編年》，大型清史著作，中國人民大學清史所，歷時二十年編撰，李文海主編，共十二卷，六百餘萬字，2000年由中國人民大學出版社出版。採用編年體裁的形式，記述自清軍入關到清帝退位共二百六十八年間的重大史事，對有清一代的中國歷史作了一番全景展示，編著者旁徵博引、博涉專精、綜貫會通，對以往的清史研究作了一次認真的總結，比較清晰地描繪了清代歷史發展的進程。為清史研究提供不易搜集的資料和比較系統的線索。本產品包含一、二、四、五卷。

Item no. : KT32160274
Format : E-Book

清史研究叢書

《清史研究叢書》從不同于傳統的研究角度去剖析清朝的歷史，是清史研究的非常重要的參考資料。已收錄 4 冊，包括《北京與江戶——17—18 世紀的城市空間》、《漢宋之間：翁方綱學術思想研究》、《清朝的國家認同——“新清史”研究與爭鳴》、《清代新疆和卓叛亂研究》。

Item no. : YN32160275
Format : E-Book

人口普查資料

中國第六次全國人口普查專題庫

《中國第六次全國人口普查專題庫》完整、獨家收錄了中國統計出版社出版的 2010 年人口普查的所有資料資料，包括全國層面、31 個省和直轄市、2872 個縣級單位的人口資料。資料內容包括姓名、性別、年齡、民族、戶口登記狀況、受教育程度、行業、職業、社會保障、婚姻、生育、死亡、住房情況、遷移流動等項。這是目前最完整、最權威且唯一合法授權數字發行的普查資料庫。

所有資料表格均加工成 EXCEL 格式，供檢索、流覽和分析，資料指標均有英文翻譯，是海外學者分析研究中國國情最基本的資料資源。

Item no. : TY32160292

特色文化圖書系列

嶺南文化書系

“嶺南文化書系”，嶺南是中國一個特定的環境區域，這些地區不僅地理區域臨近，而且，人民生活習慣也有很多相同之處。嶺南文化是中華民族優秀文化的重要組成部分。從地域上來說，嶺南文化主要以屬於珠江系文化的廣府文化、潮汕文化和客家文化為主，這是嶺南文化的主體。

“嶺南文化書系”由《廣府文化叢書》、《潮汕文化叢書》及《客家文化叢書》三大叢書共

30 種讀本組成，歷史勝跡、民居建築、地方先賢、方言詞曲、工藝美術、飲食風尚無所不有，試圖從地域分類的角度完整展現嶺南文化的風貌和精髓。

Item no. : YW32160270
Format : E-Book

西湖文化書系

“西湖文化書系”精選浙江出版集團有關西湖的圖書 23 種，全面系統的介紹了西湖的歷史、風景、人物、古跡、詩詞、民間故事、人物和小說等等。

Item no. : WB32160284
Format : E-Book

伊斯蘭文化書系

“伊斯蘭文化書系”精選黃河出版集團出版的伊斯蘭文化圖書 31 種，全面反映了伊斯蘭文化在中國的發展歷史和現狀，以及伊斯蘭教的傳播情況。同時，介紹了中國穆斯林的禮儀習俗、宗教活動、基本特徵以及與中國本土文化的融合。

專利

中國專利數據庫 (1985-2013)

《中國專利全文數據庫（知網版）》包含發明專利、實用新型專利、外觀設計專利三個子庫，準確地反映中國最新的專利發明。專利相關的文獻、成果等資訊來源於 CNKI 各大數據庫。可以通過申請號、申請日、公開號、公開日、專利名稱、摘要、分類號、申

請人、發明人、優先權等檢索項進行檢索，並一次性下載專利說明書全文。

文獻來源：國家智慧財產權局智慧財產權出版社。

顯著優勢：與通常的專利數據庫相比，《中國專利全文數據庫》（知網版）每條專利的知網節集成了與該專利相關的最近文獻、科技成果、標準等資訊，可以完整地展現該專利產生的背景、最新發展動態、相關領域的發展趨勢，可以瀏覽發明人與發明機構更多的論述以及在各種出版物上發表的文獻。

專利分類：按照專利種類分為發明專利、外觀設計和實用新型三個類型，其中發明專利和實用新型採用國際專利分類法（IPC 分類）和 CNKI 168 學科分類，外觀設計採用國際外觀設計分類和 CNKI 168 學科分類。

收錄年限：從 1985 年至今的中國專利。

收錄數量：截止 2012 年 6 月，《中國專利全文數據庫》共計收錄專利 645 萬多條。

China Patent Full-text Database (SCPD) contains three sature database, invention patent, utility model and appearance design patent, which accurately reflect the latest patent in China. Each database from CNKI is the source of patents' relevant literatures and achievements. Search can be carried out through several terms such as application number, application date, publication number, publication date, patent name, abstract, classification number, applicant, inventor and priority. The full-text patent specification can be downloaded at once.
